

What is the lowest temp range for non-emergency?

We can only use them at the lowest temperature that the impact testing was done. This was tested at +5C for a +10-40C rating, so +5C is the low temp limit.

How many LEDs are on the board?

Total LEDs is 8.

SD FI-FA switch on the LED board

FA option information (for FA only)

The 24VDC from the Fire Alarm panel is a constant 24VDC. The exit needs very, very little current, approximately 2mA.
