#### Technical Reference

#### Limit Switches

2

Mechanical Limit Switches are contact sensors widely used for detecting the presence or position of objects in industrial applications.

Limit Switches offer high precision in terms of accuracy and repeatability. This is primarily due to the fact that they make direct contact with the target. When an object contacts the limit switch lever (or plunger) the lever moves a pre-travel distance to the operating point where the contacts are tripped. Movement of the lever beyond this point is called the over-travel.

#### Lever Type Actuator

Refer to Sensor Learning Course, **Page V8-T12-4**, for a complete description of limit switch terminology.

Limit switches contain the following major components. These may be modular or part of a single-piece switch.

#### Limit Switch Components

#### Actuator

This is the part of the switch that contacts the target. Typical actuators are levers and plungers. Several styles are available, see Sensor Learning Course, **Page V8-T12-4**, for more information.

#### Switch Body

This part contains the electrical contact mechanism. For complete information on electrical outputs, see Sensor Learning Course, **Page V8-T12-4**.

#### Terminals

The terminals are the point of connection for the wiring. These terminals may be on the body itself, or housed in a removable receptacle. The limit switch may also come equipped with a factory installed cable or pin-connector.

## Product Selection Guide

### E47 Precision Switches

#### Page V8-T2-6

##### Overview

Specified when accurate repeatability, choice of operating forces and travel characteristics and tightly controlled action of cam or target in space restricted areas are of prime importance. Cost effective and compact.

##### Applications

Overhead, folding and elevator doors, sliding gates, automated guided vehicles and commercial instrumentation

##### Product Features

Self-contained switches or with an enclosed cast housing for increased durability and conduit connection (1/2 in NPT)

High current capacity for power load switching and motor handling capability

Screw and solder terminations

Booted enclosed version shields actuators from debris

Mounting centers—1.0 in (25.4 mm), #8 screw size

##### Technical Data and Specifications

Mechanical life: 3,000,000 operations min.

Electrical life: 500,000 operations min.

Contact ratings—  
NEMA A600, R300, AC-15, DC-13  
15A/20A, 125 or 250 Vac

Enclosure ratings—  
Enclosed: NEMA 1

Construction—  
Basic: Phenolic  
Enclosed: Aluminum die cast

##### Approvals

UL® Recognized, E117028  
UL tested to Canadian safety standards  
RoHS Compliant

### Compact Prewired Switches

#### Page V8-T2-16

##### Overview

Designed to be a versatile, slim device for hard to fit applications where sealing integrity is required.

##### Applications

Machine tool, food processing and packaging

##### Product Features

Rugged aluminum alloy die cast housing  
Sealed construction with enclosure ratings of NEMA 4, 6 and 13, IEC IP69K

Prewired with 3m of 18 AWG, AWM 2517, 300V cable

Stackable ridge for ganged operation

##### Technical Data and Specifications

Mechanical life: 10,000,000 operations min.

Electrical life: 200,000 operations  
30 operations min.

Contact ratings—  
NEMA B300

Enclosure ratings—  
NEMA 4, 6 and 13; IP67, IP69

Construction—  
Aluminum alloy die cast

##### Approvals

UL Listed, E170645 (cable versions only)  
UL tested to Canadian safety standards  
CE  
RoHS Compliant

### LS-Titan Miniature DIN Switches

#### Page V8-T2-21

##### Overview

Safety position switches with insulated plastic or rugged metal enclosures. Approved for worldwide safety application.

##### Applications

Automatic vending machines, electronic assembly machines, elevators and lifts, injection molding, packaging and safety applications

##### Product Features

Modular plug-in head and body components

Positive opening NC contacts for safety applications

Operating heads can be rotated 90 degrees to suit specific direction of operation

##### Technical Data and Specifications

Mechanical life: 8,000,000 operations

Contact ratings—  
AC-15, 6A at 24V, 6A at 230/240V,  
4A at 400/415V;  
DC-13, 3A at 24V, 800 mA at 110V,  
300 mA at 220V

Enclosure ratings—  
IP66, IP67 (by model)

Construction—  
Plastic or metal (by model)

##### Approvals

Safety function, IEC/EN 60947-5-1  
TÜV-Rheinland certified (LSE models)  
UL Listed, E29184  
CSA Certified, 12528  
CE  
CCC  
RoHS Compliant

### E49 Mini Metal Switches

#### Page V8-T2-43

##### Overview

Suitable for OEMs who require a small, cost-effective solution but cannot sacrifice durability and mechanical life as they would if they chose a plastic IEC style switch.

##### Applications

Automatic vending machines, electronic assembly machines, elevators and lifts, injection molding, packaging

##### Product Features

Pre-wired units with custom cable lengths available for high volume customers

“Fingerproof” terminals protect against accidental shock

Double-spring mechanism for contact reliability

Grounding terminal included

Captive screws on enclosure cover make wiring hassle-free

SPDT double break

##### Technical Data and Specifications

Contact ratings—  
5A at 250 Vac  
5A at 30 Vdc

Enclosure ratings—  
IP65

Construction—  
Zinc alloy

##### Approvals

UL Recognized, E117028  
(Model E49G31C1P3 is not  
UL Recognized)  
CE  
RoHS Compliant

### E49 Compact Metal Switches

Page V8-T2-49

#### Overview

Designed with high mechanical strength for harsh environments. The rugged Aluminum die cast construction provides reliable, oil-tight, waterproof and dustproof sealing for a variety of applications. Snap action 1NO-1NC contacts provide flexibility in design.

#### Applications

Packaging, material handling conveyors, end-of-travel and guarding operations, baler/compactor, industrial door lifts

#### Product Features

Rigid die cast switch housing  
Set position indicator plate for easy maintenance  
High mechanical strength  
Oiltight, waterproof and dustproof construction

#### Technical Data and Specifications

Mechanical life: 15,000,000 operations min.  
Electrical life: 500,000 operations min. at full load  
Contact ratings—  
NEMA A600, R300; AC-15, DC-13  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 12, 13; IP65, IP67  
Construction—  
Aluminum die cast

#### Approvals

UL Listed, E170645  
UL tested to Canadian safety standards  
RoHS Compliant

### E50 Heavy-Duty Plug-In Switches

Page V8-T2-53

#### Overview

Versatile in design. High reliability. Low maintenance costs with installation ease. BEST CHOICE for Heavy-Duty Limit Switch applications. Withstands physical and chemical abuse of harsh industrial environments.

#### Applications

Punch presses, waste water treatment, machine tool, automotive, retrieval systems, industrial truck, car wash lines

#### Product Features

Modular operating heads, switch bodies and receptacles are interchangeable without field adjustment  
Order as complete assemblies or components for stocking and manufacturing flexibility  
90 degree total travel, 5 degree pre-travel characteristics are standard features  
Viton® gasket, boot, and seal material offers exceptional chemical resistance  
Rotary head operating mode from CW, CCW or CW and CCW is easily changed without tools

#### Technical Data and Specifications

Mechanical life: 13,000,000 operations min.  
Electrical life: 1,000,000 operations min. at full load (single-pole)  
Contact ratings—  
NEMA A600, R300  
Lighted versions A150, R150  
6A, 120 Vac; 10A continuous  
Enclosure ratings—  
NEMA 1, 3, 3S, 4, 4X, 6, 6P, 13; IP67  
Construction—Zinc die cast

#### Approvals

UL Listed, E170645  
CSA Certified, 50513  
CE (some models)  
RoHS Compliant

### E50 Heavy-Duty Factory Sealed 6P+ Switches

Page V8-T2-67

#### Overview

Designed specifically to withstand the penetrating properties of new cutting fluids (coolants), acid or caustic washes, salt spray, severe vibration, shock and temperature fluctuations, grit and debris.

#### Applications

Automotive, pulp and paper, food processing, waste management, primary metals, machine tool (cutting, forming, bending)

#### Product Features

Tamperproof, one-piece switch body assembly, epoxy filled  
Factory sealed. 6P submersible. Pre-wired with cable, pigtail or pin connector options. All with ground connection  
Utilizes E50 modular operating heads  
Special V-seal on switch body/head connection provides hermetic barrier against fluid ingress  
LED indicating light, 24V–120 Vac/dc neon version too

#### Technical Data and Specifications

Mechanical life: 35,000,000 operations min.  
Electrical life: 1,000,000 operations min. at full load  
Contact ratings—  
NEMA A600, R300  
Lighted versions A150, R150  
6A, 120 Vac; 10A continuous  
Enclosure ratings—  
NEMA 1, 2, 3, 3S, 4, 4X, 6, 6P, 13; IP67, IP69  
Construction—Zinc die cast

#### Approvals

UL Listed, E170645  
CSA Certified, 50513  
CE (some models)  
RoHS Compliant

### Operators

Page V8-T2-79

#### Overview

Wide variety of operator types for rotary and wobble style limit switches.

#### Applications

Used with E50, E50 6P+ and 10316 limit switches

#### Product Features

Rollers and rods available in metal and nonmetal contact surfaces

#### Technical Data and Specifications

Varies by model

#### Approvals

Varies by model

## Non Plug-In Switches

### Page V8-T2-87

#### Overview

The Industrial standard for Non Plug-In Heavy-Duty Limit Switches. Sold as complete assembled units only.

#### Applications

Serving MRO and USER replacement requirements with broad d market coverage

#### Product Features

Side and top rotary, side and top push or wobble operation  
 CW, CCW or CW and CCW operating modes are field convertible  
 Double break-make snap action contacts, same polarity each pole  
 Captive saddle clamp terminals accept up to #12 wire  
 Head can be mounted in any of four discrete positions, intervals of 90 degrees

#### Technical Data and Specifications

Mechanical life: 10,000,000 operations min.  
 Electrical life: 500,000 operations at full load  
 Contact ratings—NEMA A600, R300 6A, 120 Vac; 10A continuous  
 Enclosure ratings—NEMA 1, 4, 13  
 Construction—  
 Zinc die cast

#### Approvals

UL Listed, E170645  
 CSA Certified, 50513

## Hazardous Location Switches

### Page V8-T2-90

#### Overview

Designed for severe environmental service in locations where there exists a danger of an internal or external explosion of flammable gases, vapors, metal alloy or grain dust.

#### Applications

Mining, metal cutting, grain storage, forest products, petrochemical, waste and sewage management, pharmaceutical

#### Product Features

Sealed and unsealed versions available  
 One-way gasket on sealed version keeps liquids out, yet allows a harmless release of gases in the event of an internal explosion  
 Silicon bronze housing provides excellent corrosion resistant properties in extreme NEMA 4X applications  
 Temperature build-up on limit switch surface is dissipated by housing design and materials used  
 Utilizes the operating heads and internal switch mechanisms of the 10316 Non Plug-In line

#### Technical Data and Specifications

NEMA 7, Div. 1, Class I, BCD  
 NEMA 9, Div. 1, Class II, EFG  
 Contact ratings—NEMA B600 3A, 120 Vac; 5A continuous  
 Enclosure ratings—LX: NEMA 7, 9  
 CX: NEMA 1, 4, 7, 9  
 CB: NEMA 1, 4, 4X, 13  
 CBX: NEMA 1, 4, 4X, 7, 9, 13  
 Construction—LX, CX: Aluminum die cast  
 CB, CBX: Silicon bronze

#### Approvals

UL Listed, E170645, E183975  
 UL tested to Canadian safety standards

## Special Purpose Switches

### Page V8-T2-94

#### Overview

Variety of special function limit switch products.

#### Applications

Serving MRO and USER replacement requirements with broad market coverage

#### Product Features

Special function switch lines include:  
 Cabinet door interlocks — when plunger is pulled out, red band indicator visually shows that interlock is defeated  
 Precision switches—1NO-1NC, 2NO-2NC, or operator only. Variety of mounting brackets available  
 Pneumatic time delay—ON delay and OFF delay. Timing range—0.05 to 60 seconds  
 Rotating cam shaft switches

#### Technical Data and Specifications

See **Page V8-T2-97** for more information  
 Enclosure ratings—  
 NEMA 1 or NEMA 4 versions  
 Construction—  
 Zinc die cast  
 PS: Phenolic

#### Approvals

UL Listed, E170645  
 CSA Certified, 50513 (PS and J only)

## Limit Switches

### E47 Precision Switches

#### E47 Precision Switches

2

### E47 Precision Switches

#### Product Description

E47 Precision Switches from Eaton's electrical sector provide high accuracy switching at an affordable price. A variety of standard features, such as current capacity, operating force, travel characteristics and actuators, lets you custom fit the switch to your application.

The switches are available in their compact basic form, or enclosed in a rugged, metal housing.

#### Features

- Compact housings are ideal for use where space is restricted
- Precision, snap-action operators provide accurate repeatability of electrical and mechanical operating characteristics
- High current capacity (up to 20A) allows power load switching and motor handling capability
- Enclosed booted versions shield actuators from debris

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

| 90°<br> | Terminal wire cover with 90° conduit interface | E47PA2         |

## Technical Data and Specifications

### E47 Precision Switches

| Description                               | Specification  |
|---|--|
| Operating speed                           | 0.01m/second to 1m/second  |
| <b>Operating Frequency</b>                |  |
| Mechanical                                | 120 operations/minute  |
| Electrical                                | 20 operations/minute   |
| Mechanical life                           | 3,000,000 operations minimum   |
| Electrical life                           | 500,000 operations minimum   |
| Contact resistance                        | 15M ohms maximum, initial  |
| Insulation resistance                     | 100M ohms minimum at 500 Vdc   |
| <b>Dielectric Strength</b>                |  |
| Between non-current carrying parts        | 1000 Vac, 50/60 Hz for 1 minute  |
| Between current carrying parts and ground | 2000 Vac, 50/60 Hz for 1 minute  |
| <b>Ambient Operating Temperature</b>      |  |
| Basic                                     | -13° to 176°F (-25° to 80°C)   |
| Enclosed                                  | 5° to 176°F (-15° to 80°C)   |
| Environmental rating enclosed, booted     | NEMA 1   |
| Mounting centers                          | 1.0 in (25.4 mm), #8 screw size  |
| Terminal screws                           | Bottom facing M4 x 0.7<br>Screws with cup washers will accept 22–12 AWG (2.5 sq. mm maximum)<br>Maximum torque: 10 in-lbs. |
| Threaded bushing                          | 15/32 in   |
| Material of construction                  | Mineral filled phenolic  |
| Enclosure rating                          | Aluminum die casting (ADC-3/A380); Seal boot: nitrile, butyl rubber (NBR)  |
| Conduit fitting on enclosed type          | 1/2 in NPT   |

#### Terminal Configurations

(Spade type not shown, available on some models)

#### Notes

- ① Inductive load has a power factor of 0.04 minimum (AC) and a time constant of 7 m/second (DC).
- ② Lamp load has an inrush current of six times steady-state current.

### Compact Prewired Switches

#### Product Description

The E47 Compact Prewired Limit Switch by Eaton's electrical sector is designed to be a versatile, slim device for hard to fit applications where sealing integrity is required. The rugged die cast aluminum alloy housing, cable connection and switch mechanism are encapsulated for protection against contaminants, moisture, shock and vibration. This factory wired (3m) device has NEMA® enclosure ratings of 4, 6 and 13, making it suitable for applications such as machine tool, food processing and packaging.

#### Features

- Rugged aluminum alloy die cast housing
- Sealed construction with enclosure ratings of NEMA 4, 6 and 13
- Prewired with 3m of 18 AWG, AWM 2517, 300V cable, or micro-connector version also available
- Stackable ridge for ganged operation

#### Standards and Certifications

- UL Listed, E170645 (cable versions only)
- UL tested to Canadian safety standards
- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

Compact Prewired Switches

Micro-Connector Switches

Note

① Inductive load ratings are tested at a power factor 0.4 min. for AC power and a time constant of 7 ms max. for DC power. Inrush current for motor load is six times the steady state current.

LS-Titan Miniature DIN Switches

Product Description

Eaton’s LS-Titan™ limit switch line is a complete offering of safety position switches designed for worldwide application. Economical insulated plastic or rugged metal enclosures and modular, plug-in operating heads and bodies make LS-Titan a flexible switching solution.

A highlight of the LS-Titan switch line is the world’s first electronic position switch (LSE models). These switches feature freely programmable operating points that can be set individually at any time. Additional LSE models provide analog outputs proportional to the actuator position.

LS-Titan switches are suitable for use in safety applications designed to protect persons or processes.

Features

- Modular, plug-in system (head and body components)
- Positive opening NC contacts for safety applications
- Wide variety of economical plastic and rugged metal versions available
- Operating heads can be rotated 90 degrees to suit specific direction of operation
- Unique electronic safety position switches (LSE models) provide 0–10 Vdc outputs proportional to the actuator position and allow for easy configuration of a custom trip point
- Can be ordered as separate components (head and body) or as completely assembled switches
- Screw and Cage Clamp® (standard on LSE models and optionally available on mechanical models) connections provide larger wiring areas for easier installation
- Approved for worldwide application

Standards and Certifications

- Safety function by positive opening contacts per IEC/EN 60947-5-1
- TÜV-Rheinland Certified for Functional-Safety (LSE models)
- UL Listed, E29184
- CSA Certified, 12528
- RoHS Compliant
- CE
- CCC

**Note:** Cage Clamp is a registered trademark of Wago Kontakttechnik, 32423 Minden, Germany.

## Product Identification

2

## Notes

- ① **Basic device** (see Pages V8-T2-23 to V8-T2-31)  
 According to EN 50047  
 With screw-on cover  
 Contacts: 1NO-1NC, 2NO, 2NC  
 Cage Clamp, screw terminal  
 As snap-action or standard-action switch  
 As electronic snap-action switch (individually adjustable)  
 As 0–10 Vdc analog signal encoder
- ② **Fixing adapter** (see Page V8-T2-33)  
 Allows mounting of M22 pushbuttons
- ③ **Roller lever** (see Pages V8-T2-23 and V8-T2-26)  
 For one-sided operation with higher operating speed
- ④ **Angled roller lever** (see Pages V8-T2-23, V8-T2-26 and V8-T2-30)  
 For actuation along the unit axis
- ⑤ **Rotary lever** (see Pages V8-T2-23, V8-T2-27 and V8-T2-30)  
 For actuation from the side, for pendulum movements
- ⑥ **Roller plunger** (see Pages V8-T2-23, V8-T2-26 and V8-T2-30)  
 For actuation from the side with low actuating force
- ⑦ **Adjustable roller lever** (see Pages V8-T2-24, V8-T2-27, V8-T2-28 and V8-T2-30)  
 For length adjustment as required
- ⑧ **Actuating rod** (see Pages V8-T2-25, V8-T2-29 and V8-T2-31)  
 On conveyor belts for lightweight goods
- ⑨ **Spring-rod** (see Pages V8-T2-25, V8-T2-29 and V8-T2-31)  
 For flexible actuation from all sides
- ⑩ **Actuating rod** (see Pages V8-T2-25, V8-T2-29 and V8-T2-31)  
 Withdrawable mechanism from front
- ⑪ Pushbuttons from the M22 family; see M22 catalog (CA04716001E) or [www.eaton.com/m22](http://www.eaton.com/m22)

## Limit Switches

### LS-Titan Miniature DIN Switches

2

#### Understanding LS-Titan Electronic Safety Position Switches

All three LS-Titan LSE switch bodies are safety-rated products. The LSE-11 and LSE-02 switch bodies both have a freely programmable operating point and can be individually adjusted to suit the application, and can be changed as often as required. These devices feature an LED on the body, providing simple indication during programming and operation.

The LSE-AU (0–10 V) analog position switch takes position data and converts to an analog current or voltage value that can then be continuously fed into an automation system. The LSE-AU also features a diagnostic output for additional data processing.

This ensures that a safe operating state can be monitored and evaluated at any time. A self-test function is also present on these models. Outputs Q1 and Q2 are continuously tested for overloads, short circuits to 0V and short circuits to +U<sub>e</sub>.

Like the electromechanical position switches, LS-Titan electronic position switches meet Category 3 or 4 of the EN 954-1 standard for machine safety when configured as a redundant system. All devices are thus suitable for safety applications that are used for the protection of persons or processes.

#### Operating Point Adjustment

##### LSE-11

##### LSE-02

#### Example of LS-Titan LSE Models in a Safety-Oriented Circuit

#### Notes

LSE-11 and LSE-02—individual operating point adjustment.

LSE-11 and LSE-02 can be used in safety circuits.

S1 is connected to 24 Vdc

S2, S3 each switch with a delay of 0.7s

R1, R2, for example, series element M22-XLED60 (2820 ohms/0.5W)

**E49 Mini Metal Switches**

**Product Description**

E49 Mini Metal Limit Switches from Eaton’s electrical sector are designed small and tough, with machinery OEMs in mind. The small size, metal body and mechanical life make this product perfect for switching applications in packaging, material handling, elevators and lifts, electronic assembly equipment, injection molding machinery, and auto-vending machines. The E49 Mini Metal is the ideal switch for those who need a cost-effective, compact solution, but don’t want to sacrifice durability in the process.

**Features**

- Long life—rated for 10 million operations
- Pre-wired units with custom cable lengths available for high volume customers
- “Fingerproof” terminals protect against accidental shock
- Double-spring mechanism for contact reliability
- Grounding terminal included
- Captive screws on enclosure cover make wiring hassle-free
- SPDT double break

**Standards and Certifications**

- UL Recognized, E117028 (Model E49G31C1P3 is not UL Recognized)
- CE
- RoHS Compliant

**⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### E49 Mini Metal Switches

| Description                   | Specification   |
|-------------------------------|---|
| Operating speed               | 0.19 in (5 mm) to 19.7 in/s (50 cm/s)   |
| Operating frequency           | 120 operations/min  |
| Contact resistance            | 25M ohms (initial)  |
| Insulation resistance         | 100M ohms min (at 500 Vdc)  |
| Dielectric strength           | 1000 Vac, 50/60 Hz for one minute between non-continuous terminals  |
|                               | 1500 Vac, 50/60 Hz for one minute between current-carrying and non-current-carrying parts and between each terminal and ground                |
| Vibration                     | 10 to 55 Hz, 1.5 mm double amplitude  |
| Shock                         | Approx. 300 m/s <sup>2</sup> (approx. 30Gs)   |
| Ambient operating temperature | 23° to 149°F (–5° to 65°C)  |
| Humidity                      | 95% RH max.   |
| Service life                  | Mechanical: 10,000,000 operations min.  |
|                               | Electrical: 500,000 operations min.   |
| Weight                        | Approx. 130 to 190g   |
| Degree of protection          | IEC: IP65   |
| Material of construction      | Shaft: stainless SUS303<br>Arm: stainless SUS304<br>Head and body: zinc alloy<br>Terminal cover: PC/ABS plastic<br>Rubber grommet: NBR rubber |

#### Notes

<sup>①</sup> Inductive load has a power factor of 0.4 min. (AC) and a time constant of 7 msec. max. (DC).

<sup>②</sup> Lamp load has an inrush current of ten times the steady-state current, while motor load has an inrush current of six times the steady-state current.

**E49 Compact Metal Switches**

**Product Description**

E49 Compact Metal Switches by Eaton’s electrical sector are designed with high mechanical strength for harsh environments. The rugged aluminum die cast construction provides reliable, oil-tight, waterproof and dustproof sealing for a variety of applications. Snap action 1NO-1NC contacts provide flexibility in design.

**Features**

- Rigid die cast switch housing
- High mechanical strength
- Oil-tight, waterproof and dustproof construction

**Standards and Certifications**

- UL Listed, E170645
- UL tested to Canadian safety standards
- RoHS Compliant

**⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## E50 Heavy-Duty Plug-In Switches

## E50 Heavy-Duty Plug-In Switches

## Product Description

E50 Modular Plug-In Limit Switch Components from Eaton's electrical sector are the industry standard with versatility of design and high reliability for low maintenance, installation and inventory costs. Standard Viton gaskets, seals and boots and a zinc die cast enclosure provide exceptional chemical resistance to the common coolants, cleansing agents, and hydraulic fluids found in machine tool, automotive, waste water treatment and other heavy-duty industrial applications. Mounting dimensions accommodate both U.S. and DIN standards for easy retrofit installations. Super bright 24–120 Vac/dc LED indicating light versions simplify setup and troubleshooting operations.

## Features

- Modular, plug-in components (head, body and receptacle) provide application flexibility, reduced inventory and less downtime
- Manufactured to take the physical and environmental abuse (including cutting fluids and chemicals) of harsh industrial environments
- Chemical resistant Viton gaskets, seals and boots are standard, and so are captive, posi-drive screws
- The switches have terminal identification on the nameplate for a visual wiring checkout without guesswork. Heads and switch bodies can be replaced without rewiring
- E50 devices can be ordered in separate components or as complete assembled switches
- 600V rating, ridge-topped contacts and wiping action assure continuity even to logic level circuits
- Keyed, four direction head positioning
- Standard 5° pre-travel and 90° total travel
- 24–120 Vac/dc LED and 120 Vac neon indicating lights available
- Rotary heads are field convertible CW, CCW, or both, without special tools
- Epoxy filled, pin connector or pigtail pin connector receptacles available

## Standards and Certifications

- UL Listed, E170645
- CSA Certified, 50513
- CE (where shown)
- RoHS Compliant

**⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

① Connection options (add the code suffix from the table below to the end of the catalog number):

| Option   |   | Mating Cordset<br>Catalog Number | Code Suffix |     |
|--|---|----------------------------------|-------------|-----|
| Mini-connector ④ (with epoxy filled receptacle)  | Single-pole (5-pin mini-connector)              | CSMS5D5CY1602                    | P5 ⑤        |     |
|  | Two-pole (9-pin mini-connector)                 | CSMS9D9CY1602                    | P9 ⑤        |     |
| Micro-connector ④ (with epoxy filled receptacle) | Single-pole (5-pin micro-connector)             | CSDS5A5CY2202                    | A5 ⑤        |     |
|  | Cable connection (with epoxy filled receptacle) | 8 ft cable length                | —           | S   |
|  |   | 12 ft cable length               | —           | S12 |
| 20 ft cable length                               |   | —                                | S20         |     |
| Manifold mount (rear wiring entrance)            |   | —                                | M           |     |
| 20 mm Conduit Entrance                           |   | —                                | 20          |     |

② For operating head specifications, see Page V8-T2-58.

③ Roller can be converted in the field between horizontal and vertical.

④ For a full selection of cable connectors, see Tab 10, section 10.1.

⑤ Refer to Page V8-T2-64 for wiring diagrams.

#### Notes

- ① Temperature ranges below 32°F (0°C) are based on absence of freezing moisture or water.
- ② CW (clockwise) and CCW (counterclockwise) operation, easily convertible to CW only or CCW only operation.
- ③ For CW and CCW operation. For CW only or CCW only operation, high temperature limit increases to 250°F (121°C) without cable, and 221°F (105°C) with pre-wired cable.
- ④ Roller can be converted in the field between horizontal and vertical.
- ⑤ Roller shaft is 0.38 in (9.5 mm) longer on E50DS4, see Dimensions on [Page V8-T2-65](#).

## E50 Heavy-Duty Factory Sealed 6P+ Switches

## Product Description

E50 6P+ Limit Switches by Eaton's electrical sector were specifically designed to withstand the penetrating properties of cutting fluids and coolants, such as those used in the automotive industry, as well as extreme shock, vibration and temperature fluctuations. The one-piece, epoxy filled switch body is prewired at the factory to ensure leak-proof, submersible performance. This unique construction positively stops fluid from finding its way to any and all critical connections.

Our 6P+ switches can be ordered in separate components or as complete assembled devices. They are available with prewired 16 AWG cables or mini-connectors. Standard and custom cable lengths are available. As part of the E50 line, the 6P+ switches use the same operating heads as the standard E50 plug-in models to reduce the components you need to inventory.

## Features

- Manufactured to take the physical and environmental abuse (including cutting fluids and chemicals) of harsh industrial environments
- Modular, plug-in components (head and switch body) provide application flexibility, reduced inventory and less downtime
- Chemical resistant Viton gaskets, seals and boots are standard, and so are captive, posi-drive screws
- A special internal seal on the switch body prevents fluid from entering even when the operating head is not attached
- 600V rating, ridge-topped contacts and wiping action assure continuity even to logic level circuits
- Factory wired cable features a 350 pound pullout capacity
- Keyed, four direction head positioning. Standard 5° pre-travel and 90° total travel
- 24–120 Vac/dc LED and 120 Vac neon indicating lights available
- Rotary heads are field convertible CW, CCW, or both, without special tools

## Standards and Certifications

- UL Listed, E170645
- CSA Certified, 50513
- CE (where shown)
- RoHS Compliant

 **DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

**Notes**

- ① Temperature ranges below 32°F (0°C) are based on absence of freezing moisture or water.
- ② CW (clockwise) and CCW (counterclockwise) operation, easily convertible to CW only or CCW only operation.
- ③ For CW and CCW operation. For CW only or CCW only operation, high temperature limit increases to 250°F (121°C) without cable, and 221°F (105°C) with pre-wired cable.
- ④ Roller can be converted in the field between horizontal and vertical.
- ⑤ Roller shaft is 0.38 in (9.5 mm) longer on E50DS4, see Dimensions on [Page V8-T2-77](#).

## Technical Data and Specifications

### E50 Heavy-Duty Factory Sealed 6P+ Switches

| Description                            | Specification                               |
|--|---|
| Environmental ratings                  | NEMA 1, 3, 3S, 4, 4X, 6, 6P, 13, IP67, IP69 |
| Material of construction               | Zinc die cast                               |
| Switch gasket material                 | Viton                                       |
| Universal U.S./DIN mounting dimensions | 1.16 in (30 mm) x 2.34 in (60 mm)           |
| Conduit entrance                       | 1/2 in NPT or 20 mm threading               |
| Contact ratings                        | See below                                   |
| Contact operation                      | Snap action over center mechanism           |
| Contact material                       | Fine silver                                 |
| Maximum frequency of operation         | 8000 operations per hour                    |
| Mechanical life                        |   |
| Side rotary                            | 13,000,000 operations minimum               |
| Side or top push                       | 10,000,000 operations minimum               |
| Electrical life                        |   |
| Single-pole                            | 1,000,000 operations typical at full load   |
| Double-pole                            | 100,000 operations typical at full load     |
| Ambient temperature range—standard     |   |
| Standard without cable                 | 14° to 250°F (–10° to 121°C)                |
| Standard with cable                    | 14° to 221°F (–10° to 105°C)                |
| Low temperature without cable          | –40° to 250°F (–40° to 121°C)               |
| Low temperature with cable             | –40° to 221°F (–40° to 105°C)               |
| Repeat accuracy—standard               |   |
| Side operated                          | Within 0.0012 in                            |
| Top operated                           | Within 0.0003 in                            |
| Side rotary                            | Within 0.0014 in                            |
| Torque requirements                    |   |
| Operating head screws                  | 14–18 lb-in                                 |

**Operators**

**Product Description**

The Operators presented here are used with Eaton’s E50 Plug-In and 6P+ limit switches, as well as our 10316 rotary type limit switches. A wide variety of styles and sizes are available to provide optimum performance for nearly any application.

**Features**

- Wide variety of operator types for rotary and wobble style limit switches
- Rollers and rods available in metal and nonmetal contact surfaces

 **DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Product Selection

2

## Roller Type Operators

For rotary head switches: E50 Plug-In, E50 6P+, and 10316.

**Note:** Only operators with Nylatron rods or rollers should be used with explosion-proof limit switches.

#### Notes

- ① **Caution:** When selecting lever, the minimum required return torque of lever should not exceed minimum return force available in operating head as given in operating head specifications.
- ② Length from the operating shaft axis to the roller axis (or to the tip for non-roller operators).
- ③ Maximum length dimension between operating shaft axis to roller axis for comparison. Precision adjustable to lesser dimensions.
- ④ Applies when lever is extended to the maximum dimension.
- ⑤ By reassembling lever, minimum length can be reduced another 0.5 in (12.7 mm).
- ⑥ High-grade stainless steel.

**Rod Type Operators**

For rotary head switches: E50 Plug-In, E50 6P+, and 10316.

2

**Note:** Only operators with Nylatron rods or rollers should be used with explosion-proof limit switches.

## Non Plug-In Switches

## Non Plug-In Switches

## Product Description

10316 Type L non plug-in limit switches by Eaton's electrical sector are sold as completely assembled devices only, with a wide array of operating head configurations. All switches are single-pole 1NO-1NC.

## Features

- Side and top rotary, side and top push or wobble operation
- CW, CCW or CW and CCW operating modes are field convertible
- Double break-make snap action contacts, same polarity each pole
- Captive saddle clamp terminals accept up to #12 wire
- Head can be mounted in any of four discrete positions, intervals of 90°

| <b>Wobble Spring</b>      |            |             |
| 5.44 (138.2)              | 0.31 (7.9) | 0.81 (20.6) |
| <b>Wire Wobble Stick</b>  |            |             |
| 12.5 (317.5)              | 0.08 (2.0) | 0.81 (20.6) |
| <b>Nylon Wobble Stick</b> |            |             |
| 4.5 (114.3)               | 0.25 (6.4) | 0.81 (20.6) |

**Notes**

- ① Ranges below 32°F (0°C) are based on absence of freezing moisture or water.
- ② Contacts must be same polarity when both circuits are used.
- ③ Dimension from centerline of head to mounting surface is 0.78 in (20 mm).
- ④ Center to mounting surface.

#### Hazardous Location Limit Switches

2

### Hazardous Location Limit Switches

#### Product Description

Type LX, CX and CBX limit switches by Eaton's electrical sector are designed for extreme environmental service in NEMA 7–9 locations where the danger of an internal or external explosion of flammable gases, vapors, metal alloy or grain dust exists. Type CB provides excellent corrosion resistant properties in NEMA 4X applications. Markets served include mining, grain storage, forest products, petrochemical, pharmaceutical and waste and sewage management.

#### Features

- Sealed and unsealed versions available
- One-way gasket on sealed version keeps liquids out, yet allows a harmless release of gases in the event of an internal explosion
- Silicon bronze housing provides excellent corrosion resistant properties in extreme NEMA 4X applications
- Temperature buildup on limit switch surface is dissipated by housing design and materials used
- Utilizes the operating heads and internal switch mechanisms of the 10316 L non plug-in line

#### Note

① Not rated for explosive locations.

**DANGER**  
**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Notes

- ① Contact Eaton's Sensor Applications Engineering at 1-800-426-9184 for replacement contact blocks.
- ② For operating levers, see **Page V8-T2-79**. Only levers with Nylatron rods or rollers should be used with explosion-proof limit switches.
- ③ Field convertible to clockwise only or counterclockwise only operation.
- ④ 1NO-1NC contacts must be same polarity when both circuits are used—1NO and 1NC contacts have isolated poles and may be used on opposite polarity.
- ⑤ Neutral position switches operate one circuit in each direction.

## Technical Data and Specifications

## Hazardous Location Limit Switches

| Description                   | Specification   |
|-------------------------------|---|
| Material of construction      |   |
| LX, CX                        | Cast aluminum die cast  |
| CB, CBX                       | Silicon bronze  |
| Conduit entrance              |   |
| LX                            | 1/2 in pipe tap   |
| CB, CBX, CX                   | 3/4 in pipe tap   |
| Mounting                      | Surface mount   |
| Enclosure rating              |   |
| LX, CX, CBX                   | NEMA 7 Div. 1, Class I BCD; NEMA 9 Div. 1, Class II, EFG <sup>④</sup> |
| CB, CBX                       | NEMA 1, 4, 4X, 13 <sup>④</sup>  |
| CX                            | NEMA 1, 4, 13 <sup>④</sup>  |
| Ambient operating temperature | -20° to 200°F (-29° to 93°C) <sup>⑤</sup>                             |
| Approximate shipping weight   |   |
| LX                            | 2 lbs   |
| CX                            | 2.5 lbs   |
| CB, CBX                       | 6 lbs   |

## Notes

- ① Contact Eaton's Sensor Applications Engineering at 1-800-426-9184 for replacement contact blocks.
- ② 1NO-1NC contacts must be same polarity when both circuits are used—1NO and 1NC contacts have isolated poles and may be used on opposite polarity.
- ③ Travel with force applied at one-in (25.4 mm) radius. Applied at end of operator, travel is approximately 14.
- ④ A conduit seal-off kit is required for these switches
- ⑤ Ranges below 32°F (0°C) are based on absence of freezing moisture or water.

**Dimensions**

Approximate Dimensions in Inches or Inches (mm)

**Type LX Switch with Side Rotary Head**

**Side Pushbutton Head**

**Top Pushbutton Head**

**Side Push, Vertical Roller Head**

**Dimension "A"**

|                              |             |
|------------------------------|-------------|
| With 0.44 (11.2) dia. roller | 1.78 (45.2) |
| With 0.75 (19.1) dia. roller | 2.09 (53.1) |

**Type CX, CB and CBX Switches with Side Rotary Head**

**Adjustable Top Pushbutton Head**

**Wobble Operators**

**Notes**

- ① 1NO-1NC contacts must be same polarity when both circuits are used—1NO and 1NC contacts have isolated poles and may be used on opposite polarities.
- ② Dimension from centerline of head to mounting surface is 0.78 in (20 mm).
- ③ Center to mounting surface.

**Adjustable Side Pushbutton Head**

**Top Push Roller Head**

**Dimension "A"**

|                              |             |

### Special Purpose Limit Switches

#### Product Description

Special Purpose (Type F), Rotating Shaft (Type J), Pneumatic Time Delay (Type LP) and Precision and Cabinet Door Interlock (Type PS) Limit Switches from Eaton's electrical sector serve a variety of special purpose industrial applications for MRO and User Replacement requirements.

#### Features

- UL Listed
- CSA Certified (PS and J only)

#### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Product Selection

### Roller Lever Switches

#### Roller Lever

#### Type F Switches <sup>①</sup>

| Operator   | Circuit | Travel to Operate Contacts | Travel to Reset Contacts | Total Travel | Over-Travel | Catalog Number   |
|--|---------|----------------------------|--------------------------|--------------|-------------|------------------|
| Roller lever (CW and CCW operation, spring return) | 1NO-1NC | 40°                        | 35°                      | 65°          | 25°         | <b>10316H18</b>  |
|  | 2NO-2NC | 17°                        | 6°                       | 60°          | 43°         | <b>10316H320</b> |

### Rotating Shaft Switches

#### Type J

Rotating Shaft Limit Switches allow the shaft to be rotated a preset number of revolutions (adjustable from 1/2 to 100 with an accuracy of 1/20 of a turn) before the contacts will switch. A second set of

contacts will trip when reaching a preset limit in the opposite direction. These switches are typically used in crane and hoist applications to provide end of travel stops for the hook assembly.

#### Rotating Shaft

#### Type J Switches

| Shaft to Cam Ratio | Max. Turns to Trip Contacts | Min. Turns to Trip Contacts | Over-Travel Before Resetting Contacts | Reversal After Tripping to Reset Contacts | Circuit <sup>②</sup> | Enclosure Rating | Catalog Number               |
|--------------------|-----------------------------|-----------------------------|---------------------------------------|---|----------------------|------------------|------------------------------|
| 103:1              | 100 input shaft turns       | 1/2 input shaft turns       | 103 input shaft turns max.            | 1/8 input shaft turns min.                | 2NC                  | NEMA 1           | <b>10316H50</b>              |
|                    |                             |                             |                                       |   | 2NO-2NC <sup>③</sup> | NEMA 4           | <b>10316H54 <sup>③</sup></b> |

#### Notes

- ① Replacement operator head is available with part number **86-862-22**.  
Replacement roller lever is available with part number **24-1712**.  
Replacement key pin and washer for roller is available with part number **16-906**.
- ② For replacement NO contacts, order **17-1403**; NC contacts, order **17-702**.
- ③ 10316H54 has factory set circuits, but is easily convertible to any of three circuits (2NO-2NC, 4NO or 4NC). Full instructions enclosed with every switch.

#### Pneumatic Time Delay Switches

##### Pneumatic Time Delay

##### Type LP Switches

| Operator  | Total Travel | Pre-Travel | Circuit | Timed Contacts | Direction of Rotation <sup>②</sup> | Catalog Number    |
|---|--------------|------------|---------|----------------|------------------------------------|-------------------|

| Cabinet door interlock operator with two each of listed precision switches and with red (defeated <sup>③</sup> ) indicator | <b>10316H1029</b>                           | —   | —                               |

#### Notes

- ① Requires an operating lever, see **Page V8-T2-79**.
- ② Field convertible.
- ③ The plunger exposes a red band when pulled out to indicate that interlock is defeated.

#### Technical Reference

#### Limit Switches

2

Mechanical Limit Switches are contact sensors widely used for detecting the presence or position of objects in industrial applications.

Limit Switches offer high precision in terms of accuracy and repeatability. This is primarily due to the fact that they make direct contact with the target. When an object contacts the limit switch lever (or plunger) the lever moves a pre-travel distance to the operating point where the contacts are tripped. Movement of the lever beyond this point is called the over-travel.

Limit switches contain the following major components. These may be modular or part of a single-piece switch.

#### Limit Switch Components

#### Lever Type Actuator

Refer to Sensor Learning Course, **Page V8-T12-4**, for a complete description of limit switch terminology.

#### Actuator

This is the part of the switch that contacts the target. Typical actuators are levers and plungers. Several styles are available, see Sensor Learning Course, **Page V8-T12-4**, for more information.

#### Switch Body

This part contains the electrical contact mechanism. For complete information on electrical outputs, see Sensor Learning Course, **Page V8-T12-4**.

#### Terminals

The terminals are the point of connection for the wiring. These terminals may be on the body itself, or housed in a removable receptacle. The limit switch may also come equipped with a factory installed cable or pin-connector.

## Product Selection Guide

### E47 Precision Switches

#### Page V8-T2-6

##### Overview

Specified when accurate repeatability, choice of operating forces and travel characteristics and tightly controlled action of cam or target in space restricted areas are of prime importance. Cost effective and compact.

##### Applications

Overhead, folding and elevator doors, sliding gates, automated guided vehicles and commercial instrumentation

##### Product Features

Self-contained switches or with an enclosed cast housing for increased durability and conduit connection (1/2 in NPT)

High current capacity for power load switching and motor handling capability

Screw and solder terminations

Booted enclosed version shields actuators from debris

Mounting centers—1.0 in (25.4 mm), #8 screw size

##### Technical Data and Specifications

Mechanical life: 3,000,000 operations min.

Electrical life: 500,000 operations min.

Contact ratings—

NEMA A600, R300, AC-15, DC-13  
15A/20A, 125 or 250 Vac

Enclosure ratings—

Enclosed: NEMA 1

Construction—

Basic: Phenolic

Enclosed: Aluminum die cast

##### Approvals

UL® Recognized, E117028

UL tested to Canadian safety standards

RoHS Compliant

### Compact Prewired Switches

#### Page V8-T2-16

##### Overview

Designed to be a versatile, slim device for hard to fit applications where sealing integrity is required.

##### Applications

Machine tool, food processing and packaging

##### Product Features

Rugged aluminum alloy die cast housing

Sealed construction with enclosure ratings of NEMA 4, 6 and 13, IEC IP69K

Prewired with 3m of 18 AWG, AWM 2517, 300V cable

Stackable ridge for ganged operation

##### Technical Data and Specifications

Mechanical life: 10,000,000 operations min.

Electrical life: 200,000 operations  
30 operations min.

Contact ratings—

NEMA B300

Enclosure ratings—

NEMA 4, 6 and 13; IP67, IP69

Construction—

Aluminum alloy die cast

##### Approvals

UL Listed, E170645 (cable versions only)

UL tested to Canadian safety standards

CE

RoHS Compliant

### LS-Titan Miniature DIN Switches

#### Page V8-T2-21

##### Overview

Safety position switches with insulated plastic or rugged metal enclosures. Approved for worldwide safety application.

##### Applications

Automatic vending machines, electronic assembly machines, elevators and lifts, injection molding, packaging and safety applications

##### Product Features

Modular plug-in head and body components

Positive opening NC contacts for safety applications

Operating heads can be rotated 90 degrees to suit specific direction of operation

##### Technical Data and Specifications

Mechanical life: 8,000,000 operations

Contact ratings—

AC-15, 6A at 24V, 6A at 230/240V,

4A at 400/415V;

DC-13, 3A at 24V, 800 mA at 110V,

300 mA at 220V

Enclosure ratings—

IP66, IP67 (by model)

Construction—

Plastic or metal (by model)

##### Approvals

Safety function, IEC/EN 60947-5-1

TÜV-Rheinland certified (LSE models)

UL Listed, E29184

CSA Certified, 12528

CE

CCC

RoHS Compliant

### E49 Mini Metal Switches

#### Page V8-T2-43

##### Overview

Suitable for OEMs who require a small, cost-effective solution but cannot sacrifice durability and mechanical life as they would if they chose a plastic IEC style switch.

##### Applications

Automatic vending machines, electronic assembly machines, elevators and lifts, injection molding, packaging

##### Product Features

Pre-wired units with custom cable lengths available for high volume customers

"Fingerproof" terminals protect against accidental shock

Double-spring mechanism for contact reliability

Grounding terminal included

Captive screws on enclosure cover make wiring hassle-free

SPDT double break

##### Technical Data and Specifications

Contact ratings—

5A at 250 Vac

5A at 30 Vdc

Enclosure ratings—

IP65

Construction—

Zinc alloy

##### Approvals

UL Recognized, E117028

(Model E49G31C1P3 is not

UL Recognized)

CE

RoHS Compliant

### E49 Compact Metal Switches

Page V8-T2-49

#### Overview

Designed with high mechanical strength for harsh environments. The rugged Aluminum die cast construction provides reliable, oil-tight, waterproof and dustproof sealing for a variety of applications. Snap action 1NO-1NC contacts provide flexibility in design.

#### Applications

Packaging, material handling conveyors, end-of-travel and guarding operations, baler/compactor, industrial door lifts

#### Product Features

Rigid die cast switch housing  
Set position indicator plate for easy maintenance  
High mechanical strength  
Oiltight, waterproof and dustproof construction

#### Technical Data and Specifications

Mechanical life: 15,000,000 operations min.  
Electrical life: 500,000 operations min. at full load  
Contact ratings—  
NEMA A600, R300; AC-15, DC-13  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 12, 13; IP65, IP67  
Construction—  
Aluminum die cast

#### Approvals

UL Listed, E170645  
UL tested to Canadian safety standards  
RoHS Compliant

### E50 Heavy-Duty Plug-In Switches

Page V8-T2-53

#### Overview

Versatile in design. High reliability. Low maintenance costs with installation ease. BEST CHOICE for Heavy-Duty Limit Switch applications. Withstands physical and chemical abuse of harsh industrial environments.

#### Applications

Punch presses, waste water treatment, machine tool, automotive, retrieval systems, industrial truck, car wash lines

#### Product Features

Modular operating heads, switch bodies and receptacles are interchangeable without field adjustment  
Order as complete assemblies or components for stocking and manufacturing flexibility  
90 degree total travel, 5 degree pre-travel characteristics are standard features  
Viton® gasket, boot, and seal material offers exceptional chemical resistance  
Rotary head operating mode from CW, CCW or CW and CCW is easily changed without tools

#### Technical Data and Specifications

Mechanical life: 13,000,000 operations min.  
Electrical life: 1,000,000 operations min. at full load (single-pole)  
Contact ratings—  
NEMA A600, R300  
Lighted versions A150, R150  
6A, 120 Vac; 10A continuous  
Enclosure ratings—  
NEMA 1, 3, 3S, 4, 4X, 6, 6P, 13; IP67  
Construction—Zinc die cast

#### Approvals

UL Listed, E170645  
CSA Certified, 50513  
CE (some models)  
RoHS Compliant

### E50 Heavy-Duty Factory Sealed 6P+ Switches

Page V8-T2-67

#### Overview

Designed specifically to withstand the penetrating properties of new cutting fluids (coolants), acid or caustic washes, salt spray, severe vibration, shock and temperature fluctuations, grit and debris.

#### Applications

Automotive, pulp and paper, food processing, waste management, primary metals, machine tool (cutting, forming, bending)

#### Product Features

Tamperproof, one-piece switch body assembly, epoxy filled  
Factory sealed. 6P submersible. Pre-wired with cable, pigtail or pin connector options. All with ground connection  
Utilizes E50 modular operating heads  
Special V-seal on switch body/head connection provides hermetic barrier against fluid ingress  
LED indicating light, 24V–120 Vac/dc neon version too

#### Technical Data and Specifications

Mechanical life: 35,000,000 operations min.  
Electrical life: 1,000,000 operations min. at full load  
Contact ratings—  
NEMA A600, R300  
Lighted versions A150, R150  
6A, 120 Vac; 10A continuous  
Enclosure ratings—  
NEMA 1, 2, 3, 3S, 4, 4X, 6, 6P, 13; IP67, IP69  
Construction—Zinc die cast

#### Approvals

UL Listed, E170645  
CSA Certified, 50513  
CE (some models)  
RoHS Compliant

### Operators

Page V8-T2-79

#### Overview

Wide variety of operator types for rotary and wobble style limit switches.

#### Applications

Used with E50, E50 6P+ and 10316 limit switches

#### Product Features

Rollers and rods available in metal and nonmetal contact surfaces

#### Technical Data and Specifications

Varies by model

#### Approvals

Varies by model

## Non Plug-In Switches

### Page V8-T2-87

#### Overview

The Industrial standard for Non Plug-In Heavy-Duty Limit Switches. Sold as complete assembled units only.

#### Applications

Serving MRO and USER replacement requirements with broad d market coverage

#### Product Features

Side and top rotary, side and top push or wobble operation  
 CW, CCW or CW and CCW operating modes are field convertible  
 Double break-make snap action contacts, same polarity each pole  
 Captive saddle clamp terminals accept up to #12 wire  
 Head can be mounted in any of four discrete positions, intervals of 90 degrees

#### Technical Data and Specifications

Mechanical life: 10,000,000 operations min.  
 Electrical life: 500,000 operations at full load  
 Contact ratings—NEMA A600, R300 6A, 120 Vac; 10A continuous  
 Enclosure ratings—NEMA 1, 4, 13  
 Construction—  
 Zinc die cast

#### Approvals

UL Listed, E170645  
 CSA Certified, 50513

## Hazardous Location Switches

### Page V8-T2-90

#### Overview

Designed for severe environmental service in locations where there exists a danger of an internal or external explosion of flammable gases, vapors, metal alloy or grain dust.

#### Applications

Mining, metal cutting, grain storage, forest products, petrochemical, waste and sewage management, pharmaceutical

#### Product Features

Sealed and unsealed versions available  
 One-way gasket on sealed version keeps liquids out, yet allows a harmless release of gases in the event of an internal explosion  
 Silicon bronze housing provides excellent corrosion resistant properties in extreme NEMA 4X applications  
 Temperature build-up on limit switch surface is dissipated by housing design and materials used  
 Utilizes the operating heads and internal switch mechanisms of the 10316 Non Plug-In line

#### Technical Data and Specifications

NEMA 7, Div. 1, Class I, BCD  
 NEMA 9, Div. 1, Class II, EFG  
 Contact ratings—NEMA B600 3A, 120 Vac; 5A continuous  
 Enclosure ratings—LX: NEMA 7, 9  
 CX: NEMA 1, 4, 7, 9  
 CB: NEMA 1, 4, 4X, 13  
 CBX: NEMA 1, 4, 4X, 7, 9, 13  
 Construction—LX, CX: Aluminum die cast  
 CB, CBX: Silicon bronze

#### Approvals

UL Listed, E170645, E183975  
 UL tested to Canadian safety standards

## Special Purpose Switches

### Page V8-T2-94

#### Overview

Variety of special function limit switch products.

#### Applications

Serving MRO and USER replacement requirements with broad market coverage

#### Product Features

Special function switch lines include:  
 Cabinet door interlocks — when plunger is pulled out, red band indicator visually shows that interlock is defeated  
 Precision switches—1NO-1NC, 2NO-2NC, or operator only. Variety of mounting brackets available  
 Pneumatic time delay—ON delay and OFF delay. Timing range—0.05 to 60 seconds  
 Rotating cam shaft switches

#### Technical Data and Specifications

See **Page V8-T2-97** for more information  
 Enclosure ratings—  
 NEMA 1 or NEMA 4 versions  
 Construction—  
 Zinc die cast  
 PS: Phenolic

#### Approvals

UL Listed, E170645  
 CSA Certified, 50513 (PS and J only)

## Limit Switches

### E47 Precision Switches

#### E47 Precision Switches

2

### E47 Precision Switches

#### Product Description

E47 Precision Switches from Eaton's electrical sector provide high accuracy switching at an affordable price. A variety of standard features, such as current capacity, operating force, travel characteristics and actuators, lets you custom fit the switch to your application.

The switches are available in their compact basic form, or enclosed in a rugged, metal housing.

#### Features

- Compact housings are ideal for use where space is restricted
- Precision, snap-action operators provide accurate repeatability of electrical and mechanical operating characteristics
- High current capacity (up to 20A) allows power load switching and motor handling capability
- Enclosed booted versions shield actuators from debris

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

| 90°<br> | Terminal wire cover with 90° conduit interface | E47PA2         |

## Technical Data and Specifications

### E47 Precision Switches

| Description                               | Specification  |
|---|--|
| Operating speed                           | 0.01m/second to 1m/second  |
| <b>Operating Frequency</b>                |  |
| Mechanical                                | 120 operations/minute  |
| Electrical                                | 20 operations/minute   |
| Mechanical life                           | 3,000,000 operations minimum   |
| Electrical life                           | 500,000 operations minimum   |
| Contact resistance                        | 15M ohms maximum, initial  |
| Insulation resistance                     | 100M ohms minimum at 500 Vdc   |
| <b>Dielectric Strength</b>                |  |
| Between non-current carrying parts        | 1000 Vac, 50/60 Hz for 1 minute  |
| Between current carrying parts and ground | 2000 Vac, 50/60 Hz for 1 minute  |
| <b>Ambient Operating Temperature</b>      |  |
| Basic                                     | -13° to 176°F (-25° to 80°C)   |
| Enclosed                                  | 5° to 176°F (-15° to 80°C)   |
| Environmental rating enclosed, booted     | NEMA 1   |
| Mounting centers                          | 1.0 in (25.4 mm), #8 screw size  |
| Terminal screws                           | Bottom facing M4 x 0.7<br>Screws with cup washers will accept 22–12 AWG (2.5 sq. mm maximum)<br>Maximum torque: 10 in-lbs. |
| Threaded bushing                          | 15/32 in   |
| Material of construction                  | Mineral filled phenolic  |
| Enclosure rating                          | Aluminum die casting (ADC-3/A380); Seal boot: nitrile, butyl rubber (NBR)  |
| Conduit fitting on enclosed type          | 1/2 in NPT   |

#### Terminal Configurations

(Spade type not shown, available on some models)

#### Notes

- ① Inductive load has a power factor of 0.04 minimum (AC) and a time constant of 7 m/second (DC).
- ② Lamp load has an inrush current of six times steady-state current.

## E47 Precision Switch Specifications—15 A

### Compact Prewired Switches

#### Product Description

The E47 Compact Prewired Limit Switch by Eaton's electrical sector is designed to be a versatile, slim device for hard to fit applications where sealing integrity is required. The rugged die cast aluminum alloy housing, cable connection and switch mechanism are encapsulated for protection against contaminants, moisture, shock and vibration. This factory wired (3m) device has NEMA® enclosure ratings of 4, 6 and 13, making it suitable for applications such as machine tool, food processing and packaging.

#### Features

- Rugged aluminum alloy die cast housing
- Sealed construction with enclosure ratings of NEMA 4, 6 and 13
- Prewired with 3m of 18 AWG, AWM 2517, 300V cable, or micro-connector version also available
- Stackable ridge for ganged operation

#### Standards and Certifications

- UL Listed, E170645 (cable versions only)
- UL tested to Canadian safety standards
- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

LS-Titan Miniature DIN Switches

Product Description

Eaton’s LS-Titan™ limit switch line is a complete offering of safety position switches designed for worldwide application. Economical insulated plastic or rugged metal enclosures and modular, plug-in operating heads and bodies make LS-Titan a flexible switching solution.

A highlight of the LS-Titan switch line is the world’s first electronic position switch (LSE models). These switches feature freely programmable operating points that can be set individually at any time. Additional LSE models provide analog outputs proportional to the actuator position.

LS-Titan switches are suitable for use in safety applications designed to protect persons or processes.

Features

- Modular, plug-in system (head and body components)
- Positive opening NC contacts for safety applications
- Wide variety of economical plastic and rugged metal versions available
- Operating heads can be rotated 90 degrees to suit specific direction of operation
- Unique electronic safety position switches (LSE models) provide 0–10 Vdc outputs proportional to the actuator position and allow for easy configuration of a custom trip point
- Can be ordered as separate components (head and body) or as completely assembled switches
- Screw and Cage Clamp® (standard on LSE models and optionally available on mechanical models) connections provide larger wiring areas for easier installation
- Approved for worldwide application

Standards and Certifications

- Safety function by positive opening contacts per IEC/EN 60947-5-1
- TÜV-Rheinland Certified for Functional-Safety (LSE models)
- UL Listed, E29184
- CSA Certified, 12528
- RoHS Compliant
- CE
- CCC

**Note:** Cage Clamp is a registered trademark of Wago Kontakttechnik, 32423 Minden, Germany.

## Product Identification

2

## Notes

- ① **Basic device** (see Pages V8-T2-23 to V8-T2-31)  
According to EN 50047  
With screw-on cover  
Contacts: 1NO-1NC, 2NO, 2NC  
Cage Clamp, screw terminal  
As snap-action or standard-action switch  
As electronic snap-action switch (individually adjustable)  
As 0–10 Vdc analog signal encoder
- ② **Fixing adapter** (see Page V8-T2-33)  
Allows mounting of M22 pushbuttons
- ③ **Roller lever** (see Pages V8-T2-23 and V8-T2-26)  
For one-sided operation with higher operating speed
- ④ **Angled roller lever** (see Pages V8-T2-23, V8-T2-26 and V8-T2-30)  
For actuation along the unit axis
- ⑤ **Rotary lever** (see Pages V8-T2-23, V8-T2-27 and V8-T2-30)  
For actuation from the side, for pendulum movements
- ⑥ **Roller plunger** (see Pages V8-T2-23, V8-T2-26 and V8-T2-30)  
For actuation from the side with low actuating force
- ⑦ **Adjustable roller lever** (see Pages V8-T2-24, V8-T2-27, V8-T2-28 and V8-T2-30)  
For length adjustment as required
- ⑧ **Actuating rod** (see Pages V8-T2-25, V8-T2-29 and V8-T2-31)  
On conveyor belts for lightweight goods
- ⑨ **Spring-rod** (see Pages V8-T2-25, V8-T2-29 and V8-T2-31)  
For flexible actuation from all sides
- ⑩ **Actuating rod** (see Pages V8-T2-25, V8-T2-29 and V8-T2-31)  
Withdrawable mechanism from front
- ⑪ Pushbuttons from the M22 family; see M22 catalog (CA04716001E) or [www.eaton.com/m22](http://www.eaton.com/m22)

## Limit Switches

### LS-Titan Miniature DIN Switches

2

#### Understanding LS-Titan Electronic Safety Position Switches

All three LS-Titan LSE switch bodies are safety-rated products. The LSE-11 and LSE-02 switch bodies both have a freely programmable operating point and can be individually adjusted to suit the application, and can be changed as often as required. These devices feature an LED on the body, providing simple indication during programming and operation.

The LSE-AU (0–10 V) analog position switch takes position data and converts to an analog current or voltage value that can then be continuously fed into an automation system. The LSE-AU also features a diagnostic output for additional data processing.

This ensures that a safe operating state can be monitored and evaluated at any time. A self-test function is also present on these models. Outputs Q1 and Q2 are continuously tested for overloads, short circuits to 0V and short circuits to +U<sub>e</sub>.

Like the electromechanical position switches, LS-Titan electronic position switches meet Category 3 or 4 of the EN 954-1 standard for machine safety when configured as a redundant system. All devices are thus suitable for safety applications that are used for the protection of persons or processes.

#### Operating Point Adjustment

##### LSE-11

##### LSE-02

#### Example of LS-Titan LSE Models in a Safety-Oriented Circuit

#### Notes

LSE-11 and LSE-02—individual operating point adjustment.

LSE-11 and LSE-02 can be used in safety circuits.

S1 is connected to 24 Vdc

S2, S3 each switch with a delay of 0.7s

R1, R2, for example, series element M22-XLED60 (2820 ohms/0.5W)

**E49 Mini Metal Switches**

**Product Description**

E49 Mini Metal Limit Switches from Eaton’s electrical sector are designed small and tough, with machinery OEMs in mind. The small size, metal body and mechanical life make this product perfect for switching applications in packaging, material handling, elevators and lifts, electronic assembly equipment, injection molding machinery, and auto-vending machines. The E49 Mini Metal is the ideal switch for those who need a cost-effective, compact solution, but don’t want to sacrifice durability in the process.

**Features**

- Long life—rated for 10 million operations
- Pre-wired units with custom cable lengths available for high volume customers
- “Fingerproof” terminals protect against accidental shock
- Double-spring mechanism for contact reliability
- Grounding terminal included
- Captive screws on enclosure cover make wiring hassle-free
- SPDT double break

**Standards and Certifications**

- UL Recognized, E117028 (Model E49G31C1P3 is not UL Recognized)
- CE
- RoHS Compliant

**⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### E49 Mini Metal Switches

| Description                   | Specification   |
|-------------------------------|---|
| Operating speed               | 0.19 in (5 mm) to 19.7 in/s (50 cm/s)   |
| Operating frequency           | 120 operations/min  |
| Contact resistance            | 25M ohms (initial)  |
| Insulation resistance         | 100M ohms min (at 500 Vdc)  |
| Dielectric strength           | 1000 Vac, 50/60 Hz for one minute between non-continuous terminals  |
|                               | 1500 Vac, 50/60 Hz for one minute between current-carrying and non-current-carrying parts and between each terminal and ground                |
| Vibration                     | 10 to 55 Hz, 1.5 mm double amplitude  |
| Shock                         | Approx. 300 m/s <sup>2</sup> (approx. 30Gs)   |
| Ambient operating temperature | 23° to 149°F (–5° to 65°C)  |
| Humidity                      | 95% RH max.   |
| Service life                  | Mechanical: 10,000,000 operations min.  |
|                               | Electrical: 500,000 operations min.   |
| Weight                        | Approx. 130 to 190g   |
| Degree of protection          | IEC: IP65   |
| Material of construction      | Shaft: stainless SUS303<br>Arm: stainless SUS304<br>Head and body: zinc alloy<br>Terminal cover: PC/ABS plastic<br>Rubber grommet: NBR rubber |

**E49 Compact Metal Switches**

**Product Description**

E49 Compact Metal Switches by Eaton’s electrical sector are designed with high mechanical strength for harsh environments. The rugged aluminum die cast construction provides reliable, oil-tight, waterproof and dustproof sealing for a variety of applications. Snap action 1NO-1NC contacts provide flexibility in design.

**Features**

- Rigid die cast switch housing
- High mechanical strength
- Oil-tight, waterproof and dustproof construction

**Standards and Certifications**

- UL Listed, E170645
- UL tested to Canadian safety standards
- RoHS Compliant

**⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## E50 Heavy-Duty Plug-In Switches

## E50 Heavy-Duty Plug-In Switches

## Product Description

E50 Modular Plug-In Limit Switch Components from Eaton's electrical sector are the industry standard with versatility of design and high reliability for low maintenance, installation and inventory costs. Standard Viton gaskets, seals and boots and a zinc die cast enclosure provide exceptional chemical resistance to the common coolants, cleansing agents, and hydraulic fluids found in machine tool, automotive, waste water treatment and other heavy-duty industrial applications. Mounting dimensions accommodate both U.S. and DIN standards for easy retrofit installations. Super bright 24–120 Vac/dc LED indicating light versions simplify setup and troubleshooting operations.

## Features

- Modular, plug-in components (head, body and receptacle) provide application flexibility, reduced inventory and less downtime
- Manufactured to take the physical and environmental abuse (including cutting fluids and chemicals) of harsh industrial environments
- Chemical resistant Viton gaskets, seals and boots are standard, and so are captive, posi-drive screws
- The switches have terminal identification on the nameplate for a visual wiring checkout without guesswork. Heads and switch bodies can be replaced without rewiring
- E50 devices can be ordered in separate components or as complete assembled switches
- 600V rating, ridge-topped contacts and wiping action assure continuity even to logic level circuits
- Keyed, four direction head positioning
- Standard 5° pre-travel and 90° total travel
- 24–120 Vac/dc LED and 120 Vac neon indicating lights available
- Rotary heads are field convertible CW, CCW, or both, without special tools
- Epoxy filled, pin connector or pigtail pin connector receptacles available

## Standards and Certifications

- UL Listed, E170645
- CSA Certified, 50513
- CE (where shown)
- RoHS Compliant

**⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. #### Notes

- ① Temperature ranges below 32°F (0°C) are based on absence of freezing moisture or water.
- ② CW (clockwise) and CCW (counterclockwise) operation, easily convertible to CW only or CCW only operation.
- ③ For CW and CCW operation. For CW only or CCW only operation, high temperature limit increases to 250°F (121°C) without cable, and 221°F (105°C) with pre-wired cable.
- ④ Roller can be converted in the field between horizontal and vertical.
- ⑤ Roller shaft is 0.38 in (9.5 mm) longer on E50DS4, see Dimensions on [Page V8-T2-65](#).

## E50 Heavy-Duty Factory Sealed 6P+ Switches

## Product Description

E50 6P+ Limit Switches by Eaton's electrical sector were specifically designed to withstand the penetrating properties of cutting fluids and coolants, such as those used in the automotive industry, as well as extreme shock, vibration and temperature fluctuations. The one-piece, epoxy filled switch body is prewired at the factory to ensure leak-proof, submersible performance. This unique construction positively stops fluid from finding its way to any and all critical connections.

Our 6P+ switches can be ordered in separate components or as complete assembled devices. They are available with prewired 16 AWG cables or mini-connectors. Standard and custom cable lengths are available. As part of the E50 line, the 6P+ switches use the same operating heads as the standard E50 plug-in models to reduce the components you need to inventory.

## Features

- Manufactured to take the physical and environmental abuse (including cutting fluids and chemicals) of harsh industrial environments
- Modular, plug-in components (head and switch body) provide application flexibility, reduced inventory and less downtime
- Chemical resistant Viton gaskets, seals and boots are standard, and so are captive, posi-drive screws
- A special internal seal on the switch body prevents fluid from entering even when the operating head is not attached
- 600V rating, ridge-topped contacts and wiping action assure continuity even to logic level circuits
- Factory wired cable features a 350 pound pullout capacity
- Keyed, four direction head positioning. Standard 5° pre-travel and 90° total travel
- 24–120 Vac/dc LED and 120 Vac neon indicating lights available
- Rotary heads are field convertible CW, CCW, or both, without special tools

## Standards and Certifications

- UL Listed, E170645
- CSA Certified, 50513
- CE (where shown)
- RoHS Compliant

**⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

① Connection options (add the code suffix from the table below to the end of the catalog number):

| Option           |                                    | Catalog Number | Code Suffix  |
|------------------|------------------------------------|----------------|--------------|
| Mini-connector ④ | Single-pole (5-pin mini-connector) | CSMS5D5CY1602  | C            |
|                  | Two-pole (9-pin mini-connector)    | CSMS9D9CY1602  | C            |
| Cable connection | 12 ft cable length (standard)      | —              | 12           |
|                  | 20 ft cable length (standard)      | —              | 20           |
|                  | Other lengths (special order)      | —              | Length in ft |

② For operating head specifications, see Page V8-T2-71.

③ CW (clockwise) and CCW (counterclockwise) operation, easily convertible to CW only or CCW only operation.

④ For a full selection of connector cables, see Tab 10, section 10.1.

Connection is by 8 ft cable ①.

**Notes**

- ① Temperature ranges below 32°F (0°C) are based on absence of freezing moisture or water.
- ② CW (clockwise) and CCW (counterclockwise) operation, easily convertible to CW only or CCW only operation.
- ③ For CW and CCW operation. For CW only or CCW only operation, high temperature limit increases to 250°F (121°C) without cable, and 221°F (105°C) with pre-wired cable.
- ④ Roller can be converted in the field between horizontal and vertical.
- ⑤ Roller shaft is 0.38 in (9.5 mm) longer on E50DS4, see Dimensions on [Page V8-T2-77](#).

**Operators**

**Product Description**

The Operators presented here are used with Eaton’s E50 Plug-In and 6P+ limit switches, as well as our 10316 rotary type limit switches. A wide variety of styles and sizes are available to provide optimum performance for nearly any application.

**Features**

- Wide variety of operator types for rotary and wobble style limit switches
- Rollers and rods available in metal and nonmetal contact surfaces

 **DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Product Selection

2

## Roller Type Operators

For rotary head switches: E50 Plug-In, E50 6P+, and 10316.

**Note:** Only operators with Nylatron rods or rollers should be used with explosion-proof limit switches.

## Operators—Roller Type

| Roller Type  | Minimum Required Return Torque <sup>①</sup>     | Approximate Dimensions in Inches (mm) |                      |                   |             |            |             | Catalog Number |                 |

#### Notes

- ① **Caution:** When selecting lever, the minimum required return torque of lever should not exceed minimum return force available in operating head as given in operating head specifications.
- ② Length from the operating shaft axis to the roller axis (or to the tip for non-roller operators).
- ③ Maximum length dimension between operating shaft axis to roller axis for comparison. Precision adjustable to lesser dimensions.
- ④ Applies when lever is extended to the maximum dimension.
- ⑤ By reassembling lever, minimum length can be reduced another 0.5 in (12.7 mm).
- ⑥ High-grade stainless steel.

**Rod Type Operators**

For rotary head switches: E50 Plug-In, E50 6P+, and 10316.

2

**Note:** Only operators with Nylatron rods or rollers should be used with explosion-proof limit switches.

**Dimensions, see Page V8-T2-86.**

**Notes**

- <sup>①</sup> **Caution:** When selecting lever, the minimum required return torque of lever should not exceed minimum return force available in operating head as given in operating head specifications.
- <sup>②</sup> Length from the operating shaft axis to tip.
- <sup>③</sup> Applies when lever is extended to the maximum dimension.

**Wobble Type Operators**

For E50DW1 and E50DWZ Operator Heads on E50 Plug-In and E50 6P+ Switches.

**Note:** Only operators with Nylatron rods or rollers should be used with explosion-proof limit switches.

## Non Plug-In Switches

## Non Plug-In Switches

## Product Description

10316 Type L non plug-in limit switches by Eaton's electrical sector are sold as completely assembled devices only, with a wide array of operating head configurations. All switches are single-pole 1NO-1NC.

## Features

- Side and top rotary, side and top push or wobble operation
- CW, CCW or CW and CCW operating modes are field convertible
- Double break-make snap action contacts, same polarity each pole
- Captive saddle clamp terminals accept up to #12 wire
- Head can be mounted in any of four discrete positions, intervals of 90°

| 4.5 (114.3)               | 0.25 (6.4) | 0.81 (20.6) |

**Notes**

- ① Ranges below 32°F (0°C) are based on absence of freezing moisture or water.
- ② Contacts must be same polarity when both circuits are used.
- ③ Dimension from centerline of head to mounting surface is 0.78 in (20 mm).
- ④ Center to mounting surface.

#### Hazardous Location Limit Switches

2

### Hazardous Location Limit Switches

#### Product Description

Type LX, CX and CBX limit switches by Eaton's electrical sector are designed for extreme environmental service in NEMA 7–9 locations where the danger of an internal or external explosion of flammable gases, vapors, metal alloy or grain dust exists. Type CB provides excellent corrosion resistant properties in NEMA 4X applications. Markets served include mining, grain storage, forest products, petrochemical, pharmaceutical and waste and sewage management.

#### Features

- Sealed and unsealed versions available
- One-way gasket on sealed version keeps liquids out, yet allows a harmless release of gases in the event of an internal explosion
- Silicon bronze housing provides excellent corrosion resistant properties in extreme NEMA 4X applications
- Temperature buildup on limit switch surface is dissipated by housing design and materials used
- Utilizes the operating heads and internal switch mechanisms of the 10316 L non plug-in line

#### Note

① Not rated for explosive locations.

**DANGER**  
**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Notes

- ① Contact Eaton's Sensor Applications Engineering at 1-800-426-9184 for replacement contact blocks.
- ② For operating levers, see **Page V8-T2-79**. Only levers with Nylatron rods or rollers should be used with explosion-proof limit switches.
- ③ Field convertible to clockwise only or counterclockwise only operation.
- ④ 1NO-1NC contacts must be same polarity when both circuits are used—1NO and 1NC contacts have isolated poles and may be used on opposite polarity.
- ⑤ Neutral position switches operate one circuit in each direction.

Complete Assembled Switches with Spring Return Heads, continued <sup>①</sup>

## Technical Data and Specifications

## Hazardous Location Limit Switches

| Description                   | Specification   |
|-------------------------------|---|
| Material of construction      |   |
| LX, CX                        | Cast aluminum die cast  |
| CB, CBX                       | Silicon bronze  |
| Conduit entrance              |   |
| LX                            | 1/2 in pipe tap   |
| CB, CBX, CX                   | 3/4 in pipe tap   |
| Mounting                      | Surface mount   |
| Enclosure rating              |   |
| LX, CX, CBX                   | NEMA 7 Div. 1, Class I BCD; NEMA 9 Div. 1, Class II, EFG <sup>④</sup> |
| CB, CBX                       | NEMA 1, 4, 4X, 13 <sup>④</sup>  |
| CX                            | NEMA 1, 4, 13 <sup>④</sup>  |
| Ambient operating temperature | -20° to 200°F (-29° to 93°C) <sup>⑤</sup>                             |
| Approximate shipping weight   |   |
| LX                            | 2 lbs   |
| CX                            | 2.5 lbs   |
| CB, CBX                       | 6 lbs   |

## Notes

- ① Contact Eaton's Sensor Applications Engineering at 1-800-426-9184 for replacement contact blocks.
- ② 1NO-1NC contacts must be same polarity when both circuits are used—1NO and 1NC contacts have isolated poles and may be used on opposite polarity.
- ③ Travel with force applied at one-in (25.4 mm) radius. Applied at end of operator, travel is approximately 14.
- ④ A conduit seal-off kit is required for these switches
- ⑤ Ranges below 32°F (0°C) are based on absence of freezing moisture or water.

### Special Purpose Limit Switches

#### Product Description

Special Purpose (Type F), Rotating Shaft (Type J), Pneumatic Time Delay (Type LP) and Precision and Cabinet Door Interlock (Type PS) Limit Switches from Eaton's electrical sector serve a variety of special purpose industrial applications for MRO and User Replacement requirements.

#### Features

- UL Listed
- CSA Certified (PS and J only)

#### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Product Selection

### Roller Lever Switches

#### Roller Lever

#### Type F Switches <sup>①</sup>

| Operator   | Circuit | Travel to Operate Contacts | Travel to Reset Contacts | Total Travel | Over-Travel | Catalog Number   |
|--|---------|----------------------------|--------------------------|--------------|-------------|------------------|
| Roller lever (CW and CCW operation, spring return) | 1NO-1NC | 40°                        | 35°                      | 65°          | 25°         | <b>10316H18</b>  |
|  | 2NO-2NC | 17°                        | 6°                       | 60°          | 43°         | <b>10316H320</b> |

### Rotating Shaft Switches

#### Type J

Rotating Shaft Limit Switches allow the shaft to be rotated a preset number of revolutions (adjustable from 1/2 to 100 with an accuracy of 1/20 of a turn) before the contacts will switch. A second set of

contacts will trip when reaching a preset limit in the opposite direction. These switches are typically used in crane and hoist applications to provide end of travel stops for the hook assembly.

#### Rotating Shaft

#### Type J Switches

| Shaft to Cam Ratio | Max. Turns to Trip Contacts | Min. Turns to Trip Contacts | Over-Travel Before Resetting Contacts | Reversal After Tripping to Reset Contacts | Circuit <sup>②</sup> | Enclosure Rating | Catalog Number               |
|--------------------|-----------------------------|-----------------------------|---------------------------------------|---|----------------------|------------------|------------------------------|
| 103:1              | 100 input shaft turns       | 1/2 input shaft turns       | 103 input shaft turns max.            | 1/8 input shaft turns min.                | 2NC                  | NEMA 1           | <b>10316H50</b>              |
|                    |                             |                             |                                       |   | 2NO-2NC <sup>③</sup> | NEMA 4           | <b>10316H54 <sup>③</sup></b> |

#### Notes

- ① Replacement operator head is available with part number **86-862-22**.  
Replacement roller lever is available with part number **24-1712**.  
Replacement key pin and washer for roller is available with part number **16-906**.
- ② For replacement NO contacts, order **17-1403**; NC contacts, order **17-702**.
- ③ 10316H54 has factory set circuits, but is easily convertible to any of three circuits (2NO-2NC, 4NO or 4NC). Full instructions enclosed with every switch.

#### Pneumatic Time Delay Switches

##### Pneumatic Time Delay

##### Type LP Switches

| Cabinet door interlock operator with one precision switch and with red (defeated <sup>③</sup> ) indicator                  | <b>10316H1028</b>                           | <b>10316H2042</b>                           | <b>10316H150</b>                |
| Cabinet door interlock operator with two each of listed precision switches and with red (defeated <sup>③</sup> ) indicator | <b>10316H1029</b>                           | —   | —                               |

#### Notes

- ① Requires an operating lever, see **Page V8-T2-79**.
- ② Field convertible.
- ③ The plunger exposes a red band when pulled out to indicate that interlock is defeated.

## Technical Data and Specifications

### Special Purpose Limit Switches

| Description                                    | Specification  |
|--|--|
| <b>Roller Lever Switches – Type F</b>          |  |
| Enclosure rating                               | NEMA 4   |
| Operating temperature                          | 0° to 180°F (–18° to 82°C)   |
| Conduit entrance                               | 0.5 in NPT   |
| Shipping weight                                | 4.0 lbs  |
| <b>Rotating Shaft Switches – Type J</b>        |  |
| Shipping weight                                |  |
| NEMA 1 models                                  | 5.5 lbs  |
| NEMA 4 models                                  | 13 lbs   |
| <b>Pneumatic Time Delay Switches – Type LP</b> |  |
| Timing range                                   | 0.05 to 60 seconds   |
| ON delay function                              | Timing begins when lever is actuated and held  |
| OFF delay function                             | Timing begins when lever is released   |
| Repeat accuracy <sup>①</sup>                   | With 15 second or higher interval between timing periods: ±10% of setting maximum<br>With less than 15 second interval between timing periods: ±25% of setting maximum |
| Operating frequency                            | 250 operations per minute maximum  |
| Enclosure rating                               | NEMA 4, 13   |
| Ambient operating temperature                  | 32° to 150°F (0° to 65°C)  |
| Conduit entrance                               | 0.5 in NPT   |
| Shipping weight                                | 2 lbs  |

### Type F – Maximum Ampere Ratings

| Circuit | State | AC Volts |     |     |     | DC Volts |     |      |
|---------|-------|----------|-----|-----|-----|----------|-----|------|
|         |       | 120      | 240 | 480 | 600 | 120      | 240 | 600  |
| 1NO-1NC | Make  | 60       | 30  | 20  | 15  | —        | —   | —    |
|         | Break | 6        | 3   | 1.5 | 1.2 | 2.2      | 1.1 | 0.40 |
| 2NO-2NC | Make  | 40       | 20  | 10  | 8   | —        | —   | —    |
|         | Break | 15       | 10  | 6   | 5   | 0.5      | 0.2 | 0.02 |

### Type J – Maximum Ampere Ratings

| State                   | AC Volts |     |     |     | DC Volts |     |     |
|-------------------------|----------|-----|-----|-----|----------|-----|-----|
|                         | 120      | 240 | 480 | 600 | 120      | 240 | 600 |
| Make                    | 60       | 30  | 15  | 12  | 2.2      | 1.1 | —   |
| Break                   | 6        | 3   | 1.5 | 1.2 | 2.2      | 1.1 | —   |
| Continuous <sup>①</sup> | 10       | 10  | 10  | 10  | 10       | 10  | —   |

**Note**

<sup>①</sup> To maintain operating accuracy during the timing cycle, the switch lever must be faster than the timed setting.

# 2.11

## Limit Switches
