### Technical Reference

#### Inductive Proximity Sensors

3

#### General

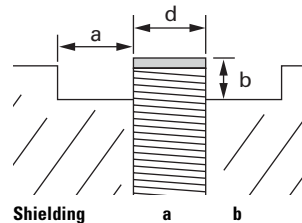

There are a number of factors which should be considered when applying induction proximity sensors. A detailed discussion of these factors can be found on **Page V8-T12-4**. Presented below are a few of the more important considerations for quick reference.

#### Mounting

Inductive proximity sensors are available in two classifications: shielded (also known as embeddable or flush mountable) and unshielded (non-embeddable or non-flush mountable). What these terms refer to is the distance to surrounding metal that the device can be mounted. In the case of a shielded sensor the device can be mounted with the sensor completely surrounded by metal.

In the case of an unshielded sensor, a metal free zone must be provided when mounting the sensor. The size of the metal free zone is dependent on both the size of the sensor and the type of sensing range it has, for example, standard or extended.

#### Mounting Ranges

| Shielding             | a      | b          |
|-----------------------|--------|------------|
| <b>Standard Range</b> |        |            |
| Shielded              | 0      | 0          |
| Unshielded            | 2 x Sn | Cap height |
| <b>Extended Range</b> |        |            |
| Semi-shielded         | Sn     | d          |
| Non-embeddable        | 2 x Sn | Cap height |

Where **a** and **b** are the metal free dimensions.

When mounting the sensors, do not exceed the following recommended torque specifications.

#### Torque Specifications

|                       | Stainless Steel   | Nickel-Plated Brass |
|-----------------------|-------------------|---------------------|
| <b>12 mm Diameter</b> |                   |                     |
|                       | 35 lb-in (4.0 Nm) | 20 lb-in (2.3 Nm)   |
| <b>18 mm Diameter</b> |                   |                     |
|                       | 70 lb-in (7.9 Nm) | 70 lb-in (7.9 Nm)   |
| <b>30 mm Diameter</b> |                   |                     |
|                       | 70 lb-in (7.9 Nm) | 70 lb-in (7.9 Nm)   |

### Extended Range Sensors

Extended range proximity sensors by Eaton’s Electrical Sector offer sensing distances almost three times greater than conventional devices. They are available in semi-shielded designs: mounted similar to an embeddable sensor—and non-embeddable designs requiring more metal free zone area than conventional unshielded sensors. All are available in a variety of circuits and terminations.

### Target Material

When manufacturers of inductive proximity sensors state the sensing range of their devices, they are usually based upon a ferrous target made of carbon-rolled steel (IE FE 360) defined by ISO630. For example, in this product guide the E57P-18SPN5-C2 has a sensing range of 5 mm based upon a target of mild steel.

Sensing ranges to targets made of non-ferrous metals have to have a correction factor applied as listed in the table below. To use this table, multiply the sensing distance of the device by the factor given.

Example: The E57P-18SPN5-C2 has a sensing range of 5 mm. When used to sense a brass target, the sensing range becomes 2.25 mm (5 mm x 0.45).

### Table of Correction Factors

Multiply sensing range of device by factor given below.

#### Correction Factors

| Target              | Sensor Size |       |       |       | Limit Switch |
|---------------------|-------------|-------|-------|-------|--------------|
|                     | 4–8 mm      | 12 mm | 18 mm | 30 mm |              |
| Stainless steel 400 | 0.90        | 0.90  | 1.0   | 1.0   | 1.0          |
| Stainless steel 300 | 0.65        | 0.70  | 0.70  | 0.75  | 0.85         |
| Brass               | 0.35        | 0.45  | 0.45  | 0.45  | 0.5          |
| Aluminum            | 0.35        | 0.40  | 0.45  | 0.40  | 0.47         |
| Copper              | 0.30        | 0.25  | 0.35  | 0.30  | 0.40         |

### Target Size

Often overlooked when applying sensors is the fact that the manufacturer’s stated sensing ranges are also dependent upon target size. The table below reflects the standard target sizes which were used to determine sensing ranges.

If targets are the same size or greater than standard, no reduction in sensing distance will occur. However, a smaller target size will result in a decrease in sensing range.

A general rule of thumb is that the target size shall be three times the range or the size of the sensor face, whichever is larger.

### Standard Target Size <sup>①</sup>

| Target       | Standard Sensing Range |                    | Extended Sensing Range |                        |
|--------------|------------------------|--------------------|------------------------|------------------------|
|              | Shielded Devices       | Unshielded Devices | Semi-Shield Devices    | Non-Embeddable Devices |
| 4 mm         | 4 mm square            | 4 mm square        | —                      | —                      |
| 5 mm         | 5 mm square            | 5 mm square        | —                      | —                      |
| 6.5 mm       | 6.5 mm square          | 6.5 mm square      | —                      | —                      |
| 8 mm         | 8 mm square            | 8 mm square        | —                      | —                      |
| 12 mm        | 12 mm square           | 12 mm square       | 18 mm square           | 30 mm square           |
| 18 mm        | 18 mm square           | 24 mm square       | 36 mm square           | 60 mm square           |
| 30 mm        | 30 mm square           | 45 mm square       | 66 mm square           | —                      |
| Limit switch | 45 mm square           | 72 mm square       | —                      | —                      |

#### Note

<sup>①</sup> Targets are 1 mm thick.

### Product Selection Guide

3

#### iProx

#### Page V8-T3-11

##### Overview

Designed to be the highest performing tubular inductive sensor. Standard features include extended sensing ranges, high noise-immunity, extreme durability and includes Autoconfigure Technology. Advanced features include output delay, speed detection and cloning with ProxView Software.

##### Applications

Automotive, machine tool, material handling where high sensing performance and inventory consolidation is a priority.

##### Product Features

Auto-configure technology automatically detects a sinking (NPN) or sourcing (PNP) connection and switches the sensor accordingly, without any user intervention  
Optional computer programming cable and Windows-based ProxView configuration software makes it easy to customize sensors  
Clone the sensor to match the characteristics of more than 4,800 competitive models, or configure it to match your specific application needs  
Advanced programmable features such as dual outputs, output delay, speed detection and more

##### Technical Data and Specifications

Current ratings—  
AC: 250 mA  
DC: 300 mA  
Enclosure ratings—  
NEMA® 4, 4X, 6, 6P, 12, 13  
IEC IP67, IP69K  
Construction—  
Stainless steel

##### Approvals

UL® Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

#### E57P Performance Series

#### Page V8-T3-18

##### Overview

High performance inductive sensors. Extended and standard ranges available.

##### Applications

Automotive, machine tool, material handling where high sensing performance and inventory consolidation is a priority.

##### Product Features

12, 18 and 30 mm diameters  
Three-wire DC sensors  
360° LED indicators standard  
NO or NC outputs  
Short-circuit protection  
Resettable short-circuit protected and reverse polarity on select models  
Robust stainless steel tubes, shock-resistant front caps, polycarbonate end bells, and impact-absorbing potting compound are resistant to physical and environmental abuse in high temperature, high pressure washdown and high shock and vibration applications

##### Technical Data and Specifications

Current ratings—  
DC: 300 mA  
Enclosure ratings—IP67, IP69K;  
NEMA 4, 4X, 6, 6P  
Construction—  
Stainless steel housing and nuts

##### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

#### E57PS Performance Short Body

#### Page V8-T3-24

##### Overview

High performance inductive sensors with the ability to fit into tighter spaces.

##### Applications

Automotive, machine tool, material handling where high sensing performance and inventory consolidation is a priority.

##### Product Features

12, 18 and 30 mm diameters  
Three-wire DC sensors  
360° LED indicators standard  
NO or NC outputs  
Short-circuit protection  
Resettable short-circuit protected and reverse polarity on select models  
Robust stainless steel tubes, shock-resistant front caps, polycarbonate end bells, and impact-absorbing potting compound are resistant to physical and environmental abuse in high temperature, high pressure washdown and high shock and vibration applications

##### Technical Data and Specifications

Current ratings—  
DC: 300 mA  
Enclosure ratings—IP67, IP69K;  
NEMA 4, 4X, 6, 6P  
Construction—  
Stainless steel housing and nuts

##### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

#### E57G General Purpose

#### Page V8-T3-29

##### Overview

This full-line, tubular proximity sensor family provides a cost-effective solution for high volume OEM use.

##### Applications

Machine tool detection, press applications, cam detection, material handling, valve and shaft position, automotive assembly.

##### Product Features

12, 18 and 30 mm diameters  
Three-wire DC sensors  
360° LED indicators standard  
NO or NC outputs  
Short-circuit protection  
Resettable short-circuit protected and reverse polarity on select models  
Robust stainless steel tubes, shock-resistant front caps, polycarbonate end bells, and impact-absorbing potting compound are resistant to physical and environmental abuse in high temperature, high pressure washdown and high shock and vibration applications

##### Technical Data and Specifications

Current ratings—  
DC: 100 mA  
Enclosure ratings—IP67;  
NEMA 4, 4X, 6, 6P  
Construction—  
Stainless steel housing and nickel-brass nuts

##### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

### E57 Two-Wire (AC, AC/DC, DC) Proximity

Page V8-T3-35

#### Overview

Various models available in two-wire configurations:  
Stainless steel (AC, AC/DC)  
Stainless steel short body (AC, AC/DC)  
Nickel-brass (AC, DC)

#### Applications

Machine tool detection, press applications, cam detection, material handling, valve and shaft position, automotive assembly.

#### Product Features

12, 18 and 30 mm diameters  
Two-wire AC, AC/DC, DC  
Shielded and unshielded models  
Standard and extended ranges  
LED indicators  
Cable and micro-connector  
NO or NC outputs

#### Technical Data and Specifications

Stainless steel:  
Current ratings—  
500 mA maximum  
Enclosure ratings—IP67, IP69K;  
NEMA 4, 4X, 6, 6P, 12, 13  
Nickel-Brass:  
Current ratings—  
200 mA (AC); 100 mA (DC)  
Enclosure ratings—  
IP69K, IP67

#### Approvals

RoHS Compliant  
Stainless Steel:  
UL Listed, E166051  
UL Tested to Canadian safety standards  
CE (AC/DC only)  
Nickel-Brass:  
CSA Certified, 224447  
Products certified by CSA for US  
CE (DC only)

### AccuProx

Page V8-T3-49

#### Overview

AccuProx sensors feature analog outputs that change linearly as the target moves closer or further from the sensor face.

#### Applications

Part positioning, distance, size and thickness measurement, general inspection and error proofing (such as material imperfection or blemish detection), eccentricity or absolute angle detection, identification of different metals

#### Product Features

Extended linear sensing range of up to 25 mm—three times longer than standard tubular analog inductive sensors  
Outputs available in current (4–20 or 0–20 mA) and voltage (0–10 V)  
High output resolution and repeatability for applications requiring precision sensing performance  
Robust stainless steel barrel, shock-resistant front cap, polycarbonate end bell and impact-absorbing potting compound  
Ideal for extreme temperature or high pressure washdown environments

#### Technical Data and Specifications

Current ratings—  
0–10 Vdc, 0–20 mA, 4–20 mA  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 13  
Construction—  
Stainless steel

#### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

### Ferrous Only Tubular

Page V8-T3-55

#### Overview

Sensors designed to detect only ferrous metals (steel/iron).

#### Applications

Workcell applications, automotive and aircraft production.

#### Product Features

18 mm diameters  
Two-wire AC or three-wire DC  
NO or NC outputs  
Micro- and mini-pin terminations  
LED indicators

#### Technical Data and Specifications

Current ratings—  
AC: 500 mA continuous  
DC: 200 mA continuous  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 12, 13  
IEC IP67  
Construction—  
Stainless steel

#### Approvals

CSA Certified  
Products certified by CSA for US  
CE  
RoHS Compliant

### Metal Face

Page V8-T3-58

#### Overview

Tough sensors with thick stainless steel sensing faces and barrels.

#### Applications

Metal cutting operations where damage to sensor face could occur.

#### Product Features

12, 18 and 30 mm diameters  
Two-wire AC or three-wire DC  
20 mil thick stainless steel face  
303 stainless steel barrel  
LED indicator  
2-meter cable, micro- and mini-pin connections

#### Technical Data and Specifications

Current ratings—  
AC: 500 mA continuous  
DC: 200 mA continuous  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 12, 13  
IEC IP67  
Construction—  
Stainless steel

#### Approvals

CSA Certified  
Products certified by CSA for US  
CE  
RoHS Compliant

### High Current Output

**Page V8-T3-62**

**Overview**

DC sensors which can carry extremely large continuous inrush current.

**Applications**

Heavy-duty vehicles, cement mixers, lift trucks, front end loaders, farm equipment.

**Product Features**

30 mm diameter stainless steel housing  
 Solid-state output for 12 ampere continuous, 50 ampere inrush capacity  
 -40° to 158°F (-40° to 70°C) temperature range  
 NO and NC isolated outputs  
 Heavy gauge SJO cable

**Technical Data and Specifications**

Current ratings—  
 Varies by model  
 Enclosure ratings—  
 NEMA 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Construction—  
 Stainless steel

**Approvals**

RoHS Compliant

### Small Diameter

**Page V8-T3-65**

**Overview**

Small diameter and short body (4, 5, 6.5 and 8 mm) tubular housings for tight sensing applications.

**Applications**

Automation equipment, robotics, machine tool, counting, sorting

**Product Features**

Variety of diameters in stainless steel housings  
 PVC cable, micro- and nano-pin connections  
 LED indicators standard  
 Short overall lengths  
 Short circuit and reverse polarity protection

**Technical Data and Specifications**

Current ratings—  
 DC: 200 mA maximum  
 Enclosure ratings—  
 NEMA 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Construction—  
 Stainless steel

**Approvals**

CE  
 RoHS Compliant  
 8 mm standard models only:  
 CSA Certified, 224447  
 Products certified by CSA for US

### E56 Pancake

**Page V8-T3-71**

**Overview**

Self-contained sensors capable of sensing up to 3.94 inches (100 mm).

**Applications**

Oil rig operations, floor conveyors, automotive assembly, overhead cranes

**Product Features**

40, 50, 70 and 100 mm sensing distances  
 Four-wire DC models have complementary outputs (1 NO/1 NC)  
 Four-wire DC models use auto-configure technology, which allows the sensor to automatically adapt for NPN or PNP without user intervention  
 Available in two-wire AC versions  
 Power and output LED indicator  
 Quick disconnect option  
 Short-circuit protected in DC  
 Longest sensing distances available

**Technical Data and Specifications**

Current ratings—  
 AC: 500 mA continuous  
 DC: 200 mA continuous  
 Enclosure ratings—  
 NEMA 4, 4X, 12, 13  
 (some models also rated NEMA 6)  
 IEC IP66  
 Construction—  
 PPS

**Approvals**

UL Listed, E166051 (DC models only)  
 UL tested to Canadian safety standards  
 CE (DC models only)  
 RoHS Compliant

### Tubular, Nonmetallic Housing

#### Page V8-T3-76

##### Overview

Tubular sensors with nonmetallic housings offer high corrosion resistance.

##### Applications

Food processing lines, high washdown environments

##### Product Features

12, 18 and 30 mm diameters shielded and unshielded sensing  
 Normally open or closed outputs  
 AC and DC voltages  
 Tough ABS plastic housing  
 Output LED on all models

##### Technical Data and Specifications

Current ratings—  
 AC: 150 mA  
 DC: 200 mA  
 Enclosure ratings—  
 NEMA 3, 3S, 4, 4X, 13  
 IEC IP66  
 Construction—  
 ABS plastic

##### Approvals

CE  
 RoHS Compliant

### E52 Cube Style

#### Page V8-T3-79

##### Overview

A family of industry-standard, cube-sized inductive sensors with long range capabilities.

##### Applications

Automotive, manufacturing, machinery OEMs

##### Product Features

Long inductive proximity ranges available (up to 40 mm sensing distance)  
 Four-wire DC models have complementary outputs (1 NO/1 NC)  
 Four-wire DC models use auto-configure technology, which allows the sensor to automatically adapt for NPN or PNP without user intervention  
 Robust design featuring vibration and impact-absorbing potting compound  
 Ideal for extreme temperatures or high pressure washdown environments

##### Technical Data and Specifications

Current ratings—  
 DC: 300 mA maximum  
 Enclosure ratings—  
 NEMA 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Construction—  
 Zinc alloy/PPS, PL

##### Approvals

UL Listed, E166051  
 UL tested to Canadian safety standards  
 CE  
 RoHS Compliant

### E52 Rectangular Style

#### Page V8-T3-83

##### Overview

A variety of small rectangular sensors for limited space applications.

##### Applications

Tight applications where conventional sensor are too large

##### Product Features

Variety of housing styles R12, R18, Q16, Q25  
 10 to 30 Vdc  
 NPN and PNP output  
 Short-circuit protection  
 LED indicator for output status

##### Technical Data and Specifications

Current ratings—  
 DC: 100 mA maximum  
 Enclosure ratings—  
 NEMA 1, 2, 3, 3S, 4, 12  
 IEC IP66  
 Construction—  
 PBT composition housing

##### Approvals

CE (except E52RAL)  
 RoHS Compliant

### E55 Limit Switch Style, Nonmetallic Housing

Page V8-T3-86

#### Overview

These nonmetallic sensors provide corrosion resistance in a limit switch style housing.

#### Applications

Food processing lines, high washdown environments

#### Product Features

5 position head can be top mounted or in any of four side positions  
 Long sensing ranges up to 40 mm  
 Normally open or closed outputs  
 AC voltages  
 Tough PBT resin housing

#### Technical Data and Specifications

Current ratings—  
 AC: 400 mA  
 Enclosure ratings—  
 NEMA 4, 4X, 6, 12, 13  
 IEC IP67  
 Construction—  
 PBT resin

#### Approvals

CE  
 RoHS Compliant

### E51 Modular Switch Style, Modular

Page V8-T3-88

#### Overview

Modular design allows maximum use of inventories in these limit switch style housings. Solid-state circuitry in a variety of sensing ranges.

#### Applications

Machine tool, punch presses, automotive, conveyor systems

#### Product Features

Modular heads, switch bodies, receptacles  
 Shielded or unshielded sensing ranges  
 Solid-state electronics  
 Viton gasket seals  
 LED indicators for power and output status  
 Top and side sensing heads  
 Alternate frequency for side by side operation  
 Components individually labeled for easy identification

#### Technical Data and Specifications

Current ratings—  
 AC: 1 ampere continuous  
 DC: 0.6 ampere continuous  
 Enclosure ratings—  
 NEMA 3, 3S, 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Class I, Class II, Division 2  
 Groups A, B, C, D, F and G; Class III  
 Construction—  
 Die cast zinc  
 Gasket material: Viton

#### Approvals

UL Listed, E166051, E183975  
 CSA Certified, 50513  
 RoHS Compliant

### E51 Limit Switch Style, Factory Sealed 6P +

Page V8-T3-97

#### Overview

Completely epoxy filled in unitized, one piece limit switch style construction for reliable performance under the most adverse of environmental conditions.

#### Applications

All corrosive environments: Coolants/cutting oils, automotive applications

#### Product Features

One piece housing on switch body/receptacle  
 Head and housing totally epoxy encapsulated  
 Side sensing head can be unfastened and moved to any of four positions  
 Quick disconnect options  
 Corrosive resistant epoxy coated housing

#### Technical Data and Specifications

Current ratings—  
 AC: 1 ampere continuous  
 DC: 0.6 ampere continuous  
 Enclosure ratings—  
 NEMA 3, 3S, 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Construction—  
 Die cast zinc  
 Gasket material: Viton®

#### Approvals

UL Listed, E166051  
 CSA Certified, 50513  
 RoHS Compliant

### iProx Sensors

## iProx Sensors

### Product Description

The iProx represents the highest performance, most versatile tubular inductive sensor offered by Eaton's Electrical Sector. By utilizing an embedded micro-processor and exclusive SmartSense™ technology, iProx can sense up to three times farther than typical sensors of its class, while providing an unheard-of level of customization.

Both shielded and unshielded versions of iProx feature extended sensing ranges. This allows the sensor to be mounted farther from the target, thereby reducing the potential for target impacts and increasing the sensing reliability of your application.

The iProx also includes a wide range of advanced features that can be enabled via optional programming tools. Using the ProxView Windows-based software package, an entirely custom sensor can be programmed to perfectly fit an application.

For the most current information on this product, visit our Web site: [www.eaton.com](http://www.eaton.com)

Sensor characteristics, such as sensing range, can be customized down to the nearest tenth of a millimeter. Outputs can be changed from NO to NC. The iProx even features built-in timing delays and speed detection logic—no PLC programming is necessary.

With extended sensing range, quality construction and the ability to adapt to its environment, iProx is the ideal choice for even the most demanding inductive sensing applications.

### Application Description

#### Typical Applications

- Automotive
- Machine tool
- Material handling
- Metalworking

#### Features

- Available in AC two-wire, DC three-wire and unique DC four-wire with complementary (NO-NC) or dual NO outputs
- Reliably detect metal targets at up to three times the range of conventional shielded or unshielded tubular inductive sensors

## Contents

### Description

| Dimensions                            | <b>V8-T3-17</b> |

- Quality construction using a stainless steel barrel, 360-degree dual-color LED indicator, Ryton® impact-resistant face cap and vibration-absorbing potting compound
- Auto-configure technology automatically detects a sinking (NPN) or sourcing (PNP) connection and switches the sensor accordingly, without any user intervention
- Exclusive SmartSense embedded microprocessor technology allows for customizable range, band sensing, nuisance metal rejection, timing delays and over/under speed detection
- Optional computer programming cable and Windows-based ProxView configuration software makes it easy to customize sensors
- Withstands high electrical noise (up to 20 V/m)
- Resistant to extreme temperatures (–40 °F [–40 °C])

**Note:** Ryton® is a registered trademark of Phillips Chemical (division of Phillips Petroleum).

For Customer Service in the U.S. call 1-877-ETN CARE (386-2273), in Canada call 1-800-268-3578. For Application Assistance in the U.S. and Canada call 1-800-426-9184.

### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

# 3.1

## Inductive Proximity Sensors

### iProx Sensors

#### Product Selection

##### iProx Sensors

**Note:** Custom iProx models can also be ordered directly from the factory with pre-set ranges, outputs and connectors. Consult the Eaton Application Engineers at 1-800-426-9184 for more information.

#### Notes

☺ See listing of compatible connector cables on **Page V8-T3-15**.

① For sensors with custom cable lengths or PUR jackets, contact Application Engineering at 1-800-426-9184.

② Sensors are ordered with pre-set outputs from the factory, but can be later programmed either NO or NC using the ProxView software.

③ Standard pigtail cable length is 12 in.

**Note:** Custom iProx models can also be ordered directly from the factory with pre-set ranges, outputs and connectors. Consult the Eaton Application Engineers at 1-800-426-9184 for more information.

**Notes**

- ⊕ See listing of compatible connector cables on **Page V8-T3-15**.
- ① For sensors with custom cable lengths or PUR jackets, contact Application Engineering at 1-800-426-9184.
- ② Sensors are ordered with pre-set outputs from the factory, but can be later programmed either NO or NC using the ProxView software.
- ③ Standard pigtail cable length is 12 in.

#### Notes

☺ See listing of compatible connector cables on [Page V8-T3-15](#).

① At this time, iProx Complementary and Dual Output models are not available with auto-sink/source detection. Therefore, PNP (sourcing) and NPN (sinking) models must be ordered separately.

#### Response Time ②

| Description              | Two-Wire Sensors<br>All Two-Wire Models            | Three-Wire Sensors<br>Shielded |                 |                 | Unshielded      |                 |                 |
|--------------------------|--|--------------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|
|                          |  | 12 mm                          | 18 mm           | 30 mm           | 12 mm           | 18 mm           | 30 mm           |
| Factory default mode     | Shipped in “Side by Side Mode” by default (20 V/m) | 580 Hz (10 V/m)                | 390 Hz (10 V/m) | 240 Hz (10 V/m) | 300 Hz (10 V/m) | 150 Hz (10 V/m) | 145 Hz (10 V/m) |
| Side by side ③           | 30 Hz (10 V/m)                                     | 50 Hz (20 V/m)                 | 50 Hz (20 V/m)  | 50 Hz (20 V/m)  | 50 Hz (20 V/m)  | 50 Hz (20 V/m)  | 50 Hz (20 V/m)  |
| High noise immunity mode | 10 Hz (>20 V/m)                                    | 10 Hz (>20 V/m)                | 10 Hz (>20 V/m) | 10 Hz (>20 V/m) | 10 Hz (>20 V/m) | 10 Hz (>20 V/m) | 10 Hz (>20 V/m) |

#### Notes

Ryton® is a registered trademark of Phillips Chemical (division of Phillips Petroleum).

① Our products conform to NEMA® tests as indicated, however, some severe washdown applications can exceed these NEMA test specifications.

② iProx sensors may be programmed to perform in side by side or high noise immunity applications using the iProx programming cable (E59RP1) and ProxView software (E59SW1).

③ Use the side by side response time parameter when using the iProx Tray Programmer (E59TP1), iProx programming cable (E59RP1) and ProxView software (E59SW1).

### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

#### Notes

- ① The three-wire DC version of iProx automatically configures itself to NPN or PNP based on field wiring. No user intervention is required.
- ② Pin numbers 2 and 4 are internally jumpered together. Either pin may be used.
- ③ The complementary (1NO-1NC) output models feature the NC output on pin 2 (white).

### E57P Performance Series Sensors

#### Product Description

For sensing applications requiring more demanding specifications, the new E57P Performance series incorporates premium features without the premium price. With its stainless steel tubular body, IP69K rating, wide temperature range (down to -40 °C), fast switching speed and laser-etched markings, the E57P series provides value at a low price point.

#### Features

- 360° LED indicator
- Stainless steel tube
- 10–48 Vdc operating voltage
- Short-circuit protection
- -40 to 70 °C temperature range
- IP69K environmental rating
- Durable laser-engraved label
- Available in cable and micro-connector styles

#### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

⊕ See listing of compatible connector cables on [Page V8-T3-20](#).

① For cable lengths longer than 2 meters, add the number of the desired length in meters to the end of the listed catalog number (for catalog numbers ending with a number, add an **S** and then the length). Examples for a 5-meter cable: E57-18LE12-A becomes E57-18LE12-A5; E57LAL12A2 becomes E57LAL12A2S5.

|---|---------------------------------|
| Mounting brackets                               | See <b>Tab 8, section 8.2</b>   |
| Replacement mounting nuts and other accessories | See <b>Tab 8, section 8.3</b>   |
| Connector cables                                | See <b>Tab 10, section 10.1</b> |

##### Notes

② See listing of compatible connector cables on **Page V8-T3-20**.

① For cable lengths longer than 2 meters, add the number of the desired length in meters to the end of the listed catalog number (for catalog numbers ending with a number, add an **S** and then the length). Examples for a 5-meter cable: E57-18LE12-A becomes E57-18LE12-A**5**; E57LAL12A2 becomes E57LAL12A2**S5**.

② For a full selection of connector cables, see **Tab 10, section 10.1**.

### Technical Data and Specifications

| Switching frequency [Hz]       | Standard range:<br>12 mm—Shielded: 2000; Unshielded: 2000<br>18 mm—Shielded: 1200; Unshielded: 1200<br>30 mm—Shielded: 600; Unshielded: 500<br>Extended range:<br>12 mm—Shielded: 1200; Unshielded: 500<br>18 mm—Shielded: 300; Unshielded: 300<br>30 mm—Shielded: 400; Unshielded: 200 |
| Leakage current                | <100 $\mu$ A  |
| Output voltage drop [Vsat]     | <2.5 V  |
| Current consumption            | <10 mA  |
| Short-circuit protection       | Yes (Auto Reset)  |
| Hysteresis [% of Sr]           | 2–20%   |
| Repeat accuracy                | 1% shielded, 3% unshielded  |
| Time delay before availability | <200 ms   |
| Output indicator LED           | 360° amber LED  |
| Operating temperature range    | –40 to 70 °C  |
| Ingress protection             | IEC IP67, IP69K, UL Type 1, NEMA Type 6P, NEMA Type 4X  |
| Shock                          | 30 g, 11 ms per IEC 68-2-76   |
| Vibration                      | 10 to 55 Hz, 1 mm amplitude   |
| Housing materials              | Front face: Ryton<br>Tube: Stainless steel<br>End bells: M12 body: Polycarbonate<br>Cable end bell: Polycarbonate<br>Nuts: Stainless steel  |
| Cable                          | AWM style 20387 (PVC)   |

#### Recommended Mounting Clearances

For unshielded standard range sensors and extended range sensors, clearance must be provided around the sensor when mounting for reliable performance. (“Sn” is the sensing range of the sensor, “d” is the sensor diameter.)

#### E57P Performance Sensors, Mounting

| Type           | Shielding  | a          | b      |
|----------------|------------|------------|--------|
| Standard range | Shielded   | 0          | 0      |
|                | Unshielded | Cap height | 2 x 5n |
| Extended range | Shielded   | 0          | 0      |
|                | Unshielded | Cap height | 2 x Sn |

### E57PS Performance Short Body Sensors

#### Product Description

For demanding sensing applications in areas too small for standard length units, the E57PS Performance Short Body series is an ideal solution as it incorporates the premium features of the E57P series but in a shorter body length. With its stainless steel tubular body, IP69K rating, wide temperature range (down to -40 °C), fast switching speed and laser-etched markings, the E57PS series provides value at a low price point.

#### Features

- 360° LED indicator
- Stainless steel tube
- 10–48 Vdc operating voltage
- Short-circuit protection
- -40 to 70 °C temperature range
- IP69K environmental rating
- Durable laser-engraved label
- Available in cable and micro-connector styles

#### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

##### Notes

- ⊕ See listing of compatible connector cables above.
- ① Cable models are supplied as standard with a 2-meter cable. A 5-meter cable is available by adding **S5** to the catalog number. Example: E57SAL12T110 becomes E57SAL12T110**S5**.
- ② For a full selection of connector cables, see **Tab 10, section 10.1**.

## E57G General Purpose Proximity Sensors

### Product Description

For global sensing applications, the E57G General Purpose series is designed for most standard inductive sensing needs. With its stainless steel tubular body, 360 degree visible LED, fast switching speed and laser-etched markings, the E57G series is an ideal cost-effective solution.

### Features

- 360° LED indicator
- Stainless steel tube
- 10–30 Vdc operating voltage
- Short-circuit protection
- –25 to 70 °C temperature range
- IP67 environmental rating
- Durable laser-engraved label
- Available in cable and micro-connector styles
- Nickel-brass mounting nuts

### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### E57 Two-Wire (AC, AC/DC, DC) Proximity Sensors

#### Product Description

Eaton carries several options for your sensing needs in the E57 two-wire family. The stainless steel models are available in a standard length or short body, while available in AC or AC/DC configurations. The nickel-brass body models are available in standard length and either AC or DC two-wire configurations.

All of these are available in NPN or PNP with cable connections or micro connectors. The stainless steel standard length models are also available with mini connectors.

The stainless steel models in both lengths have 360 degree LEDs while the nickel-brass models have a single LED indicator.

Extended sensing ranges are also available in the stainless steel and nickel-brass standard length models, while shielded and unshielded models are offered throughout the E57 two-wire sensor products.

#### Standards and Certifications

- Stainless Steel:
  - UL Listed, E166051
  - UL Tested to Canadian safety standards
  - CE (AC/DC only)
  - RoHS Compliant
- Nickel-Brass:
  - CSA Certified, 224447
  - Products certified by CSA for US
  - CE (DC only)
  - RoHS Compliant

#### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

☹ See listing of compatible connector cables on **Page V8-T3-40**.

① For cable lengths longer than 2 meters, add the number of the desired length in meters to the end of the listed catalog number (for catalog numbers ending with a number, add an **S** and then the length). Examples for a 5-meter cable: E57-18LE12-A becomes E57-18LE12-A5; E57LAL12A2 becomes E57LAL12A2S5.

② Avoid wiring these AC/DC models in series as the sensors may not perform reliably. Contact Eaton's Applications Engineering at 1-800-426-9184 with questions.

#### Notes

☹ See listing of compatible connector cables on **Page V8-T3-40**.

① Cable models are supplied as standard with a 2-meter cable. A 5-meter cable is available by adding **S5** to the catalog number. Example: E57SAL12T110 becomes E57SAL12T110**S5**.

② Avoid wiring these AC/DC models in series as the sensors may not perform reliably. Contact Eaton's Applications Engineering at 1-800-426-9184 with questions.

| Switching frequency            | —  | —  |
| 8 mm diameter                  | —  | —  |
| 12 mm diameter                 | 25 Hz  | 1 kHz (shielded); 1 kHz (unshielded)   |
| 18 mm diameter                 | 25 Hz  | 1 kHz (shielded); 500 Hz (unshielded)  |
| 30 mm diameter                 | 25 Hz  | 500 Hz (shielded); 200 Hz (unshielded)   |
| Short-circuit protection       | No   | Yes  |
| Overload trip point            | —  | >120 mA  |
| Time delay before availability | —  | —  |
| Transient protection           | —  | 2 kV, 1 ms, 1 kohm   |
| Repeat accuracy                | Shielded: <1.0%/Unshielded: <3.0% (Sr)   | <2.0% (Sr)   |
| Switching hysteresis           | <15%   | <15%   |
| Operating temperature          | –13 to 158 °F (–25 to 70 °C)<br>(32 to 140 °F [0 to 60 °C]<br>for all extended range models) | –13 to 158 °F (–25 to 70 °C)<br>(32 to 140 °F [0 to 60 °C]<br>for all extended range models) |
| Temperature drift              | <10% (Sr)  | <10% (Sr)  |
| Protection                     | IP67, IP69K  | IP67, IP69K  |
| Housing material               | Nickel plated brass (stainless steel for<br>8 mm diameter, nano-connector models)            | Nickel plated brass (stainless steel for<br>8 mm diameter, nano-connector models)            |
| Cable                          | PVC jacket, 2-meter length   | PVC jacket, 2-meter length   |

### Recommended Mounting Clearances

For unshielded standard range sensors and extended range sensors, clearance must be provided around the sensor when mounting for reliable performance. ("Sn" is the sensing range of the sensor, "d" is the sensor diameter.)

### E57 Premium Sensors, Mounting

| Type           | Shielding      | a          | b      |
|----------------|----------------|------------|--------|
| Standard range | Shielded       | 0          | 0      |
|                | Unshielded     | Cap height | 2 x Sn |
| Extended range | Semi-shielded  | d          | Sn     |
|                | Non-embeddable | Cap height | 2 x Sn |

### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

## AccuProx Analog Sensors

### Product Description

The AccuProx from Eaton’s Electrical Sector is a high performance analog inductive proximity sensor. The AccuProx family of analog sensors provide unmatched sensing range, linearity and resolution in an affordable and compact tubular package.

Unlike standard inductive sensors, which send an open or close signal upon target presence or absence, AccuProx analog sensors provide an electrical signal that varies in proportion to the position of the metal target within its sensing range. This makes AccuProx ideal for applications requiring precise position sensing and measurement.

The sensing performance of AccuProx sets it apart from traditional analog inductive designs. Utilizing components from the cutting-edge iProx family, AccuProx provides sensing ranges of three to four times that of typical tubular analog inductive sensors—all without compromising accuracy.

Unlike many competitive products, which are often hampered by an “S-shaped” output curve, AccuProx outputs are linear.

AccuProx has the range and precision to solve your most difficult measurement applications.

### Application Description

#### Typical Applications

- Part positioning
- Distance, size and thickness measurement
- General inspection and error proofing, such as material imperfection or blemish detection
- Eccentricity or absolute angle detection
- Identification of different metals

See the Application Guide on **Page V8-T3-50** for more detail.

### Features

- Extended linear sensing range of up to 25 millimeters—three times longer than standard tubular analog inductive sensors
- Outputs available in current (4–20 or 0–20 mA) and voltage (0–10 V)
- High output resolution and repeatability for applications requiring precision sensing performance
- Robust stainless steel barrel, shock-resistant front cap, polycarbonate end bell and impact-absorbing potting compound
- Ideal for extreme temperature or high pressure washdown environments
- High noise immunity of 20 V/m prevents many problems associated with electrical noise

### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Inductive Proximity Sensors

### AccuProx Analog Sensors

#### Application Guide

##### Presenting AccuProx— Unmatched Analog Range in a Proven Package

3

Historically, analog sensors have been limited by very short sensing ranges—as little as one or two millimeters. By utilizing technology first perfected in the iProx family of digital inductive sensors, AccuProx can sense objects as far as 25 millimeters. This extended range can be achieved without making compromises often found in competitive products, such as reduced output accuracy.

AccuProx utilizes many of the proven materials found in other tubular sensor families. The threaded barrel and included mounting nuts are made of stainless steel, which exhibits superior corrosion and abrasion resistance versus nickel-plated brass. AccuProx also features a proprietary internal potting compound that absorbs impacts and vibration while sealing out moisture. The materials used in the construction of AccuProx are time-tested and proven to work.

##### High Output Accuracy

Analog inductive sensors are often used in applications that require a higher level of precision than a standard digital sensor. For example, applications such as part inspection require a sensor that can detect very small variances. AccuProx has been designed with these applications in mind.

Output accuracy is determined by the repeat accuracy, linearity, resolution and response time of the sensor.

Repeat accuracy refers to the variations in sensing distance between successive sensor operations due to component tolerances, where all operating conditions are kept the same. The repeat accuracy of an 18 millimeter, unshielded AccuProx sensor is less than 20 micrometers.

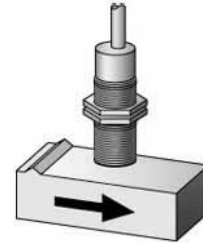

Linearity refers to the shape of the output curve. Many competitive analog sensors exhibit a wavy or “S-shaped” output curve. This means that a change in target distance may not always translate into an equivalent change in output, particularly at the innermost and outermost ranges of a non-linear analog sensor. AccuProx features a linear output. See the diagram below for an example of AccuProx versus a non-linear competitive offering.

Resolution refers to the number of “steps” in the sensor output. A higher resolution is ideal because it will allow the sensor to detect smaller changes in target position.

An 18 millimeter, unshielded AccuProx features more than 350 output steps, ensuring consistent performance.

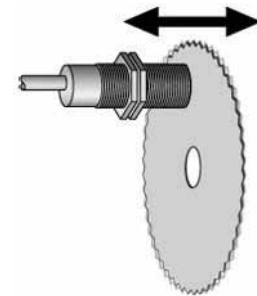

##### Typical Analog Applications Material Imperfection or Blemish Detection

##### Eccentricity or Absolute Angle Detection

##### Saw Blade Deflection

### Product Selection

#### Notes

- ☹ See listing of compatible connector cables above.
- ① Published range data is based on a 1 mm thick square target made of Type FE 360 steel per ISO Standard 630.
- ② Models available in custom output configurations (for example, 1–5 V, 0–5 V). Contact factory for details.
- ③ For a full selection of connector cables, see **Tab 10, section 10.1**.

#### Notes

① Published range data is based on a 1 mm thick square target made of Type FE 360 steel per ISO Standard 630.

② The sensor achieves its maximum repeat accuracy after warming up for a period of at least one hour.

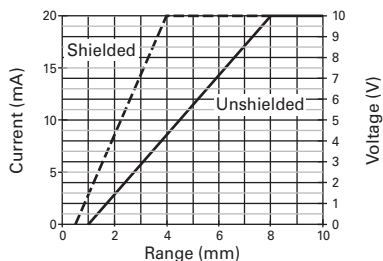

③ Voltage outputs available on models ending in **-CV**.

④ Continuous short-circuits can exceed power dissipation ratings and cause eventual destruction.

#### Notes

- ① Measurement resolution is the sensor's ability to detect a change in target position. The measurement resolution is the finest at the highest point in the curve.
- ② Output resolution is the change in output signal relative to target position. The minimum change in output resolution is defined by the lowest point in the curve.

## Ferrous Only Tubular Sensors

### Product Description

These unique Inductive Proximity Sensors have been specially made by Eaton's Electrical Sector to detect only a specific type of metal. Ferrous Only models will detect only ferrous metals such as steel, iron, nickel or cobalt.

A typical application for **Ferrous Only** sensors would be in workcell applications where cutting tools, tool pallets and fixtures must be detected for proper workpiece manipulation. The sensors detect ferrous objects while ignoring aluminum.

These sensors are available in a standard 18 mm diameter, and are epoxy filled for shock/vibration resistance and heat tolerance.

### Features

- Ferrous Only sensors detect ferrous metals, such as steel or iron, while ignoring non-ferrous metals
- Selection of two-wire and three-wire, AC/DC and DC-only sensor models
- Wide operating temperature range: -13 to 158 °F (-25 to 70 °C)

### Standards and Certifications

- CSA Certified
- Products certified by CSA for US
- CE
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### Metal Face Sensors

#### Product Description

Metal Face Inductive Proximity Sensors by Eaton's Electrical Sector incorporate tough stainless steel sensing faces in place of the plastic faces found in standard sensors. This provides a higher level of protection for more reliable operation and longer life in harsh environments.

The sensors stand up to abrasion and impact caused by flying metal chips, grit, and misaligned or vibrating targets. In addition, the stainless steel body resists corrosion and chemical attack.

Common sensor diameters, voltage styles and wiring connections make it easy to retrofit your existing, damaged sensors. Solve the problem of damaged sensors permanently with Eaton's Metal Face Sensors.

#### Features

- Two-wire AC/DC models and three-wire DC models are compatible with your existing wiring
- Common 12 mm, 18 mm and 30 mm housing diameters allow easy changeout of existing damaged sensors
- The 20 mil stainless steel sensing face is thicker than competing units for a higher level of protection
- The stainless steel body is damage and corrosion resistant
- Wide operating temperature range: -13 to 158 °F (-25 to 70 °C)

#### Standards and Certifications

- CSA Certified
- Products certified by CSA for US
- CE
- RoHS Compliant

### High Current Output Sensors

#### Product Description

Now there is an alternative to limit switches for position sensing on industrial vehicles. High Current Output Sensors feature a continuous output current rating from 2 to 8 A. These sensors from Eaton's Electrical Sector are ideally suited to handle high current loads found on such industrial vehicles as aerial lift trucks, fork lifts, refuse trucks, cement mixers, dump trucks, hook and ladder trucks, front end loaders, farm equipment and hundreds of other vehicles that are constantly subjected to mechanical (shock, vibration, collisions) and environmental (dirt, grease, ice, rain) abuse that create havoc with mechanical devices.

#### Features

- Solid-state output can handle up to 8 A continuous
- Ideal for vehicle use to replace mechanical limit switches, typically required to handle high currents
- Wide voltage and temperature range covers most vehicle power supplies and operating environments
- Normally Open and Normally Closed isolated outputs
- SJO cable is available in custom lengths
- Dual colored 360° LED indicating light, green as power ON and red as output

#### Standards and Certifications

- RoHS Compliant

#### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### Small Diameter (4, 5, 6.5, 8 mm) Sensors

#### Product Description

These unique Inductive Proximity Sensors by Eaton's Electrical Sector are designed to be used in extremely small spaces. A wide variety of models are available with housing diameters from 8 mm all the way down to 4 mm, allowing you to choose the one that best fits your application. The sensors are three-wire devices that operate from 10 to 30 Vdc. Both shielded and unshielded versions are available.

#### Application Description

##### Typical Applications

- Automation equipment
- Robotics
- Machine tool
- Counting
- Sorting

#### Features

- Small 4, 5, 6.5 and 8 mm diameters for use in applications with limited space for mounting sensors
- Stainless steel housings
- All models include an LED indicator to show output status
- Short circuit and reverse polarity protection
- Rated NEMA 4, 4X, 6, 6P, 12 and 13 (IP67) for high resistance to environmental factors

#### Standards and Certifications

- CE
- RoHS Compliant
- 8 mm standard models only:
  - CSA Certified, 224447
  - Products certified by CSA for US

## E56 Pancake Sensors

### Product Description

The E56 Pancake Sensor from Eaton's Electrical Sector is a high performance inductive proximity sensor. The E56 Pancake provides greater sensing ranges than other inductive sensor package types.

The E56 Pancake family provides convenience and ease of wiring with auto-configurable, complementary outputs. (Auto-configurable outputs automatically detect an NPN or PNP output configuration and switch the sensor accordingly, without user intervention.) Power and output LEDs make troubleshooting much easier than conventional proximity sensors, which usually only feature output LEDs. These convenience features, combined with the performance of the E56 Pancake, make it an excellent inductive sensing solution for applications requiring an extremely rugged, long-range sensing solution.

### Application Description

#### Typical Applications

- Heavy-duty trucks, cranes and machinery
- Steel mills
- Pipe and rod manufacturing
- Automotive manufacturing
- Amusement parks

### Features

- Longest inductive sensing ranges available (up to 100 mm)
- Three sizes to meet your application needs, with maximum ranges of 50, 70 or 100 mm
- Complementary outputs (1NO/1NC) on four-wire DC models
- Auto-configure output technology on four-wire DC models, which automatically detect how the sensor has been wired (NPN or PNP) and switch the sensor without user intervention
- Small diameter, two-wire AC models feature a selector switch inside the housing, enabling output contacts to be used as either NO or NC
- Robust design featuring vibration and impact-absorbing potting compound
- Ideal for extreme temperatures or high pressure washdown environments

### Standards and Certifications

- UL Listed, E166051 (DC models only)
- UL Tested to Canadian safety standards
- CE (DC models only)
- RoHS Compliant

### **!** DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

☹️ ☹️ See listing of compatible connector cables on [Page V8-T3-73](#).

① Includes potentiometer for adjustment of sensing range.

② Autoconfigure technology allows the sensor to automatically adapt to NPN or PNP without user intervention.

#### Note

① Small diameter DC unshielded models are rated at –40 °F (–40 °C). All other models can be operated at –40 °F (–40 °C), but range drift will occur.

### Nonmetallic Tubular Sensors

#### Product Description

E55 Tubular Inductive Proximity Sensors by Eaton’s Electrical Sector are constructed of corrosion resistant PBT plastic. They are ideally suited for wash down applications such as those found in food processing plants. They are available in 12 mm, 18 mm and 30 mm diameters, shielded or unshielded. Shielded units can be embedded in metallic surfaces.

#### Features

- Models available that operate on two-wire AC or three-wire DC power
- Threaded tubular housings in three diameters allow easy integration into new and existing applications
- Nonmetallic construction offers excellent resistance to corrosion
- Output indicator LED is standard on all models

#### Standards and Certifications

- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## E52 Cube Style Sensors

### Product Description

The E52 Cube Sensor from Eaton's Electrical Sector is a high performance inductive proximity sensor, providing long sensing ranges in a compact, industry-standard package.

The E52 Cube family features Eaton's Autoconfigure output technology, which automatically detects NPN or PNP wiring states and switches the sensor accordingly, without user intervention. The E52 also utilizes complementary outputs to further reduce the number of models needed to cover a wide array of inductive sensing applications. Individual power and output LEDs make installation and troubleshooting easy. Combine the above features with the range and five-way mounting flexibility of the E52 Cube family, and chances are there's an E52 solution to your sensing needs.

The E52 Cube was designed with the most heavy-duty applications in mind. Some of those applications include automotive manufacturing, aggregate machinery, and metalworking applications. Try the E52 Cube in some your most demanding applications today.

### Application Description

#### Typical Applications

- Automotive manufacturing
- Metalworking
- Machinery OEMs
- Pipe and rod manufacturing
- Block and brick manufacturing equipment
- Amusement parks
- Heavy-duty trucks, cranes and lifts

### Features

- Long inductive proximity ranges available (up to 40 mm sensing distance)
- Four-wire DC models have complementary outputs (1NO-1NC)
- Four-wire DC models use auto-configure technology, which allows the sensor to automatically adapt for NPN or PNP without user intervention
- Robust design featuring vibration and impact-absorbing potting compound
- Ideal for extreme temperatures or high pressure washdown environments

### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE (DC models only)
- RoHS Compliant

## E52 Rectangular Style Sensors

### Product Description

Rectangular E52 Inductive Proximity Sensors from Eaton's Electrical Sector feature a small, thin, compact space-saving design for applications where tubular type sensors cannot be used. Sensors are self-contained for direct connection to a logic circuit, relay, counter, programmable controller, and so on.

### Features

- Small, low-profile design for use in space restrictive applications
- Three-wire DC operation
- Choose from a variety of sizes, and side or end sensing configurations
- Output indicator included on all models
- Epoxy filled cavities stop fluids from contacting any electrical component
- Convenient mounting holes integrated into each sensor housing

### Standards and Certifications

- CE (except E52RAL)
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### E55 Limit Switch Style Sensors with Nonmetallic Housings

#### Product Description

These sensors from Eaton's Electrical Sector feature PBT resin housings for high resistance to corrosion. The housing is sized to offer a direct replacement for standard limit switches. The unique sensing head is factory assembled for top sensing, but can be easily converted in the field to any one of four side sensing positions. Models are available with sensing ranges from 15 mm to 40 mm. The sensors can be wired for NO or NC operation.

#### Features

- Nonmetallic housing offers excellent resistance to corrosion
- Same form factor and mounting as standard limit switches for easy retrofit
- Sensor head features five sensing positions (top and all four sides) that can be easily changed in the field
- Long sensing ranges up to 40 mm

#### Standards and Certifications

- CE
- RoHS Compliant

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### Technical Data and Specifications

#### E55 Limit Switch Style Sensors

| Description           | Specification   |
|-----------------------|---|
| Operating voltage     | 35–250 Vac  |
| Maximum load current  | 400 mA  |
| Switching frequency   | 25 Hz maximum   |
| Leakage current       | 1.8 mA  |
| Voltage drop          | 8V maximum  |
| Inrush                | 5 A maximum for 20 ms   |
| Indicator LEDs        | Two LEDs: One lights when power is ON, the other lights when output is ON |
| Operating temperature | –13 to 158 °F (–25 to 70 °C)  |
| Enclosure ratings     | NEMA 4, 4X, 6, 12, 13 (IP67)  |
| Housing material      | PBT resin   |

### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

### E51 Modular Limit Switch Style Sensors

#### Product Description

The E51 Inductive Proximity Sensor family from Eaton's Electrical Sector combines high performance with a familiar limit switch style housing. Modular, plug-in components provide application flexibility, ease of maintenance, less downtime and reduced inventory. Choose from two-wire sensors with AC/DC operation, or four-wire sensors in either AC or DC styles. Connection options include terminal, mini-connector or various lengths of cable.

Choose from standard sensors that detect all types of metallic targets. The next page provides more detail on these sensors.

#### Features

- Rugged construction is ideal for industrial environments
- Viton gaskets ensure a positive seal and high resistance to industry chemicals
- Direct replacement for worn out limit switches
- Sensor heads and bodies feature captive screws to eliminate loss
- All sensor heads include a selector switch to program output function to either NO or NC
- Sensor bodies feature bifurcated engagement prongs for a reliable connection when plugging into receptacle stabs

- Engagement key between sensor body and receptacle prevents improper assembly
- Sensors accommodate both U.S. and DIN mounting dimensions
- Wiring terminals feature captive pressure plate saddles for #18 to #12 AWG wire. A green screw identified ground terminal is also included
- Logic modules are available to provide additional control functions

#### Standards and Certifications

- UL Listed, E166051, E183975
- CSA Certified, 50513
- RoHS Compliant

### Product Selection

#### Standard Sensors—Assembled with Terminal Wiring

Standard E51 sensors feature long sensing ranges and a choice of top or side sensing heads. Alternate frequency units eliminate interference when mounted close to standard frequency units. Order sensors in component form, as assembled plug-in units, or in a sealed version where the sensor body is factory assembled to an epoxy filled receptacle with tamper-proof screws to ensure a lasting seal.

#### Assembled Sensor

#### Assembled Sensors—Standard (with Terminal Wiring)

#### Notes

<sup>①</sup> All sensor heads feature a programmable output selector switch for NO or NC operation. Operation is as follows:

| For This Output Type: | Set Selector Position: |                |
|-----------------------|------------------------|----------------|
|                       | "TARGET"               | "NO TARGET"    |
| NO                    | Target present         | Target absent  |
| NC                    | Target absent          | Target present |

<sup>②</sup> Logic module must be ordered separately, see **Page V8-T3-91**. These sensor bodies are rated NEMA 4, 4X and 13.

<sup>③</sup> Receptacles feature terminal wiring with a 1/2 in NPT thread at the conduit entrance. Other connection options are available:

| Connection Option   | Catalog Number             | Code Suffix          | Example                      |
|---|----------------------------|----------------------|------------------------------|

### Logic Module

#### Logic Module (for E51SCN Sensor Body Only)

| Type                  | Description   | Timing Range ④       | Catalog Number |
|-----------------------|---|----------------------|----------------|
| <b>Logic Module</b> ⑤ | ON and OFF delay<br>Adjustable delay between time object is sensed and time switch function occurs<br><br>Adjustable delay between time object leaves sensing field and time switch transfers back to non-sensing state | 0.15 to 15.0 seconds | <b>E51MTB</b>  |

#### Notes

- ① This sensor body is available in a factory-sealed, non plug-in configuration (with 8-ft cable), add **6P** to listed catalog number. Example: E51SAL**6P**.
- ② Sensor body is black. E51SCN sensor bodies are rated NEMA 4, 4X and 13.
- ③ This sensor accepts logic modules, as seen in chart above.
- ④ Repeatability of the timing cycle is ±1% at constant voltage, ambient temperature and reset time.
- ⑤ Reset time is 25 ms minimum. Rated NEMA 4, 4X and 13.

#### Technical Data and Specifications

##### E51 Modular Limit Switch Style Sensors

| Description                 | Specification  |
|-----------------------------|--|
| Output rating (NEMA D150)   |  |
| AC/DC models                | 0.5 A continuous   |
| AC models                   | 1 A continuous   |
| DC models                   | 0.6 A continuous   |
| Protection                  | Latching short-circuit protection on two-wire AC/DC models; DC models: resettable short-circuit protection |
| Switching rate              | AC models: 15 Hz; DC models: 50 Hz   |
| Indicator LEDs              | Lights when output is ON. One LED for each output  |
| Alternate frequency         | Standard and alternate frequencies allow side-by-side operation without interference                       |
| Enclosure material          | Zinc die cast  |
| Gasket material             | Viton  |
| Enclosure ratings           | NEMA 3, 3S, 4, 4X, 6, 6P, 12 and 13 (IP67); E51SCN sensor body only: NEMA 4, 4X and 13                     |
| Hazardous locations ratings |  |
| Class I                     | Division II—GRPS ABCD  |
| Class II                    | Division II—GRPS F and G   |
| Class III                   | Division 2   |
| Temperature range           | -13 to 158 °F (-25 to 70 °C)   |
| Torque requirements         | Switch body screws: 25–30 in-lbs; sensing head screws: 14–18 in-lbs  |
| Vibration                   | 10–55 Hz, 1 mm amplitude   |
| Shock                       | 30 g, 11 ms, 1/2 sine wave   |
| Humidity                    | 95% non-condensing   |
| Burden current              | <25 mA   |
| OFF-state leakage           | DC version: 120 µA; two-wire AC: 1.9 mA maximum; three-wire AC: 1.1 mA                                     |
| ON-state leakage            | <2.5 Vdc   |
| Power-up delay              | <150 ms  |

#### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

##### E51 Modular Limit Switch Style Sensors

| Operating Voltage          | Output  | Terminal and Cable Models | Mini-Connector Models (Face View Male Shown) |
|----------------------------|---|---------------------------|--|
| <b>Two-Wire Sensors</b>    |   |                           |  |
| 20–264 Vac or Vdc 50/60 Hz | NO or NC (NO shown, can be changed to NC using switch on sensor head) |                           |  |
| <b>Four-Wire Sensors</b>   |   |                           |  |
| 120 Vac 50/60 Hz           | NO and NC ①   |                           |  |
| 10–30 Vdc                  | NO and NC NPN ①   |                           |  |
|                            | NO and NC PNP ①   |                           |  |

#### Note

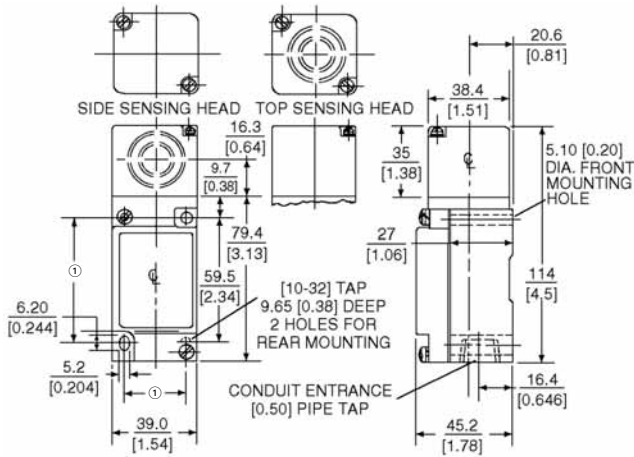

① Changing output switch on sensor head will reverse output function (NO becomes NC, and NC becomes NO).

## E51 Limit Switch Style, Factory Sealed 6P+ Sensors

### Product Description

E51 6P+ Inductive Proximity Sensors from Eaton's Electrical Sector are fully sealed, pre-wired and designed specifically to ensure reliability under the most adverse of environmental conditions. They have been proven to withstand the penetrating properties of dirt, dust, grit, extreme temperatures and humidity. The unitized design eliminates plug-in connections that can lead to reliability problems in rugged environments.

### Features

- The one-piece body and sensing head are both epoxy filled to protect internal components from contamination
- The head is hard-wired to the sensor body to ensure trouble-free performance
- Choose from top and side sensing heads
- Side sensing heads can be rotated to any of four positions
- Mounting dimensions allow direct replacement of worn out limit switches
- Rugged zinc die cast construction withstands physical abuse
- Connection options include pre-wired cable, body mounted connector and pigtail connector

### Standards and Certifications

- UL Listed, E166051
- CSA Certified, 50513
- RoHS Compliant

### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

| 13 A                               | —             | 3-pin            | 16 AWG | 6 ft (2m) | 1-Green<br>2-Black<br>3-White                          | <b>CSMS3F3CY1602</b> |
| 10 A                               | —             | 4-pin            | 16 AWG | 6 ft (2m) | 1-Black<br>2-Blue<br>3-Brown<br>4-White                | <b>CSMS4A4CY1602</b> |
| 8 A                                | AC/DC         | 5-pin,<br>5-wire | 16 AWG | 6 ft (2m) | 1-Black<br>2-Blue<br>3-Orange<br>4-Brown<br>5-White    | <b>CSMS5A5CY1602</b> |

#### Notes

<sup>①</sup> Switch bases feature 8 ft of S00W-A cable. Other connection options are available:

| Connection Option <sup>④</sup>  | Instructions                                | Example                          |
|---|---|----------------------------------|
| Mini-connector mounted on 3 ft (0.9m) pigtail cable (3-pin for two-wire sensors; 5-pin for four-wire sensors) | Add the letter <b>T</b> before <b>U</b>     | <b>E51ALT16PTU</b>               |
| Mini-connector mounted to switch base (3-pin for two-wire sensors; 5-pin for four-wire sensors)               | Add the letter <b>C</b> before <b>U</b>     | <b>E51ALT16PCU</b>               |
| Cable longer than 8 ft, add required length in 1 ft increments to listed catalog number—20 ft maximum         | Add length in feet to end of catalog number | <b>E51ALT16PU12 <sup>⑤</sup></b> |

<sup>②</sup> Sensor head is hard wired to sensor body and cannot be detached. Side sensing head can be unfastened and rotated to any of four positions.

<sup>③</sup> Sensor heads feature color coded target symbols: Yellow for standard frequency; Green for alternate frequency.

<sup>④</sup> See listing of compatible connector cables above.

<sup>⑤</sup> For 12 ft.

<sup>⑥</sup> For a full selection of connector cables, see **Tab 10, section 10.1**.

### Technical Data and Specifications

#### E51 Limit Switch Style, Factory Sealed 6P+

| Description               | Specification  |
|---------------------------|--|
| Output rating (NEMA D150) |  |
| AC/DC models              | 0.5 A continuous   |
| AC models                 | 1 A continuous   |
| DC models                 | 0.6 A continuous   |
| Protection                | Latching short-circuit protection on two-wire AC/DC and three-wire DC models         |
| Switching rate            | AC models: 15 Hz; DC models: 50 Hz   |
| Indicator LEDs            | Lights when output is ON. One LED for each output                                    |
| Alternate frequency       | Standard and alternate frequencies allow side-by-side operation without interference |
| Enclosure material        | Cast metal   |
| Gasket material           | Zinc die cast  |
| Enclosure ratings         | NEMA 3, 3S, 4, 4X, 6, 6P, 12 and 13 (IP68)   |
| Temperature range         | -13 to 158 °F (-25 to 70 °C)   |
| Torque requirements       | Switch body screws: 25–30 in-lbs; sensing head screws: 14–18 in-lbs                  |
| OFF-state leakage         | DC version: 120 µA; two-wire AC: 1.9 mA maximum; three-wire AC: 1.1 mA               |
| ON-state leakage          | <2.5 Vdc   |

**Note**

### Technical Reference

#### Inductive Proximity Sensors

3

#### General

There are a number of factors which should be considered when applying induction proximity sensors. A detailed discussion of these factors can be found on **Page V8-T12-4**. Presented below are a few of the more important considerations for quick reference.

#### Mounting

Inductive proximity sensors are available in two classifications: shielded (also known as embeddable or flush mountable) and unshielded (non-embeddable or non-flush mountable). What these terms refer to is the distance to surrounding metal that the device can be mounted. In the case of a shielded sensor the device can be mounted with the sensor completely surrounded by metal.

In the case of an unshielded sensor, a metal free zone must be provided when mounting the sensor. The size of the metal free zone is dependent on both the size of the sensor and the type of sensing range it has, for example, standard or extended.

#### Mounting Ranges

| Shielding             | a      | b          |
|-----------------------|--------|------------|
| <b>Standard Range</b> |        |            |
| Shielded              | 0      | 0          |
| Unshielded            | 2 x Sn | Cap height |
| <b>Extended Range</b> |        |            |
| Semi-shielded         | Sn     | d          |
| Non-embeddable        | 2 x Sn | Cap height |

Where **a** and **b** are the metal free dimensions.

When mounting the sensors, do not exceed the following recommended torque specifications.

#### Torque Specifications

| Stainless Steel       | Nickel-Plated Brass |
|-----------------------|---------------------|
| <b>12 mm Diameter</b> |                     |
| 35 lb-in (4.0 Nm)     | 20 lb-in (2.3 Nm)   |
| <b>18 mm Diameter</b> |                     |
| 70 lb-in (7.9 Nm)     | 70 lb-in (7.9 Nm)   |
| <b>30 mm Diameter</b> |                     |
| 70 lb-in (7.9 Nm)     | 70 lb-in (7.9 Nm)   |

### Extended Range Sensors

Extended range proximity sensors by Eaton’s Electrical Sector offer sensing distances almost three times greater than conventional devices. They are available in semi-shielded designs: mounted similar to an embeddable sensor—and non-embeddable designs requiring more metal free zone area than conventional unshielded sensors. All are available in a variety of circuits and terminations.

#### Target Material

When manufacturers of inductive proximity sensors state the sensing range of their devices, they are usually based upon a ferrous target made of carbon-rolled steel (IE FE 360) defined by ISO630. For example, in this product guide the E57P-18SPN5-C2 has a sensing range of 5 mm based upon a target of mild steel.

Sensing ranges to targets made of non-ferrous metals have to have a correction factor applied as listed in the table below. To use this table, multiply the sensing distance of the device by the factor given.

Example: The E57P-18SPN5-C2 has a sensing range of 5 mm. When used to sense a brass target, the sensing range becomes 2.25 mm (5 mm x 0.45).

### Table of Correction Factors

Multiply sensing range of device by factor given below.

#### Correction Factors

| Target              | Sensor Size |       |       |       | Limit Switch |
|---------------------|-------------|-------|-------|-------|--------------|
|                     | 4–8 mm      | 12 mm | 18 mm | 30 mm |              |
| Stainless steel 400 | 0.90        | 0.90  | 1.0   | 1.0   | 1.0          |
| Stainless steel 300 | 0.65        | 0.70  | 0.70  | 0.75  | 0.85         |
| Brass               | 0.35        | 0.45  | 0.45  | 0.45  | 0.5          |
| Aluminum            | 0.35        | 0.40  | 0.45  | 0.40  | 0.47         |
| Copper              | 0.30        | 0.25  | 0.35  | 0.30  | 0.40         |

#### Target Size

Often overlooked when applying sensors is the fact that the manufacturer’s stated sensing ranges are also dependent upon target size. The table below reflects the standard target sizes which were used to determine sensing ranges.

If targets are the same size or greater than standard, no reduction in sensing distance will occur. However, a smaller target size will result in a decrease in sensing range.

A general rule of thumb is that the target size shall be three times the range or the size of the sensor face, whichever is larger.

#### Standard Target Size <sup>①</sup>

| Target       | Standard Sensing Range |                    | Extended Sensing Range |                        |
|--------------|------------------------|--------------------|------------------------|------------------------|
|              | Shielded Devices       | Unshielded Devices | Semi-Shield Devices    | Non-Embeddable Devices |
| 4 mm         | 4 mm square            | 4 mm square        | —                      | —                      |
| 5 mm         | 5 mm square            | 5 mm square        | —                      | —                      |
| 6.5 mm       | 6.5 mm square          | 6.5 mm square      | —                      | —                      |
| 8 mm         | 8 mm square            | 8 mm square        | —                      | —                      |
| 12 mm        | 12 mm square           | 12 mm square       | 18 mm square           | 30 mm square           |
| 18 mm        | 18 mm square           | 24 mm square       | 36 mm square           | 60 mm square           |
| 30 mm        | 30 mm square           | 45 mm square       | 66 mm square           | —                      |
| Limit switch | 45 mm square           | 72 mm square       | —                      | —                      |

#### Note

<sup>①</sup> Targets are 1 mm thick.

### Product Selection Guide

#### iProx

#### E57P Performance Series

#### E57PS Performance Short Body

#### E57G General Purpose

3

#### Page V8-T3-11

#### Overview

Designed to be the highest performing tubular inductive sensor. Standard features include extended sensing ranges, high noise-immunity, extreme durability and includes Autoconfigure Technology. Advanced features include output delay, speed detection and cloning with ProxView Software.

#### Applications

Automotive, machine tool, material handling where high sensing performance and inventory consolidation is a priority.

#### Product Features

Auto-configure technology automatically detects a sinking (NPN) or sourcing (PNP) connection and switches the sensor accordingly, without any user intervention  
Optional computer programming cable and Windows-based ProxView configuration software makes it easy to customize sensors  
Clone the sensor to match the characteristics of more than 4,800 competitive models, or configure it to match your specific application needs  
Advanced programmable features such as dual outputs, output delay, speed detection and more

#### Technical Data and Specifications

Current ratings—  
AC: 250 mA  
DC: 300 mA  
Enclosure ratings—  
NEMA® 4, 4X, 6, 6P, 12, 13  
IEC IP67, IP69K  
Construction—  
Stainless steel

#### Approvals

UL® Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

#### Page V8-T3-18

#### Overview

High performance inductive sensors. Extended and standard ranges available.

#### Applications

Automotive, machine tool, material handling where high sensing performance and inventory consolidation is a priority.

#### Product Features

12, 18 and 30 mm diameters  
Three-wire DC sensors  
360° LED indicators standard  
NO or NC outputs  
Short-circuit protection  
Resettable short-circuit protected and reverse polarity on select models  
Robust stainless steel tubes, shock-resistant front caps, polycarbonate end bells, and impact-absorbing potting compound are resistant to physical and environmental abuse in high temperature, high pressure washdown and high shock and vibration applications

#### Technical Data and Specifications

Current ratings—  
DC: 300 mA  
Enclosure ratings—IP67, IP69K;  
NEMA 4, 4X, 6, 6P  
Construction—  
Stainless steel housing and nuts

#### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

#### Page V8-T3-24

#### Overview

High performance inductive sensors with the ability to fit into tighter spaces.

#### Applications

Automotive, machine tool, material handling where high sensing performance and inventory consolidation is a priority.

#### Product Features

12, 18 and 30 mm diameters  
Three-wire DC sensors  
360° LED indicators standard  
NO or NC outputs  
Short-circuit protection  
Resettable short-circuit protected and reverse polarity on select models  
Robust stainless steel tubes, shock-resistant front caps, polycarbonate end bells, and impact-absorbing potting compound are resistant to physical and environmental abuse in high temperature, high pressure washdown and high shock and vibration applications

#### Technical Data and Specifications

Current ratings—  
DC: 300 mA  
Enclosure ratings—IP67, IP69K;  
NEMA 4, 4X, 6, 6P  
Construction—  
Stainless steel housing and nuts

#### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

#### Page V8-T3-29

#### Overview

This full-line, tubular proximity sensor family provides a cost-effective solution for high volume OEM use.

#### Applications

Machine tool detection, press applications, cam detection, material handling, valve and shaft position, automotive assembly.

#### Product Features

12, 18 and 30 mm diameters  
Three-wire DC sensors  
360° LED indicators standard  
NO or NC outputs  
Short-circuit protection  
Resettable short-circuit protected and reverse polarity on select models  
Robust stainless steel tubes, shock-resistant front caps, polycarbonate end bells, and impact-absorbing potting compound are resistant to physical and environmental abuse in high temperature, high pressure washdown and high shock and vibration applications

#### Technical Data and Specifications

Current ratings—  
DC: 100 mA  
Enclosure ratings—IP67;  
NEMA 4, 4X, 6, 6P  
Construction—  
Stainless steel housing and nickel-brass nuts

#### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

### E57 Two-Wire (AC, AC/DC, DC) Proximity

Page V8-T3-35

#### Overview

Various models available in two-wire configurations:  
Stainless steel (AC, AC/DC)  
Stainless steel short body (AC, AC/DC)  
Nickel-brass (AC, DC)

#### Applications

Machine tool detection, press applications, cam detection, material handling, valve and shaft position, automotive assembly.

#### Product Features

12, 18 and 30 mm diameters  
Two-wire AC, AC/DC, DC  
Shielded and unshielded models  
Standard and extended ranges  
LED indicators  
Cable and micro-connector  
NO or NC outputs

#### Technical Data and Specifications

Stainless steel:  
Current ratings—  
500 mA maximum  
Enclosure ratings—IP67, IP69K;  
NEMA 4, 4X, 6, 6P, 12, 13  
Nickel-Brass:  
Current ratings—  
200 mA (AC); 100 mA (DC)  
Enclosure ratings—  
IP69K, IP67

#### Approvals

RoHS Compliant  
Stainless Steel:  
UL Listed, E166051  
UL Tested to Canadian safety standards  
CE (AC/DC only)  
Nickel-Brass:  
CSA Certified, 224447  
Products certified by CSA for US  
CE (DC only)

### AccuProx

Page V8-T3-49

#### Overview

AccuProx sensors feature analog outputs that change linearly as the target moves closer or further from the sensor face.

#### Applications

Part positioning, distance, size and thickness measurement, general inspection and error proofing (such as material imperfection or blemish detection), eccentricity or absolute angle detection, identification of different metals

#### Product Features

Extended linear sensing range of up to 25 mm—three times longer than standard tubular analog inductive sensors  
Outputs available in current (4–20 or 0–20 mA) and voltage (0–10 V)  
High output resolution and repeatability for applications requiring precision sensing performance  
Robust stainless steel barrel, shock-resistant front cap, polycarbonate end bell and impact-absorbing potting compound  
Ideal for extreme temperature or high pressure washdown environments

#### Technical Data and Specifications

Current ratings—  
0–10 Vdc, 0–20 mA, 4–20 mA  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 13  
Construction—  
Stainless steel

#### Approvals

UL Listed, E166051  
UL Tested to Canadian safety standards  
CE  
RoHS Compliant

### Ferrous Only Tubular

Page V8-T3-55

#### Overview

Sensors designed to detect only ferrous metals (steel/iron).

#### Applications

Workcell applications, automotive and aircraft production.

#### Product Features

18 mm diameters  
Two-wire AC or three-wire DC  
NO or NC outputs  
Micro- and mini-pin terminations  
LED indicators

#### Technical Data and Specifications

Current ratings—  
AC: 500 mA continuous  
DC: 200 mA continuous  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 12, 13  
IEC IP67  
Construction—  
Stainless steel

#### Approvals

CSA Certified  
Products certified by CSA for US  
CE  
RoHS Compliant

### Metal Face

Page V8-T3-58

#### Overview

Tough sensors with thick stainless steel sensing faces and barrels.

#### Applications

Metal cutting operations where damage to sensor face could occur.

#### Product Features

12, 18 and 30 mm diameters  
Two-wire AC or three-wire DC  
20 mil thick stainless steel face  
303 stainless steel barrel  
LED indicator  
2-meter cable, micro- and mini-pin connections

#### Technical Data and Specifications

Current ratings—  
AC: 500 mA continuous  
DC: 200 mA continuous  
Enclosure ratings—  
NEMA 4, 4X, 6, 6P, 12, 13  
IEC IP67  
Construction—  
Stainless steel

#### Approvals

CSA Certified  
Products certified by CSA for US  
CE  
RoHS Compliant

### High Current Output

**Page V8-T3-62**

**Overview**

DC sensors which can carry extremely large continuous inrush current.

**Applications**

Heavy-duty vehicles, cement mixers, lift trucks, front end loaders, farm equipment.

**Product Features**

30 mm diameter stainless steel housing  
 Solid-state output for 12 ampere continuous, 50 ampere inrush capacity  
 -40° to 158°F (-40° to 70°C) temperature range  
 NO and NC isolated outputs  
 Heavy gauge SJO cable

**Technical Data and Specifications**

Current ratings—  
 Varies by model  
 Enclosure ratings—  
 NEMA 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Construction—  
 Stainless steel

**Approvals**

RoHS Compliant

### Small Diameter

**Page V8-T3-65**

**Overview**

Small diameter and short body (4, 5, 6.5 and 8 mm) tubular housings for tight sensing applications.

**Applications**

Automation equipment, robotics, machine tool, counting, sorting

**Product Features**

Variety of diameters in stainless steel housings  
 PVC cable, micro- and nano-pin connections  
 LED indicators standard  
 Short overall lengths  
 Short circuit and reverse polarity protection

**Technical Data and Specifications**

Current ratings—  
 DC: 200 mA maximum  
 Enclosure ratings—  
 NEMA 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Construction—  
 Stainless steel

**Approvals**

CE  
 RoHS Compliant  
 8 mm standard models only:  
 CSA Certified, 224447  
 Products certified by CSA for US

### E56 Pancake

**Page V8-T3-71**

**Overview**

Self-contained sensors capable of sensing up to 3.94 inches (100 mm).

**Applications**

Oil rig operations, floor conveyors, automotive assembly, overhead cranes

**Product Features**

40, 50, 70 and 100 mm sensing distances  
 Four-wire DC models have complementary outputs (1 NO/1 NC)  
 Four-wire DC models use auto-configure technology, which allows the sensor to automatically adapt for NPN or PNP without user intervention  
 Available in two-wire AC versions  
 Power and output LED indicator  
 Quick disconnect option  
 Short-circuit protected in DC  
 Longest sensing distances available

**Technical Data and Specifications**

Current ratings—  
 AC: 500 mA continuous  
 DC: 200 mA continuous  
 Enclosure ratings—  
 NEMA 4, 4X, 12, 13  
 (some models also rated NEMA 6)  
 IEC IP66  
 Construction—  
 PPS

**Approvals**

UL Listed, E166051 (DC models only)  
 UL tested to Canadian safety standards  
 CE (DC models only)  
 RoHS Compliant

### Tubular, Nonmetallic Housing

**Page V8-T3-76**

**Overview**

Tubular sensors with nonmetallic housings offer high corrosion resistance.

**Applications**

Food processing lines, high washdown environments

**Product Features**

- 12, 18 and 30 mm diameters shielded and unshielded sensing
- Normally open or closed outputs
- AC and DC voltages
- Tough ABS plastic housing
- Output LED on all models

**Technical Data and Specifications**

- Current ratings—
- AC: 150 mA
- DC: 200 mA
- Enclosure ratings—
- NEMA 3, 3S, 4, 4X, 13
- IEC IP66
- Construction—
- ABS plastic

**Approvals**

- CE
- RoHS Compliant

### E52 Cube Style

**Page V8-T3-79**

**Overview**

A family of industry-standard, cube-sized inductive sensors with long range capabilities.

**Applications**

Automotive, manufacturing, machinery OEMs

**Product Features**

- Long inductive proximity ranges available (up to 40 mm sensing distance)
- Four-wire DC models have complementary outputs (1 NO/1 NC)
- Four-wire DC models use auto-configure technology, which allows the sensor to automatically adapt for NPN or PNP without user intervention
- Robust design featuring vibration and impact-absorbing potting compound
- Ideal for extreme temperatures or high pressure washdown environments

**Technical Data and Specifications**

- Current ratings—
- DC: 300 mA maximum
- Enclosure ratings—
- NEMA 4, 4X, 6, 6P, 12, 13
- IEC IP67
- Construction—
- Zinc alloy/PPS, PL

**Approvals**

- UL Listed, E166051
- UL tested to Canadian safety standards
- CE
- RoHS Compliant

### E52 Rectangular Style

**Page V8-T3-83**

**Overview**

A variety of small rectangular sensors for limited space applications.

**Applications**

Tight applications where conventional sensor are too large

**Product Features**

- Variety of housing styles R12, R18, Q16, Q25
- 10 to 30 Vdc
- NPN and PNP output
- Short-circuit protection
- LED indicator for output status

**Technical Data and Specifications**

- Current ratings—
- DC: 100 mA maximum
- Enclosure ratings—
- NEMA 1, 2, 3, 3S, 4, 12
- IEC IP66
- Construction—
- PBT composition housing

**Approvals**

- CE (except E52RAL)
- RoHS Compliant

### E55 Limit Switch Style, Nonmetallic Housing

Page V8-T3-86

#### Overview

These nonmetallic sensors provide corrosion resistance in a limit switch style housing.

#### Applications

Food processing lines, high washdown environments

#### Product Features

5 position head can be top mounted or in any of four side positions  
 Long sensing ranges up to 40 mm  
 Normally open or closed outputs  
 AC voltages  
 Tough PBT resin housing

#### Technical Data and Specifications

Current ratings—  
 AC: 400 mA  
 Enclosure ratings—  
 NEMA 4, 4X, 6, 12, 13  
 IEC IP67  
 Construction—  
 PBT resin

#### Approvals

CE  
 RoHS Compliant

### E51 Modular Switch Style, Modular

Page V8-T3-88

#### Overview

Modular design allows maximum use of inventories in these limit switch style housings. Solid-state circuitry in a variety of sensing ranges.

#### Applications

Machine tool, punch presses, automotive, conveyor systems

#### Product Features

Modular heads, switch bodies, receptacles  
 Shielded or unshielded sensing ranges  
 Solid-state electronics  
 Viton gasket seals  
 LED indicators for power and output status  
 Top and side sensing heads  
 Alternate frequency for side by side operation  
 Components individually labeled for easy identification

#### Technical Data and Specifications

Current ratings—  
 AC: 1 ampere continuous  
 DC: 0.6 ampere continuous  
 Enclosure ratings—  
 NEMA 3, 3S, 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Class I, Class II, Division 2  
 Groups A, B, C, D, F and G; Class III  
 Construction—  
 Die cast zinc  
 Gasket material: Viton

#### Approvals

UL Listed, E166051, E183975  
 CSA Certified, 50513  
 RoHS Compliant

### E51 Limit Switch Style, Factory Sealed 6P +

Page V8-T3-97

#### Overview

Completely epoxy filled in unitized, one piece limit switch style construction for reliable performance under the most adverse of environmental conditions.

#### Applications

All corrosive environments: Coolants/ cutting oils, automotive applications

#### Product Features

One piece housing on switch body/ receptacle  
 Head and housing totally epoxy encapsulated  
 Side sensing head can be unfastened and moved to any of four positions  
 Quick disconnect options  
 Corrosive resistant epoxy coated housing

#### Technical Data and Specifications

Current ratings—  
 AC: 1 ampere continuous  
 DC: 0.6 ampere continuous  
 Enclosure ratings—  
 NEMA 3, 3S, 4, 4X, 6, 6P, 12, 13  
 IEC IP67  
 Construction—  
 Die cast zinc  
 Gasket material: Viton®

#### Approvals

UL Listed, E166051  
 CSA Certified, 50513  
 RoHS Compliant

### iProx Sensors

## iProx Sensors

### Product Description

The iProx represents the highest performance, most versatile tubular inductive sensor offered by Eaton's Electrical Sector. By utilizing an embedded micro-processor and exclusive SmartSense™ technology, iProx can sense up to three times farther than typical sensors of its class, while providing an unheard-of level of customization.

Both shielded and unshielded versions of iProx feature extended sensing ranges. This allows the sensor to be mounted farther from the target, thereby reducing the potential for target impacts and increasing the sensing reliability of your application.

The iProx also includes a wide range of advanced features that can be enabled via optional programming tools. Using the ProxView Windows-based software package, an entirely custom sensor can be programmed to perfectly fit an application.

For the most current information on this product, visit our Web site: [www.eaton.com](http://www.eaton.com)

Sensor characteristics, such as sensing range, can be customized down to the nearest tenth of a millimeter. Outputs can be changed from NO to NC. The iProx even features built-in timing delays and speed detection logic—no PLC programming is necessary.

With extended sensing range, quality construction and the ability to adapt to its environment, iProx is the ideal choice for even the most demanding inductive sensing applications.

### Application Description

#### Typical Applications

- Automotive
- Machine tool
- Material handling
- Metalworking

#### Features

- Available in AC two-wire, DC three-wire and unique DC four-wire with complementary (NO-NC) or dual NO outputs
- Reliably detect metal targets at up to three times the range of conventional shielded or unshielded tubular inductive sensors

- Quality construction using a stainless steel barrel, 360-degree dual-color LED indicator, Ryton® impact-resistant face cap and vibration-absorbing potting compound
- Auto-configure technology automatically detects a sinking (NPN) or sourcing (PNP) connection and switches the sensor accordingly, without any user intervention
- Exclusive SmartSense embedded microprocessor technology allows for customizable range, band sensing, nuisance metal rejection, timing delays and over/under speed detection
- Optional computer programming cable and Windows-based ProxView configuration software makes it easy to customize sensors
- Withstands high electrical noise (up to 20 V/m)
- Resistant to extreme temperatures (–40 °F [–40 °C])

**Note:** Ryton® is a registered trademark of Phillips Chemical (division of Phillips Petroleum).

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

☺ See listing of compatible connector cables on **Page V8-T3-15**.

① For sensors with custom cable lengths or PUR jackets, contact Application Engineering at 1-800-426-9184.

② Sensors are ordered with pre-set outputs from the factory, but can be later programmed either NO or NC using the ProxView software.

③ Standard pigtail cable length is 12 in.

**Note:** Custom iProx models can also be ordered directly from the factory with pre-set ranges, outputs and connectors. Consult the Eaton Application Engineers at 1-800-426-9184 for more information.

### Three-Wire Sensors

|   | Operating Voltage     | Sensing Range         | Shielding  | Connection Type <sup>①</sup>        | NO Output Catalog Number <sup>②</sup> | NC Output Catalog Number <sup>②</sup> |
|---|-----------------------|-----------------------|------------|-------------------------------------|---------------------------------------|---------------------------------------|

#### Notes

☺ See listing of compatible connector cables on [Page V8-T3-15](#).

① At this time, iProx Complementary and Dual Output models are not available with auto-sink/source detection. Therefore, PNP (sourcing) and NPN (sinking) models must be ordered separately.

#### Notes

Ryton® is a registered trademark of Phillips Chemical (division of Phillips Petroleum).

① Our products conform to NEMA® tests as indicated, however, some severe washdown applications can exceed these NEMA test specifications.

② iProx sensors may be programmed to perform in side by side or high noise immunity applications using the iProx programming cable (E59RP1) and ProxView software (E59SW1).

③ Use the side by side response time parameter when using the iProx Tray Programmer (E59TP1), iProx programming cable (E59RP1) and ProxView software (E59SW1).

### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

|       | Unshielded | 2.92 (74.1) | 1.41 (35.8) | 0.75 (19)   | 1.41 (36) |

#### Notes

- ① The three-wire DC version of iProx automatically configures itself to NPN or PNP based on field wiring. No user intervention is required.
- ② Pin numbers 2 and 4 are internally jumpered together. Either pin may be used.
- ③ The complementary (1NO-1NC) output models feature the NC output on pin 2 (white).

### E57P Performance Series Sensors

#### Product Description

For sensing applications requiring more demanding specifications, the new E57P Performance series incorporates premium features without the premium price. With its stainless steel tubular body, IP69K rating, wide temperature range (down to -40 °C), fast switching speed and laser-etched markings, the E57P series provides value at a low price point.

#### Features

- 360° LED indicator
- Stainless steel tube
- 10–48 Vdc operating voltage
- Short-circuit protection
- -40 to 70 °C temperature range
- IP69K environmental rating
- Durable laser-engraved label
- Available in cable and micro-connector styles

#### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

⊕ See listing of compatible connector cables on [Page V8-T3-20](#).

① For cable lengths longer than 2 meters, add the number of the desired length in meters to the end of the listed catalog number (for catalog numbers ending with a number, add an **S** and then the length). Examples for a 5-meter cable: E57-18LE12-A becomes E57-18LE12-A5; E57LAL12A2 becomes E57LAL12A2S5.

| Description                                     | Reference                       |
|---|---------------------------------|
| Mounting brackets                               | See <b>Tab 8, section 8.2</b>   |
| Replacement mounting nuts and other accessories | See <b>Tab 8, section 8.3</b>   |
| Connector cables                                | See <b>Tab 10, section 10.1</b> |

##### Notes

② See listing of compatible connector cables on **Page V8-T3-20**.

① For cable lengths longer than 2 meters, add the number of the desired length in meters to the end of the listed catalog number (for catalog numbers ending with a number, add an **S** and then the length). Examples for a 5-meter cable: E57-18LE12-A becomes E57-18LE12-A**5**; E57LAL12A2 becomes E57LAL12A2**S5**.

② For a full selection of connector cables, see **Tab 10, section 10.1**.

### Technical Data and Specifications

#### E57P Performance Sensors

| Description                    | Performance Three-Wire DC Sensors   |
|--------------------------------|---|
| Operating voltage              | 10–48 Vdc   |
| Output current (continuous)    | 300 mA  |
| Switching frequency [Hz]       | Standard range:<br>12 mm—Shielded: 2000; Unshielded: 2000<br>18 mm—Shielded: 1200; Unshielded: 1200<br>30 mm—Shielded: 600; Unshielded: 500<br>Extended range:<br>12 mm—Shielded: 1200; Unshielded: 500<br>18 mm—Shielded: 300; Unshielded: 300<br>30 mm—Shielded: 400; Unshielded: 200 |
| Leakage current                | <100 $\mu$ A  |
| Output voltage drop [Vsat]     | <2.5 V  |
| Current consumption            | <10 mA  |
| Short-circuit protection       | Yes (Auto Reset)  |
| Hysteresis [% of Sr]           | 2–20%   |
| Repeat accuracy                | 1% shielded, 3% unshielded  |
| Time delay before availability | <200 ms   |
| Output indicator LED           | 360° amber LED  |
| Operating temperature range    | –40 to 70 °C  |
| Ingress protection             | IEC IP67, IP69K, UL Type 1, NEMA Type 6P, NEMA Type 4X  |
| Shock                          | 30 g, 11 ms per IEC 68-2-76   |
| Vibration                      | 10 to 55 Hz, 1 mm amplitude   |
| Housing materials              | Front face: Ryton<br>Tube: Stainless steel<br>End bells: M12 body: Polycarbonate<br>Cable end bell: Polycarbonate<br>Nuts: Stainless steel  |
| Cable                          | AWM style 20387 (PVC)   |

#### Recommended Mounting Clearances

For unshielded standard range sensors and extended range sensors, clearance must be provided around the sensor when mounting for reliable performance. (“Sn” is the sensing range of the sensor, “d” is the sensor diameter.)

#### E57P Performance Sensors, Mounting

| Type           | Shielding  | a          | b      |
|----------------|------------|------------|--------|
| Standard range | Shielded   | 0          | 0      |
|                | Unshielded | Cap height | 2 x 5n |
| Extended range | Shielded   | 0          | 0      |
|                | Unshielded | Cap height | 2 x Sn |

### E57PS Performance Short Body Sensors

#### Product Description

For demanding sensing applications in areas too small for standard length units, the E57PS Performance Short Body series is an ideal solution as it incorporates the premium features of the E57P series but in a shorter body length. With its stainless steel tubular body, IP69K rating, wide temperature range (down to -40 °C), fast switching speed and laser-etched markings, the E57PS series provides value at a low price point.

#### Features

- 360° LED indicator
- Stainless steel tube
- 10–48 Vdc operating voltage
- Short-circuit protection
- -40 to 70 °C temperature range
- IP69K environmental rating
- Durable laser-engraved label
- Available in cable and micro-connector styles

#### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

##### Notes

- ⊕ See listing of compatible connector cables above.
- ① Cable models are supplied as standard with a 2-meter cable. A 5-meter cable is available by adding **S5** to the catalog number. Example: E57SAL12T110 becomes E57SAL12T110**S5**.
- ② For a full selection of connector cables, see **Tab 10, section 10.1**.

## E57G General Purpose Proximity Sensors

### Product Description

For global sensing applications, the E57G General Purpose series is designed for most standard inductive sensing needs. With its stainless steel tubular body, 360 degree visible LED, fast switching speed and laser-etched markings, the E57G series is an ideal cost-effective solution.

### Features

- 360° LED indicator
- Stainless steel tube
- 10–30 Vdc operating voltage
- Short-circuit protection
- –25 to 70 °C temperature range
- IP67 environmental rating
- Durable laser-engraved label
- Available in cable and micro-connector styles
- Nickel-brass mounting nuts

### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Technical Data and Specifications

### E57G General Purpose Proximity Sensors

| Description                    | Three-Wire DC Sensors   |
|--------------------------------|---|
| Operating voltage              | 10–30 Vdc   |
| Output current (continuous)    | 100 mA  |
| Switching frequency [Hz]       | Standard range:<br>12 mm—Shielded: 2000; Unshielded: 2000<br>18 mm—Shielded: 1200; Unshielded: 1200<br>30 mm—Shielded: 600; Unshielded: 500<br>Extended range:<br>12 mm—Shielded: 1200; Unshielded: 500<br>18 mm—Shielded: 300; Unshielded: 300<br>30 mm—Shielded: 400; Unshielded: 200 |
| Leakage current                | <100 $\mu$ A  |
| Output voltage drop [Vsat]     | <2.5 V  |
| Current consumption            | <10 mA  |
| Short-circuit protection       | Yes (Auto Reset)  |
| Hysteresis [% of Sr]           | 2–20%   |
| Repeat accuracy                | 1% shielded, 3% unshielded  |
| Time delay before availability | <200 ms   |
| Output indicator LED           | 360° amber LED  |
| Operating temperature range    | –25 to 70 °C  |
| Ingress protection             | IEC IP67, UL Type 1   |
| Mechanical shock               | IEC 60947-5-2 30 G half-sine wave, 11 mS  |
| Vibration                      | IEC 60947-5-2 10–55 Hz, 1 mm amplitude  |
| Housing materials              | Front face: Ryton<br>Tube: stainless steel<br>End bells: M12 body: Polycarbonate<br>Cable end bell: Polycarbonate<br>Nuts: Ni-Brass   |
| Cable                          | AWM style 20387 (PVC)   |

### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

### E57 Two-Wire (AC, AC/DC, DC) Proximity Sensors

### E57 Two-Wire (AC, AC/DC, DC) Proximity Sensors

#### Product Description

Eaton carries several options for your sensing needs in the E57 two-wire family. The stainless steel models are available in a standard length or short body, while available in AC or AC/DC configurations. The nickel-brass body models are available in standard length and either AC or DC two-wire configurations.

All of these are available in NPN or PNP with cable connections or micro connectors. The stainless steel standard length models are also available with mini connectors.

The stainless steel models in both lengths have 360 degree LEDs while the nickel-brass models have a single LED indicator.

Extended sensing ranges are also available in the stainless steel and nickel-brass standard length models, while shielded and unshielded models are offered throughout the E57 two-wire sensor products.

#### Standards and Certifications

- Stainless Steel:
  - UL Listed, E166051
  - UL Tested to Canadian safety standards
  - CE (AC/DC only)
  - RoHS Compliant
- Nickel-Brass:
  - CSA Certified, 224447
  - Products certified by CSA for US
  - CE (DC only)
  - RoHS Compliant

#### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

☹ See listing of compatible connector cables on **Page V8-T3-40**.

① For cable lengths longer than 2 meters, add the number of the desired length in meters to the end of the listed catalog number (for catalog numbers ending with a number, add an **S** and then the length). Examples for a 5-meter cable: E57-18LE12-A becomes E57-18LE12-A5; E57LAL12A2 becomes E57LAL12A2S5.

② Avoid wiring these AC/DC models in series as the sensors may not perform reliably. Contact Eaton's Applications Engineering at 1-800-426-9184 with questions.

**Notes**

- ☺ See listing of compatible connector cables on **Page V8-T3-40**.
- ① For cable lengths longer than 2 meters, add the number of the desired length in meters to the end of the listed catalog number (for catalog numbers ending with a number, add an **S** and then the length). Examples for a 5-meter cable: E57-18LE12-A becomes E57-18LE12-A**5**; E57LAL12A2 becomes E57LAL12A2**S5**.
- ② Avoid wiring these AC/DC models in series as the sensors may not perform reliably. Contact Eaton's Applications Engineering at 1-800-426-9184 with questions.

#### Notes

☹ See listing of compatible connector cables on **Page V8-T3-40**.

① Cable models are supplied as standard with a 2-meter cable. A 5-meter cable is available by adding **S5** to the catalog number. Example: E57SAL12T110 becomes E57SAL12T110**S5**.

② Avoid wiring these AC/DC models in series as the sensors may not perform reliably. Contact Eaton's Applications Engineering at 1-800-426-9184 with questions.

| Switching frequency            | —  | —  |
| 8 mm diameter                  | —  | —  |
| 12 mm diameter                 | 25 Hz  | 1 kHz (shielded); 1 kHz (unshielded)   |
| 18 mm diameter                 | 25 Hz  | 1 kHz (shielded); 500 Hz (unshielded)  |
| 30 mm diameter                 | 25 Hz  | 500 Hz (shielded); 200 Hz (unshielded)   |
| Short-circuit protection       | No   | Yes  |
| Overload trip point            | —  | >120 mA  |
| Time delay before availability | —  | —  |
| Transient protection           | —  | 2 kV, 1 ms, 1 kohm   |
| Repeat accuracy                | Shielded: <1.0%/Unshielded: <3.0% (Sr)   | <2.0% (Sr)   |
| Switching hysteresis           | <15%   | <15%   |
| Operating temperature          | –13 to 158 °F (–25 to 70 °C)<br>(32 to 140 °F [0 to 60 °C]<br>for all extended range models) | –13 to 158 °F (–25 to 70 °C)<br>(32 to 140 °F [0 to 60 °C]<br>for all extended range models) |
| Temperature drift              | <10% (Sr)  | <10% (Sr)  |
| Protection                     | IP67, IP69K  | IP67, IP69K  |
| Housing material               | Nickel plated brass (stainless steel for<br>8 mm diameter, nano-connector models)            | Nickel plated brass (stainless steel for<br>8 mm diameter, nano-connector models)            |
| Cable                          | PVC jacket, 2-meter length   | PVC jacket, 2-meter length   |

### Recommended Mounting Clearances

For unshielded standard range sensors and extended range sensors, clearance must be provided around the sensor when mounting for reliable performance. ("Sn" is the sensing range of the sensor, "d" is the sensor diameter.)

### E57 Premium Sensors, Mounting

| Type           | Shielding      | a          | b      |
|----------------|----------------|------------|--------|
| Standard range | Shielded       | 0          | 0      |
|                | Unshielded     | Cap height | 2 x Sn |
| Extended range | Semi-shielded  | d          | Sn     |
|                | Non-embeddable | Cap height | 2 x Sn |

### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

### Stainless Steel Body

| Operating Voltage                              | Output          | Cable Models | Connector Models (Face View Male Shown) |      |

## AccuProx Analog Sensors

### Product Description

The AccuProx from Eaton’s Electrical Sector is a high performance analog inductive proximity sensor. The AccuProx family of analog sensors provide unmatched sensing range, linearity and resolution in an affordable and compact tubular package.

Unlike standard inductive sensors, which send an open or close signal upon target presence or absence, AccuProx analog sensors provide an electrical signal that varies in proportion to the position of the metal target within its sensing range. This makes AccuProx ideal for applications requiring precise position sensing and measurement.

The sensing performance of AccuProx sets it apart from traditional analog inductive designs. Utilizing components from the cutting-edge iProx family, AccuProx provides sensing ranges of three to four times that of typical tubular analog inductive sensors—all without compromising accuracy.

Unlike many competitive products, which are often hampered by an “S-shaped” output curve, AccuProx outputs are linear.

AccuProx has the range and precision to solve your most difficult measurement applications.

### Application Description

#### Typical Applications

- Part positioning
- Distance, size and thickness measurement
- General inspection and error proofing, such as material imperfection or blemish detection
- Eccentricity or absolute angle detection
- Identification of different metals

See the Application Guide on **Page V8-T3-50** for more detail.

### Features

- Extended linear sensing range of up to 25 millimeters—three times longer than standard tubular analog inductive sensors
- Outputs available in current (4–20 or 0–20 mA) and voltage (0–10 V)
- High output resolution and repeatability for applications requiring precision sensing performance
- Robust stainless steel barrel, shock-resistant front cap, polycarbonate end bell and impact-absorbing potting compound
- Ideal for extreme temperature or high pressure washdown environments
- High noise immunity of 20 V/m prevents many problems associated with electrical noise

### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## Inductive Proximity Sensors

### AccuProx Analog Sensors

#### Application Guide

##### Presenting AccuProx— Unmatched Analog Range in a Proven Package

3

Historically, analog sensors have been limited by very short sensing ranges—as little as one or two millimeters. By utilizing technology first perfected in the iProx family of digital inductive sensors, AccuProx can sense objects as far as 25 millimeters. This extended range can be achieved without making compromises often found in competitive products, such as reduced output accuracy.

AccuProx utilizes many of the proven materials found in other tubular sensor families. The threaded barrel and included mounting nuts are made of stainless steel, which exhibits superior corrosion and abrasion resistance versus nickel-plated brass. AccuProx also features a proprietary internal potting compound that absorbs impacts and vibration while sealing out moisture. The materials used in the construction of AccuProx are time-tested and proven to work.

#### High Output Accuracy

Analog inductive sensors are often used in applications that require a higher level of precision than a standard digital sensor. For example, applications such as part inspection require a sensor that can detect very small variances. AccuProx has been designed with these applications in mind.

Output accuracy is determined by the repeat accuracy, linearity, resolution and response time of the sensor.

Repeat accuracy refers to the variations in sensing distance between successive sensor operations due to component tolerances, where all operating conditions are kept the same. The repeat accuracy of an 18 millimeter, unshielded AccuProx sensor is less than 20 micrometers.

Linearity refers to the shape of the output curve. Many competitive analog sensors exhibit a wavy or “S-shaped” output curve. This means that a change in target distance may not always translate into an equivalent change in output, particularly at the innermost and outermost ranges of a non-linear analog sensor. AccuProx features a linear output. See the diagram below for an example of AccuProx versus a non-linear competitive offering.

Resolution refers to the number of “steps” in the sensor output. A higher resolution is ideal because it will allow the sensor to detect smaller changes in target position.

An 18 millimeter, unshielded AccuProx features more than 350 output steps, ensuring consistent performance.

#### Typical Analog Applications Material Imperfection or Blemish Detection

#### Eccentricity or Absolute Angle Detection

#### Saw Blade Deflection

**Notes**

① Published range data is based on a 1 mm thick square target made of Type FE 360 steel per ISO Standard 630.

② The sensor achieves its maximum repeat accuracy after warming up for a period of at least one hour.

③ Voltage outputs available on models ending in **-CV**.

④ Continuous short-circuits can exceed power dissipation ratings and cause eventual destruction.

#### Notes

- ① Measurement resolution is the sensor's ability to detect a change in target position. The measurement resolution is the finest at the highest point in the curve.
- ② Output resolution is the change in output signal relative to target position. The minimum change in output resolution is defined by the lowest point in the curve.

| 30 mm | Shielded   | 2.74 (69.6) | 2.13 (54.1) | 0.03 (0.75) | 1.41 (36) |
|       | Unshielded | 2.74 (69.6) | 1.41 (35.8) | 0.75 (19)   | 1.41 (36) |

#### Note

① For models ending in **-C1** (current output only models), pins 2 and 4 are intentionally connected. Do not connect outputs of **-C1** models to separate loads—this sensor should only be connected to a single-output load.

## Ferrous Only Tubular Sensors

### Product Description

These unique Inductive Proximity Sensors have been specially made by Eaton's Electrical Sector to detect only a specific type of metal. Ferrous Only models will detect only ferrous metals such as steel, iron, nickel or cobalt.

A typical application for **Ferrous Only** sensors would be in workcell applications where cutting tools, tool pallets and fixtures must be detected for proper workpiece manipulation. The sensors detect ferrous objects while ignoring aluminum.

These sensors are available in a standard 18 mm diameter, and are epoxy filled for shock/vibration resistance and heat tolerance.

### Features

- Ferrous Only sensors detect ferrous metals, such as steel or iron, while ignoring non-ferrous metals
- Selection of two-wire and three-wire, AC/DC and DC-only sensor models
- Wide operating temperature range: -13 to 158 °F (-25 to 70 °C)

### Standards and Certifications

- CSA Certified
- Products certified by CSA for US
- CE
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### Metal Face Sensors

#### Product Description

Metal Face Inductive Proximity Sensors by Eaton's Electrical Sector incorporate tough stainless steel sensing faces in place of the plastic faces found in standard sensors. This provides a higher level of protection for more reliable operation and longer life in harsh environments.

The sensors stand up to abrasion and impact caused by flying metal chips, grit, and misaligned or vibrating targets. In addition, the stainless steel body resists corrosion and chemical attack.

Common sensor diameters, voltage styles and wiring connections make it easy to retrofit your existing, damaged sensors. Solve the problem of damaged sensors permanently with Eaton's Metal Face Sensors.

#### Features

- Two-wire AC/DC models and three-wire DC models are compatible with your existing wiring
- Common 12 mm, 18 mm and 30 mm housing diameters allow easy changeout of existing damaged sensors
- The 20 mil stainless steel sensing face is thicker than competing units for a higher level of protection
- The stainless steel body is damage and corrosion resistant
- Wide operating temperature range: -13 to 158 °F (-25 to 70 °C)

#### Standards and Certifications

- CSA Certified
- Products certified by CSA for US
- CE
- RoHS Compliant

#### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### High Current Output Sensors

#### Product Description

Now there is an alternative to limit switches for position sensing on industrial vehicles. High Current Output Sensors feature a continuous output current rating from 2 to 8 A. These sensors from Eaton's Electrical Sector are ideally suited to handle high current loads found on such industrial vehicles as aerial lift trucks, fork lifts, refuse trucks, cement mixers, dump trucks, hook and ladder trucks, front end loaders, farm equipment and hundreds of other vehicles that are constantly subjected to mechanical (shock, vibration, collisions) and environmental (dirt, grease, ice, rain) abuse that create havoc with mechanical devices.

#### Features

- Solid-state output can handle up to 8 A continuous
- Ideal for vehicle use to replace mechanical limit switches, typically required to handle high currents
- Wide voltage and temperature range covers most vehicle power supplies and operating environments
- Normally Open and Normally Closed isolated outputs
- SJO cable is available in custom lengths
- Dual colored 360° LED indicating light, green as power ON and red as output

#### Standards and Certifications

- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

- ① For additional cable length other than 2-meter, add desired length in meters to listed catalog number. Example: For an E57-30JS10-H with a 5-meter cable, order E57-30JS10-H5.
- ② 50 Amp surge, 12 Amp at 50% duty cycle and 8 Amp continuous.

### Small Diameter (4, 5, 6.5, 8 mm) Sensors

#### Product Description

These unique Inductive Proximity Sensors by Eaton's Electrical Sector are designed to be used in extremely small spaces. A wide variety of models are available with housing diameters from 8 mm all the way down to 4 mm, allowing you to choose the one that best fits your application. The sensors are three-wire devices that operate from 10 to 30 Vdc. Both shielded and unshielded versions are available.

#### Application Description

##### Typical Applications

- Automation equipment
- Robotics
- Machine tool
- Counting
- Sorting

#### Features

- Small 4, 5, 6.5 and 8 mm diameters for use in applications with limited space for mounting sensors
- Stainless steel housings
- All models include an LED indicator to show output status
- Short circuit and reverse polarity protection
- Rated NEMA 4, 4X, 6, 6P, 12 and 13 (IP67) for high resistance to environmental factors

#### Standards and Certifications

- CE
- RoHS Compliant
- 8 mm standard models only:
  - CSA Certified, 224447
  - Products certified by CSA for US

#### **! DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### Technical Data and Specifications

#### Small Diameter Sensors

| Description                    | Three-Wire DC Only Sensors  |
|--------------------------------|---|
| Operating voltage              | 10–30 Vdc   |
| Maximum load current           | 200 mA  |
| Switching frequency            | 2 kHz   |
| Leakage current                | 0.01 mA maximum   |
| Voltage drop                   | 1.5 V maximum   |
| Burden current                 | 10 mA maximum   |
| Protection                     | Transient, power on false pulse suppression, auto reset short circuit |
| Switching hysteresis           | <15% rated sensing distance   |
| Repeat accuracy                | <1% sensing distance  |
| Time delay before availability | <50 ms  |
| Output indicator LED           | Lights when output is ON  |
| Operating temperature          | –13 to 158 °F (–25 to 70 °C)  |
| Enclosure ratings              | NEMA 4, 4X, 6, 6P, 12 and 13 (IP67)                                   |
| Housing material               | Stainless steel   |
| Cable                          | PVC high flex, oil/water resistant, 22 AWG                            |

### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

## E56 Pancake Sensors

### Product Description

The E56 Pancake Sensor from Eaton's Electrical Sector is a high performance inductive proximity sensor. The E56 Pancake provides greater sensing ranges than other inductive sensor package types.

The E56 Pancake family provides convenience and ease of wiring with auto-configurable, complementary outputs. (Auto-configurable outputs automatically detect an NPN or PNP output configuration and switch the sensor accordingly, without user intervention.) Power and output LEDs make troubleshooting much easier than conventional proximity sensors, which usually only feature output LEDs. These convenience features, combined with the performance of the E56 Pancake, make it an excellent inductive sensing solution for applications requiring an extremely rugged, long-range sensing solution.

### Application Description

#### Typical Applications

- Heavy-duty trucks, cranes and machinery
- Steel mills
- Pipe and rod manufacturing
- Automotive manufacturing
- Amusement parks

### Features

- Longest inductive sensing ranges available (up to 100 mm)
- Three sizes to meet your application needs, with maximum ranges of 50, 70 or 100 mm
- Complementary outputs (1NO/1NC) on four-wire DC models
- Auto-configure output technology on four-wire DC models, which automatically detect how the sensor has been wired (NPN or PNP) and switch the sensor without user intervention
- Small diameter, two-wire AC models feature a selector switch inside the housing, enabling output contacts to be used as either NO or NC
- Robust design featuring vibration and impact-absorbing potting compound
- Ideal for extreme temperatures or high pressure washdown environments

### Standards and Certifications

- UL Listed, E166051 (DC models only)
- UL Tested to Canadian safety standards
- CE (DC models only)
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

☹️ ☹️ See listing of compatible connector cables on [Page V8-T3-73](#).

① Includes potentiometer for adjustment of sensing range.

② Autoconfigure technology allows the sensor to automatically adapt to NPN or PNP without user intervention.

#### Note

① Small diameter DC unshielded models are rated at –40 °F (–40 °C). All other models can be operated at –40 °F (–40 °C), but range drift will occur.

### Nonmetallic Tubular Sensors

#### Product Description

E55 Tubular Inductive Proximity Sensors by Eaton’s Electrical Sector are constructed of corrosion resistant PBT plastic. They are ideally suited for wash down applications such as those found in food processing plants. They are available in 12 mm, 18 mm and 30 mm diameters, shielded or unshielded. Shielded units can be embedded in metallic surfaces.

#### Features

- Models available that operate on two-wire AC or three-wire DC power
- Threaded tubular housings in three diameters allow easy integration into new and existing applications
- Nonmetallic construction offers excellent resistance to corrosion
- Output indicator LED is standard on all models

#### Standards and Certifications

- CE
- RoHS Compliant

#### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## E52 Cube Style Sensors

### Product Description

The E52 Cube Sensor from Eaton's Electrical Sector is a high performance inductive proximity sensor, providing long sensing ranges in a compact, industry-standard package.

The E52 Cube family features Eaton's Autoconfigure output technology, which automatically detects NPN or PNP wiring states and switches the sensor accordingly, without user intervention. The E52 also utilizes complementary outputs to further reduce the number of models needed to cover a wide array of inductive sensing applications. Individual power and output LEDs make installation and troubleshooting easy. Combine the above features with the range and five-way mounting flexibility of the E52 Cube family, and chances are there's an E52 solution to your sensing needs.

The E52 Cube was designed with the most heavy-duty applications in mind. Some of those applications include automotive manufacturing, aggregate machinery, and metalworking applications. Try the E52 Cube in some your most demanding applications today.

### Application Description

#### Typical Applications

- Automotive manufacturing
- Metalworking
- Machinery OEMs
- Pipe and rod manufacturing
- Block and brick manufacturing equipment
- Amusement parks
- Heavy-duty trucks, cranes and lifts

### Features

- Long inductive proximity ranges available (up to 40 mm sensing distance)
- Four-wire DC models have complementary outputs (1NO-1NC)
- Four-wire DC models use auto-configure technology, which allows the sensor to automatically adapt for NPN or PNP without user intervention
- Robust design featuring vibration and impact-absorbing potting compound
- Ideal for extreme temperatures or high pressure washdown environments

### Standards and Certifications

- UL Listed, E166051
- UL Tested to Canadian safety standards
- CE (DC models only)
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

## E52 Rectangular Style Sensors

### Product Description

Rectangular E52 Inductive Proximity Sensors from Eaton's Electrical Sector feature a small, thin, compact space-saving design for applications where tubular type sensors cannot be used. Sensors are self-contained for direct connection to a logic circuit, relay, counter, programmable controller, and so on.

### Features

- Small, low-profile design for use in space restrictive applications
- Three-wire DC operation
- Choose from a variety of sizes, and side or end sensing configurations
- Output indicator included on all models
- Epoxy filled cavities stop fluids from contacting any electrical component
- Convenient mounting holes integrated into each sensor housing

### Standards and Certifications

- CE (except E52RAL)
- RoHS Compliant

### DANGER

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

### E55 Limit Switch Style Sensors with Nonmetallic Housings

#### Product Description

These sensors from Eaton's Electrical Sector feature PBT resin housings for high resistance to corrosion. The housing is sized to offer a direct replacement for standard limit switches. The unique sensing head is factory assembled for top sensing, but can be easily converted in the field to any one of four side sensing positions. Models are available with sensing ranges from 15 mm to 40 mm. The sensors can be wired for NO or NC operation.

#### Features

- Nonmetallic housing offers excellent resistance to corrosion
- Same form factor and mounting as standard limit switches for easy retrofit
- Sensor head features five sensing positions (top and all four sides) that can be easily changed in the field
- Long sensing ranges up to 40 mm

#### Standards and Certifications

- CE
- RoHS Compliant

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. #### E51 Modular Limit Switch Style Sensors

##### Product Description

The E51 Inductive Proximity Sensor family from Eaton's Electrical Sector combines high performance with a familiar limit switch style housing. Modular, plug-in components provide application flexibility, ease of maintenance, less downtime and reduced inventory. Choose from two-wire sensors with AC/DC operation, or four-wire sensors in either AC or DC styles. Connection options include terminal, mini-connector or various lengths of cable.

Choose from standard sensors that detect all types of metallic targets. The next page provides more detail on these sensors.

##### Features

- Rugged construction is ideal for industrial environments
- Viton gaskets ensure a positive seal and high resistance to industry chemicals
- Direct replacement for worn out limit switches
- Sensor heads and bodies feature captive screws to eliminate loss
- All sensor heads include a selector switch to program output function to either NO or NC
- Sensor bodies feature bifurcated engagement prongs for a reliable connection when plugging into receptacle stabs

- Engagement key between sensor body and receptacle prevents improper assembly
- Sensors accommodate both U.S. and DIN mounting dimensions
- Wiring terminals feature captive pressure plate saddles for #18 to #12 AWG wire. A green screw identified ground terminal is also included
- Logic modules are available to provide additional control functions

##### Standards and Certifications

- UL Listed, E166051, E183975
- CSA Certified, 50513
- RoHS Compliant

### Product Selection

#### Standard Sensors—Assembled with Terminal Wiring

Standard E51 sensors feature long sensing ranges and a choice of top or side sensing heads. Alternate frequency units eliminate interference when mounted close to standard frequency units. Order sensors in component form, as assembled plug-in units, or in a sealed version where the sensor body is factory assembled to an epoxy filled receptacle with tamper-proof screws to ensure a lasting seal.

##### Side Sensing

#### Notes

① All sensor heads feature a programmable output selector switch for NO or NC operation. Operation is as follows:

| For This Output Type: | Set Selector Position: |                |
|-----------------------|------------------------|----------------|
|                       | "TARGET"               | "NO TARGET"    |
| NO                    | Target present         | Target absent  |
| NC                    | Target absent          | Target present |

② Logic module must be ordered separately, see [Page V8-T3-91](#). These sensor bodies are rated NEMA 4, 4X and 13.

③ Receptacles feature terminal wiring with a 1/2 in NPT thread at the conduit entrance. Other connection options are available:

| Connection Option  | Catalog Number             | Code Suffix          | Example                      |
|--|----------------------------|----------------------|------------------------------|
| 20 mm thread at the conduit entrance   | —                          | <b>20</b>            | <b>E51ALT120</b>             |
| Mini-connector termination with epoxy filled receptacle, see <a href="#">Page V8-T3-92</a> for additional receptacle options | Two-wire, 3-pin connector  | <b>CSMS3F3CY1602</b> | <b>P3</b> <b>E51ALT1P3</b>   |

### Logic Module

#### Logic Module (for E51SCN Sensor Body Only)

| Type                  | Description   | Timing Range ④       | Catalog Number |
|-----------------------|---|----------------------|----------------|
| <b>Logic Module</b> ⑤ | ON and OFF delay<br>Adjustable delay between time object is sensed and time switch function occurs<br><br>Adjustable delay between time object leaves sensing field and time switch transfers back to non-sensing state | 0.15 to 15.0 seconds | <b>E51MTB</b>  |

#### Notes

- ① This sensor body is available in a factory-sealed, non plug-in configuration (with 8-ft cable), add **6P** to listed catalog number. Example: E51SAL**6P**.
- ② Sensor body is black. E51SCN sensor bodies are rated NEMA 4, 4X and 13.
- ③ This sensor accepts logic modules, as seen in chart above.
- ④ Repeatability of the timing cycle is ±1% at constant voltage, ambient temperature and reset time.
- ⑤ Reset time is 25 ms minimum. Rated NEMA 4, 4X and 13.

#### Technical Data and Specifications

##### E51 Modular Limit Switch Style Sensors

| Description                 | Specification  |
|-----------------------------|--|
| Output rating (NEMA D150)   |  |
| AC/DC models                | 0.5 A continuous   |
| AC models                   | 1 A continuous   |
| DC models                   | 0.6 A continuous   |
| Protection                  | Latching short-circuit protection on two-wire AC/DC models; DC models: resettable short-circuit protection |
| Switching rate              | AC models: 15 Hz; DC models: 50 Hz   |
| Indicator LEDs              | Lights when output is ON. One LED for each output  |
| Alternate frequency         | Standard and alternate frequencies allow side-by-side operation without interference                       |
| Enclosure material          | Zinc die cast  |
| Gasket material             | Viton  |
| Enclosure ratings           | NEMA 3, 3S, 4, 4X, 6, 6P, 12 and 13 (IP67); E51SCN sensor body only: NEMA 4, 4X and 13                     |
| Hazardous locations ratings |  |
| Class I                     | Division II—GRPS ABCD  |
| Class II                    | Division II—GRPS F and G   |
| Class III                   | Division 2   |
| Temperature range           | -13 to 158 °F (-25 to 70 °C)   |
| Torque requirements         | Switch body screws: 25–30 in-lbs; sensing head screws: 14–18 in-lbs  |
| Vibration                   | 10–55 Hz, 1 mm amplitude   |
| Shock                       | 30 g, 11 ms, 1/2 sine wave   |
| Humidity                    | 95% non-condensing   |
| Burden current              | <25 mA   |
| OFF-state leakage           | DC version: 120 µA; two-wire AC: 1.9 mA maximum; three-wire AC: 1.1 mA                                     |
| ON-state leakage            | <2.5 Vdc   |
| Power-up delay              | <150 ms  |

#### Wiring Diagrams

Pin numbers are for reference, rely on pin location when wiring.

##### E51 Modular Limit Switch Style Sensors

| Operating Voltage          | Output  | Terminal and Cable Models | Mini-Connector Models (Face View Male Shown) |
|----------------------------|---|---------------------------|--|
| <b>Two-Wire Sensors</b>    |   |                           |  |
| 20–264 Vac or Vdc 50/60 Hz | NO or NC (NO shown, can be changed to NC using switch on sensor head) |                           |  |
| <b>Four-Wire Sensors</b>   |   |                           |  |
| 120 Vac 50/60 Hz           | NO and NC ①   |                           |  |
| 10–30 Vdc                  | NO and NC NPN ①   |                           |  |
|                            | NO and NC PNP ①   |                           |  |

#### Note

① Changing output switch on sensor head will reverse output function (NO becomes NC, and NC becomes NO).

## E51 Limit Switch Style, Factory Sealed 6P+ Sensors

### Product Description

E51 6P+ Inductive Proximity Sensors from Eaton's Electrical Sector are fully sealed, pre-wired and designed specifically to ensure reliability under the most adverse of environmental conditions. They have been proven to withstand the penetrating properties of dirt, dust, grit, extreme temperatures and humidity. The unitized design eliminates plug-in connections that can lead to reliability problems in rugged environments.

### Features

- The one-piece body and sensing head are both epoxy filled to protect internal components from contamination
- The head is hard-wired to the sensor body to ensure trouble-free performance
- Choose from top and side sensing heads
- Side sensing heads can be rotated to any of four positions
- Mounting dimensions allow direct replacement of worn out limit switches
- Rugged zinc die cast construction withstands physical abuse
- Connection options include pre-wired cable, body mounted connector and pigtail connector

### Standards and Certifications

- UL Listed, E166051
- CSA Certified, 50513
- RoHS Compliant

### **⚠ DANGER**

**THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.**

#### Notes

① Switch bases feature 8 ft of S00W-A cable. Other connection options are available:

| Connection Option ④   | Instructions                                | Example               |
|---|---|-----------------------|
| Mini-connector mounted on 3 ft (0.9m) pigtail cable (3-pin for two-wire sensors; 5-pin for four-wire sensors) | Add the letter <b>T</b> before <b>U</b>     | <b>E51ALT16PTU</b>    |
| Mini-connector mounted to switch base (3-pin for two-wire sensors; 5-pin for four-wire sensors)               | Add the letter <b>C</b> before <b>U</b>     | <b>E51ALT16PCU</b>    |
| Cable longer than 8 ft, add required length in 1 ft increments to listed catalog number—20 ft maximum         | Add length in feet to end of catalog number | <b>E51ALT16PU12 ⑤</b> |

② Sensor head is hard wired to sensor body and cannot be detached. Side sensing head can be unfastened and rotated to any of four positions.

③ Sensor heads feature color coded target symbols: Yellow for standard frequency; Green for alternate frequency.

④ See listing of compatible connector cables above.

⑤ For 12 ft.

⑥ For a full selection of connector cables, see **Tab 10, section 10.1**.
