INSULATED WIRE STRIPPER/CUTTER

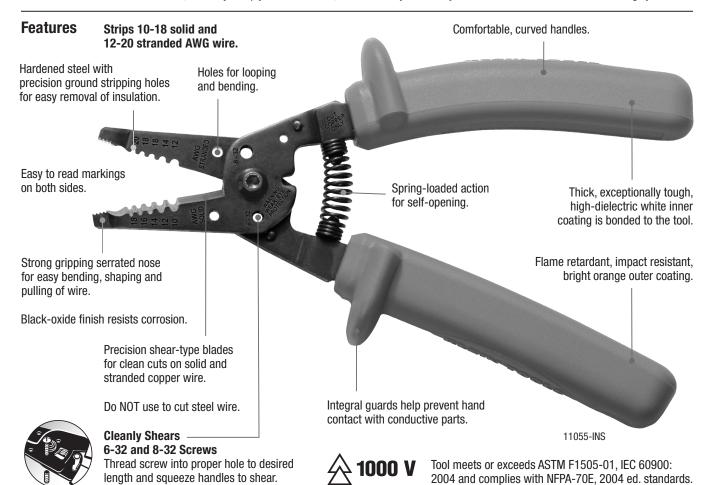

KLEIN-KURVE Insulated Wire Stripper/Cutter

KLEIN TOOLS For Professionals...Since 1857®

Insulated Wire Stripper/Cutter for Both Solid and Stranded!

Introducing the first insulated Klein Kurve® Wire Stripper/Cutter – a multiple function insulated tool that can cut, strip, loop and gauge both 10-18 solid and 12-20 stranded AWG wire, plus cleanly shear 6-32 and 8-32 screws. The 11055-INS features curved handles with comfortable orange grips consisting of two layers of insulation to protect against electric shock, and integral guards to prevent hand contact with conductive parts. Klein insulated tools meet or exceed the ASTM F1505-01, IEC 60900:2004 standards for insulated tools, and they comply with NFPA-70E, 2004 ed. They are clearly marked with the official 1000-volt rating symbol.

AWARNING: Whenever possible, always de-energize lines and equipment prior to working on or around them. Klein insulated tools are designed only to reduce the chance of injury where the tool may make contact with an energized source.

AWARNING: Only use tools that are marked with the official international 1000-volt rating symbol shown below, if there is any chance that the tools will make contact with an energized source.

AWARNING: Wear approved eye protection. Always inspect your tools before use. Do not use if orange coating cracks, breaks or becomes damaged. Destroy tool if white layer shows through orange layer.

AWARNING: Do NOT touch uninsulated portion of the tool or any conductive object when either might contact an energized source.

AWARNING: Because moisture, films, or other surface contaminants are conductive, Klein insulated tools must be kept clean, dry, and free of any surface contaminants.
