| Features                          | Specially designed for easy installation, Eaton's BR 1-inch load<br>centers house the branch circuit breakers and the wiring require<br>to distribute power to individual circuits. They serve as main<br>breaker for service entrances or as main lug when adding circuits<br>to existing service. The main breaker protects the entire panel<br>and can be used as a service disconnect. The branch breakers<br>protect the wires leading to individual electrical loads such as<br>fixtures and outlets. |
