3/4" Bender-Part # 57075

# Pipe Spring Bender

# Cold PVC Pipe Bender

**YOU CAN**  
**COLD BEND**

**RIGID PVC PIPE WITHOUT**  
**PIPE COLLAPSE OR FRACTURE**

- NO HEAT GUNS
- NO HEAT BLANKETS
- FEWER PVC FITTINGS

**FASTER AND EASIER**  
**THAN CUTTING AND GLUEING**  
**FACTORY FITTINGS**

One Size-Fits ALL Knees!

**HOW?**

**INSERT THE PIPE SPRING INTO THE PIPE**  
**AND BEND ACROSS YOUR KNEE!!**

1/2" Part #58050  
3/4" Part #58075  
1" Part #58100

## Definition of Cold

NOTE: **Pipe should be 50° F or warmer.** PVC pipe requires slight over bending which will "pop back" a few degrees upon the release of bending pressure.

Hang up that heat gun and can that glue can. Your knee is faster and the Pipe Spring Bender makes it easy to bend 1/2" & 3/4" PVC. For more radius bends use EMT bender. Add a little brute force and you can bend 1" too. Believe it!
