## Product Overview

### Circuit Breaker Selection Guide

Description	Series G Molded Case Circuit Breaker		Universal Molded Case Circuit Breakers		QUICKLAG® Type QC Miniature Circuit Breakers
	Page V9-T1-5		Page V9-T1-13		Page V9-T1-19
<b>General Applications</b>	Line protection—molded case switch, motor circuit protection (combination tested with Eaton starters and contactors) thermal-magnetic and electronic trip units.		Line protection—feeder and branch thermal-magnetic trip unit.		Used to provide branch circuit protection in cable-in/out panel or DIN rail mount applications.
<b>Technical Data</b>					
Maximum current rating	2500A		600A		100A
Maximum voltage—AC	690 Vac		480 Vac		240 Vac
Maximum voltage—DC	250 Vdc		250 Vdc		80 Vdc
Poles	1, 2, 3, 4		1, 2, 3		QC = 1, 2, 3, 4 QCD = 1, 2, 3 QCR/QCF = 1, 2, 3

**Series NRX  
Low Voltage Power Breakers**

**Magnum  
Low Voltage Power Breakers**

Description	Series NRX Low Voltage Power Breakers Page V9-T1-33	Magnum Low Voltage Power Breakers Page V9-T1-36
<b>General Applications</b>		
	Solution for where space is at a premium or when equipment dimensions are critical when upgrading or retrofitting current systems. Offering the power and performance of a power breaker in the compact size of a molded case breaker. With its reduced weight and compact dimensions, you can mount two times as many feeder breakers and reduce the overall enclosure density up to 50%.	Enables comprehensive solutions to meet and exceed the unique and wide-ranging requirements of today's global power distribution systems. Designed and engineered for ultimate custom configuration and application flexibility in metal enclosed switchgear and power distribution enclosures.

Series G Molded Case Circuit Breakers

Features

- Field-fit accessories
- Common accessories through 630A
- Space-saving footprint
- High-performance current limiting designs up to 200 kAIC at 480V
- Global ready: UL, CSA, CE, IEC, KEMA-KEUR listings
- Complete breaker includes frame, trip unit, standard terminals and mounting hardware

Catalog Number Selection

Series G® Molded Case Circuit Breakers

EG Frame

Notes

- ① Available only as 125 and 160A sizes.
- ② Is not UL rated.

# 1.1

#### Notes

- ① Motor FLA ranges are typical. The corresponding trip setting is at 13 times the minimum FLA value shown. Where a 13 times setting is required for an intermediate FLA value, alternate cam settings and/or MCP ratings should be used.
- ② For DC applications, actual trip levels are approximately 40% higher than values shown.
- ③ Settings above 10 x I<sub>n</sub> are for special applications, where the ampere rating of the disconnecting means cannot be less than 115% of the motor full load ampere rating.

**Series G Motor Protector Breakers****Features**

- Eliminates need for separate overload relay
- Can be used with contactor to eliminate need for overload relay and still create manual motor control
- Meets requirement for motor branch protection, including:
  - Disconnecting means
  - Branch circuit short-circuit protection
  - Overload protection
- UL 489 listed, IEC 60947-02 rated
- Phase unbalance, phase loss protection and high load alarm
- Optional pre-detection trip relay

**Product Selection****Series G Motor Protector Breakers**

For pre-trip alarm option, order Style Number 5721B31G02.

## Notes

- ① Compatible with three-pole and four-pole EG breakers only.  
 ② Provision only.  
 ③ See Volume 4—Circuit Protection, CA08100005E, Tab 2, for bolt projection dimensions.  
 ④ Castell bolt mounting hole must be 10 mm.  
 ⑤ Requires two breakers.

Universal Molded Case Circuit Breakers

Features

- Universal design for both NEMA® (UL 489) and IEC (IEC 947-2) standards
- Suitable for 50°C application
- Factory-sealed thermal magnetic trip unit
- Standard interrupting ratings
- Includes mounting hardware and terminals

## Circuit Protection

### Circuit Breakers

1

#### QUICKLAG Type QC Miniature Circuit Breakers—Cable-In/Cable-Out Type QCD

#### Features

For Cable-In/Cable-Out DIN rail Mount HVAC Applications

- Single-, two- and three-pole options
- Modular construction
- DIN mounted (symmetrical rail 35 in x 7.5 in DIN/EN 50 022)
- Flexible power feed connection: wire size, position
- Same breaker size for entire rating range
- Field-mountable accessories: finger-shroud proof, quick connect terminals, jumper units

**Notes**

- ① Standard breaker terminals are box type lugs.
- ② Breakers with "T" catalog number suffix are suitable for line and load side ring terminal connection (#10-32 plus/minus terminal screw provided).
- ③ Breakers with "P" catalog number suffix are suitable for terminating two 10 AWG quick-connect type terminals per phase on breaker load side.
- ④ Breakers with shunt trip (extra pole required on breaker right-hand side) are available on single-, two- and three-pole.
- ⑤ All 15 and 20A single-pole breakers are SWD (switching duty) rated for fluorescent lighting applications.
- ⑥ 60/75°C Cu/Al wire on all ratings except 60A, which requires Cu only conductor.

#### Accessories

##### Type QCR and QCF

Description	Catalog Number
Steel mounting clip mounts QCR breaker if individual mounting is required. Quantity two required for single- and two-pole and four required for three-pole breakers.	<b>QCRMTGFT</b>
Removable padlock device for single-pole QCR or QCF breaker.	<b>QCRFPL1P</b>
Removable padlock device for multi-pole QCR or QCF breaker.	<b>QCRFPLMP</b>
Padlock bracket assembly for QCR or QCF single- or multi-pole breakers (OFF only).	<b>QCRFLOFF</b>
Padlock bracket for QCR, lock-off only.	<b>QCRPLOFF</b>
QUICKLAG Type C Spacer	<b>QCRSPACER</b>

##### QUICKLAG Type C Spacer

##### QCR and QCF Ring or Spade Lug Terminals

QCR and QCF ring or spade lug terminals (10–30A ratings only). Factory installed line and load side terminals each equipped with a #10-32 screw suitable for terminating one 10 AWG wire with insulated ring or spade type terminal as shown.

**Suffix "T"**

**QUICKLAG Type QC Miniature Circuit Breakers—Cable-In/Cable-Out

## Accessories

## Type QC Miniature Circuit Breakers

	Accessory <sup>①</sup>	Description	Catalog Number
<b>Handle Locks</b> 	Handle locks: Non-padlockable <sup>②</sup>	QUICKLAG type P, B, C—single-pole	<b>QL1NPL</b>
		QUICKLAG type P, B, C—two-, three-pole	<b>QL23NPL</b>
	Handle locks: Padlockable	QUICKLAG type P, B, C—single-pole	<b>QL1PL</b>
		QUICKLAG type C—single-, two-, three-pole	<b>QC123PL</b>
		QUICKLAG type C—single-, two-, three-pole (off only)	<b>QCD123PLOFF</b>
<b>Handle Tie</b> 	Handle tie	QUICKLAG handle tie—single-pole	<b>QL1HT</b>
		QUICKLAG handle tie—three-pole	<b>QL3HT</b>
<b>Hardware</b> 	Mounting hardware	QUICKLAG type C face mounting clip	<b>QCFLIP</b>
		QUICKLAG type C face mounting plate—single-pole	<b>QC1FP</b>
		QUICKLAG type C face mounting plate—two-pole	<b>QC2FP</b>
		QUICKLAG type C face mounting plate—three-pole	<b>QC3FP</b>
		QUICKLAG type C face mounting plate and lock-off (off only)—two-pole <sup>③</sup>	<b>QC2FPLOFF</b>
		QUICKLAG type C face mounting plate and lock-off (off only)—three-pole	<b>QC3FPLOFF</b>
		QUICKLAG type C base mounting clamp	<b>QCBCLIP</b>
		QUICKLAG base mounting plate—six poles total	<b>QC6BP</b>
		QUICKLAG type C base mounting plate, six-poles total— heavy-duty screw-secured	<b>QC6BPS</b>
		QUICKLAG type C (QCD) two-way jumper unit with cover	<b>QCDJ2</b>
		QUICKLAG type C (QCD) four-way jumper unit with cover	<b>QCDJ4</b>
		QUICKLAG type C (QCD) six-way jumper unit with cover	<b>QCDJ6</b>
		QUICKLAG type C (QCD) two-way jumper unit, no cover	<b>QCDJ2T</b>
		QUICKLAG type C (QCD) four-way jumper unit, no cover	<b>QCDJ4T</b>
		QUICKLAG type C (QCD) six-way jumper unit, no cover	<b>QCDJ6T</b>
		QUICKLAG type QCD finger protection attachment	<b>QCDFP</b>
	QUICKLAG type C DIN rail adapter	<b>QCDINADAPT</b>	

**Notes**

- ① See **Page V9-T1-22** for QCR and QCF accessories.
- ② Can lock in ON or OFF position.
- ③ Suitable for ground fault breakers.

FAZ-NA UL 489 Circuit Breakers

Features

- UL 489 listed DIN rail mounted miniature circuit breakers up to 40A current rating
- Current limiting design provides fast short-circuit interruption that reduces let-through energy
- Thermal-magnetic overcurrent protection
  - Three levels of short-circuit protection, categorized by B, C and D curves
- Ring-tongue terminals available
- Complete line of accessories

Catalog Number Selection

FAZ-NA UL 489 Circuit Breakers

FAZ-NA UL 489

Notes

- ①  $I_n$  = Rated current for instantaneous trip characteristics.
- ② B curve starts at 1 ampere.

## Circuit Protection

### Circuit Breakers

1

#### FAZ UL 1077 Circuit Breakers

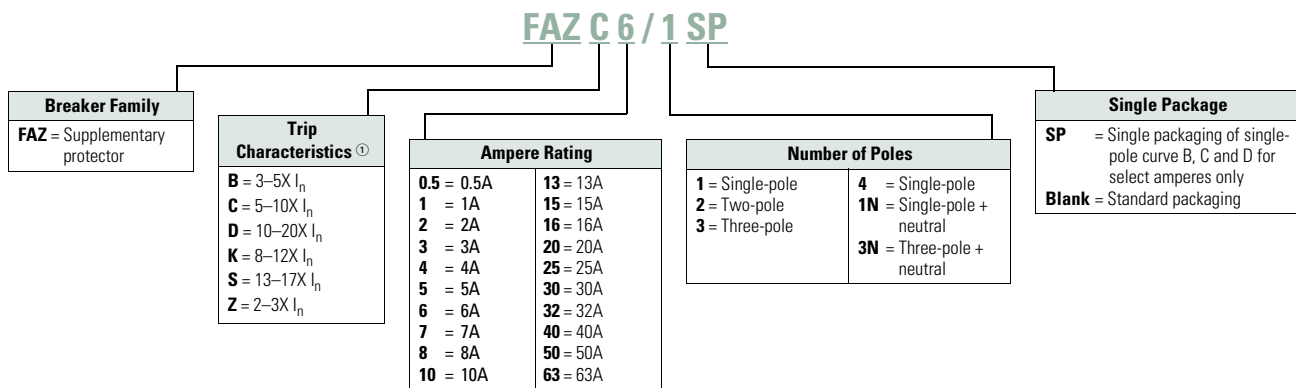

#### Features

- UL 1077 recognized DIN rail mounted supplemental protectors up to 63A
- Current limiting design provides fast short-circuit interruption that reduces let-through energy
- Thermal-magnetic overcurrent protection
  - Three levels of short-circuit protection, categorized by B, C and D curves
- Ideal replacement for fuses that are applied as supplemental protection
- Complete line of accessories

## Pin Type Incoming Supply Terminals

Description	Catalog Number
Accommodates conductors from 6–35 mm <sup>2</sup> /#10–2 AWG 4–5.5 Nm/35–50 lb-in / Two- and three-pole	BB-UL-TEP/35

## Pin Type Incoming Supply Terminals—Single-Phase Only

Description	Catalog Number
Accommodates conductors from 6–35 mm <sup>2</sup> /#10–2 AWG 4–5.5 Nm/35–50 lb-in	BB-UL-TEPA/35

## Protective Accessories

Description	Catalog Number
For covering unused terminals	BB-IP/5
Prevents reactivation of the device during maintenance Holds one padlock	IS/SPE-1TE

## Bus Incoming Supply Terminals

Description	Catalog Number
50 mm <sup>2</sup> #14–1 AWG 75 Deg wire 115 A/Y, 480V UL 160 A/Y 690V IEC	BB-UL-TE/50

## Busbar End Cap

Description	Poles	Catalog Number
Install after cutting busbar	2 and 3	BB-UL-EC/3
Protects end of busbar	1	BB-UL-EC/1

## Notes

- ① Voltage of FAZ-NA circuit breaker is limited to 300V with this auxiliary contact installed.
- ② Do not cut commoning link.
- ③ A maximum of three commoning links may be used in conjunction. Each breaker connected to the commoning link must have the same number of poles for proper use.
- ④ Not for use with ring-tongue circuit breakers.
- ⑤ Bus may be center fed for high current capacity.

**Series NRX Low Voltage Power Breakers****Series NRX™ Low Voltage Power Breakers****Features**

- Rogowski coil does not saturate like iron core sensors, and one sensor accommodates 200–1600A range. Never change a sensor, and NO CTs are required
- Tension clamp secondary terminals—10A continuous rating at 600V meets UL/CSA/RoHS and UL-94 V0. Mounted directly to fixed breaker or drawout cassette they reduce wiring and provide clean, organized wiring schemes
- Breaker mounted communication modules for INCOM™, Modbus® and PROFIBUS® mount directly to the cassette, reducing the space and room required for communication capability
- With the patent pending simple design of the fold-up cassette, all items in a cassette are replaceable without removing the cassette from the cell
- Plug-and-play accessories—no special tools needed. Accessories come with plug and wires ready to install

Notes

- ① See Page V9-T1-34 for cassette selection for drawout breakers.
- ② See selection above for accessories in positions 12–20.

**Magnum Low Voltage Power Breakers****Features**

- Rated up to 6300A with interrupting ratings up to 200 kAIC and withstand ratings up to 100 kAIC
- Magnum® DS is UL 1066 listed for one-half second short-time withstand rating, and rated for 30 cycles. It is a switchgear class product to meet UL 1558 switchgear standards
- Magnum SB is a UL 1066 listed product with one-half second short-time withstand rating at three cycles to meet switchboard class product specifications, such as UL 891
- Magnum DS MDDX is the highest interrupting performance in a non-current limiting breaker construction rated up to 200 kAIC with 100 kAIC short-time withstand
- The Magnum DS, Magnum SB and Magnum IEC lines all offer the smallest double narrow 4000A frame available

#### Notes

- ① Interrupting ratings shown based on breaker equipped with integral Digitrip RMS trip unit. Interruption ratings for non-automatic breakers are equal to the published short time current rating. These interruption ratings are based on the standard duty cycle consisting of an open operation, a 15-second interval and a close-open operation, in succession, with delayed tripping in case of short-delay devices. The standard duty cycle for short time ratings consists of maintaining the rated current for two periods of 1/2 seconds each, with a 15-second interval of zero current between the two periods.
- ② See **Page V9-T1-40** for selection of trip unit and accessories. See **Page V9-T1-40** for cassette selection for drawout breakers.
- ③ Magnum MDSL current limiting power circuit breaker with integral current limiters. Current limiter selected determines short time and maximum instantaneous trip rating. Maximum voltage rating is 600 Vac.
- ④ Product to be tested. Contact Eaton for product rating.
- ⑤ Magnum MDSX current limiting power circuit breaker with fast opening contacts.
- ⑥ Contact Eaton for availability.
- ⑦ Breaker applied in a tested fan-cooled enclosure.

**Product Overview****Fuse Blocks and Fuse Holders**

<b>Description</b>	<b>C350 Series</b>
	<b>Page V9-T1-45</b>
<b>Technical Data</b>	
Number of poles	Up to 3
Mounting	35 mm flat or 32 mm asymmetrical DIN rail (with optional adapter)
Terminal ratings	600V, 30A
Housing construction	Thermoplastic UL 94V0 flammability rating
Clip/terminal construction	Tin-plated copper alloy
Screw/pressure plate construction	Zinc-plated steel
Dielectric strength	1200V
<b>Approvals</b>	
	UL, CSA

For our complete product offering, see Volume 4—Circuit Protection, CA08100005E.

**C350 Series Fuse Blocks and Fuse Holders**

**Features**

- Space-saving design
- Rated 600V, 30A
- UL approved for motor loads

## Open Rotary Disconnects

### Product Overview

#### Rotary Disconnect Switch Selection Guide

**R5 Series  
Non-Fusible 16–80A**

**R9 Series  
Non-Fusible 30–100A Compact**

**R9 Series  
Non-Fusible 100–1200A**

#### Description

**Page V9-T1-48**

**Page V9-T1-50**

**Page V9-T1-52**

#### Product Description

R5 Series (UL 508 listed) products are manually operated modular switches. Load break switching and isolation provide safety solutions for any low voltage circuit, particularly for machine and control circuits. The R5 Series products are manual motor controllers suitable as motor disconnect.

The R9 Series (UL 98 listed) non-fusible 30–100A compact range ensures making or breaking on load and safety isolation for low voltage electrical circuits, particularly for machine control circuits up to 600V.

The R9 Series (UL 98 listed) non-fusible 100–1200A are manually operated multipole load-break switches. Quick-make, quick-break design provides safety isolation for any low voltage circuit.

#### Approvals

#### Description

**Page V9-T1-54**

**Page V9-T1-59**

**Page V9-T1-60**

#### Product Description

R9 Series (UL 98 listed) Fusible 30–800A manual operated multi-pole fusible disconnect switches use double break contacts per pole that ensure complete isolation of the fuse when the switch is in the OFF position.

When installed with fuses, they provide protection for low voltage electrical installations against short circuit and overload.

UL listed disconnect switches 600 Vdc for photovoltaic applications 100 to 400A

R9 Series (UL 98 listed) DC rated disconnects are manually operated multi-pole load break switches. They provide safety isolation for any low voltage circuit in a photovoltaic application.

R9 Series (UL 98 listed) non-fusible disconnects are heavy-duty manual transfer switches, they transfer load manually between two low voltage circuits and provide safety disconnection.

These switches are extremely durable and are tested and approved for use in the most demanding applications as resistive load or total system applications.

**Notes**

- ① Top (line side) supplied as standard.
- ② Auxiliary contact requires holder (catalog number ACHFG) when used on F and G Frame switches (non-fusible 600–1200A).
- ③ Each catalog number is for line or load side. For both line and load, please order two sets.

1

#### Fusible 30–800A

#### Features

- Load break functionality
- Double break contacts
- Up to 200 kA short-circuit rating with Class CC, J or L fuses
- Compact footprints
- Defeatable pistol handles automatically re-latch when the panel door is closed
- Front or right side operation
- NFPA 79 compliant kits
- Two-, three- and four-pole devices

#### R9 Series Fusible 30–800A

##### R9 Fusible 30A/CC and 30A/J (H Frame)— Direct and External Operation

#### Product Identification

- ① External front handles
- ② Direct handle
- ③ Shaft extensions for external handles
- ④ Configurable U Type ACs, for pre-break and signaling or TEST

##### R9 Fusible 30A/J–800A/L (I–N Frames)— Direct and External Operation

#### Product Identification

- ① External front handles
- ② External right side handle (not applicable for N Frame 600/800A)
- ③ Direct handle
- ④ Shaft extensions for external handles
- ⑤ Configurable U Type ACs, for pre-break and signaling or TEST
- ⑥ Side auxiliary contacts
- ⑦ Terminal shrouds

Notes

- ① Defeatable handle.
- ② Top (line side).
- ③ Bottom (load side).
- ④ Top or bottom (line or load side).

**Manual Transfer Switches****Features**

- Three load break positions (I, 0, II)
- On load switching
- Direct or external handle
- 480 Vac total system
- 600 Vac resistive load

**Manual Transfer Switches****Product Identification**

- ① External front handle
- ② Direct handle
- ③ Shaft extension for external handle
- ④ Pre-break ACs (standard on 600–1200A)
- ⑤ Terminal Screen

**Notes**

- ① All ratings, 100–1200A, are UL 98 listed. Switches are to be UL 1008 listed in 2011.
- ② Line or load (top or bottom); for both line and load, order two kits.
- ③ Low level auxiliary contact—gold plated for minimal resistance—for PLC applications.

**Enclosed Rotary Disconnects****Features**

- Padlockable in the OFF position (up to three padlocks) to meet OSHA lockout requirements
- Available in 16–80A ratings
- 600 Vac, three- and four-pole non-fusible device
- Rated for making and breaking loads
- Accepts auxiliary contacts; capability to signal PLC controllers
- Ground lug connection provided
- Possibility of adding one power pole and one auxiliary contact
- NEMA Type 1, 3R, 12, 4, 4X
- 65kAIC rating when applied downstream from appropriate fusing

**Enclosed Rotary Disconnects**

Provide users with the ability to lock directly wired motor loads in the OFF position to comply with OSHA lockout/tagout regulations. Also for machine applications that require compact, economical disconnect switches.

Enclosed rotary disconnect switches allow safe control and safe disconnect of any motor application.

Open rotary disconnects can be found on **Pages V9-T1-46 to V9-T1-61** and full information in Volume 5, Motor Control and Protection, CA08100006E, Tab 8.

## Notes

- ① For CSA listed switches, add prefix letter "C" to the front of the catalog number.
- ② NEMA Type 12 enclosures (16–80A) can be field modified to meet NEMA Type 3R rainproof requirements when a factory-provided drain hole is opened.
- ③ YR suffix indicates **Y**ellow cover with **R**ed handle. For **G**ray cover with **B**lack handle, replace "YR" with "GB." For **G**ray cover with **R**ed handle, replace "YR" with "GR."
- ④ cULus only.
- ⑤ Ordered and shipped as separate components—not integral to enclosed device.
- ⑥ Enclosed disconnects can accept one power pole, neutral or up to two auxiliary contacts (one mounted on either side of switch).
- ⑦ Available 2011.

Contact the Safety Switch Flex Center (1-888-329-9272) for factory-installed accessories or other special modifications.

Miniature Circuit Breakers—  
Supplementary Protectors

## Description

Page V9-T1-25

Page V9-T1-28

## General Applications

Used to provide branch circuit protection in cable-in/out DIN rail mount applications.

Used to provide overcurrent protection where branch protection (for example UL 489 MCCB) is already provided or not required. Replacement for fuses used as supplementary protectors.

## Technical Data

Maximum current rating	40A	63A

**Series NRX  
Low Voltage Power Breakers**

**Magnum  
Low Voltage Power Breakers**

Description	Series NRX Low Voltage Power Breakers Page V9-T1-33	Magnum Low Voltage Power Breakers Page V9-T1-36
<b>General Applications</b>		
	Solution for where space is at a premium or when equipment dimensions are critical when upgrading or retrofitting current systems. Offering the power and performance of a power breaker in the compact size of a molded case breaker. With its reduced weight and compact dimensions, you can mount two times as many feeder breakers and reduce the overall enclosure density up to 50%.	Enables comprehensive solutions to meet and exceed the unique and wide-ranging requirements of today's global power distribution systems. Designed and engineered for ultimate custom configuration and application flexibility in metal enclosed switchgear and power distribution enclosures.

Series G Molded Case Circuit Breakers

Features

- Field-fit accessories
- Common accessories through 630A
- Space-saving footprint
- High-performance current limiting designs up to 200 kAIC at 480V
- Global ready: UL, CSA, CE, IEC, KEMA-KEUR listings
- Complete breaker includes frame, trip unit, standard terminals and mounting hardware

Catalog Number Selection

Series G® Molded Case Circuit Breakers

EG Frame

Notes

- ① Available only as 125 and 160A sizes.
- ② Is not UL rated.

# 1.1

#### Notes

- ① Motor FLA ranges are typical. The corresponding trip setting is at 13 times the minimum FLA value shown. Where a 13 times setting is required for an intermediate FLA value, alternate cam settings and/or MCP ratings should be used.
- ② For DC applications, actual trip levels are approximately 40% higher than values shown.
- ③ Settings above 10 x I<sub>n</sub> are for special applications, where the ampere rating of the disconnecting means cannot be less than 115% of the motor full load ampere rating.

**Series G Motor Protector Breakers****Features**

- Eliminates need for separate overload relay
- Can be used with contactor to eliminate need for overload relay and still create manual motor control
- Meets requirement for motor branch protection, including:
  - Disconnecting means
  - Branch circuit short-circuit protection
  - Overload protection
- UL 489 listed, IEC 60947-02 rated
- Phase unbalance, phase loss protection and high load alarm
- Optional pre-detection trip relay

**Product Selection****Series G Motor Protector Breakers**

For pre-trip alarm option, order Style Number 5721B31G02.

#### Notes

- ① Compatible with three-pole and four-pole EG breakers only.
- ② Provision only.
- ③ See Volume 4—Circuit Protection, CA08100005E, Tab 2, for bolt projection dimensions.
- ④ Castell bolt mounting hole must be 10 mm.
- ⑤ Requires two breakers.

Universal Molded Case Circuit Breakers

Features

- Universal design for both NEMA® (UL 489) and IEC (IEC 947-2) standards
- Suitable for 50°C application
- Factory-sealed thermal magnetic trip unit
- Standard interrupting ratings
- Includes mounting hardware and terminals

### Circuit Breakers

1

#### QUICKLAG Type QC Miniature Circuit Breakers—Cable-In/Cable-Out Type QCD

#### Features

For Cable-In/Cable-Out DIN rail Mount HVAC Applications

- Single-, two- and three-pole options
- Modular construction
- DIN mounted (symmetrical rail 35 in x 7.5 in DIN/EN 50 022)
- Flexible power feed connection: wire size, position
- Same breaker size for entire rating range
- Field-mountable accessories: finger-shroud proof, quick connect terminals, jumper units

**Notes**

- ① Standard breaker terminals are box type lugs.
- ② Breakers with "T" catalog number suffix are suitable for line and load side ring terminal connection (#10-32 plus/minus terminal screw provided).
- ③ Breakers with "P" catalog number suffix are suitable for terminating two 10 AWG quick-connect type terminals per phase on breaker load side.
- ④ Breakers with shunt trip (extra pole required on breaker right-hand side) are available on single-, two- and three-pole.
- ⑤ All 15 and 20A single-pole breakers are SWD (switching duty) rated for fluorescent lighting applications.
- ⑥ 60/75°C Cu/Al wire on all ratings except 60A, which requires Cu only conductor.

#### Accessories

**Notes**

- ① See **Page V9-T1-22** for QCR and QCF accessories.
- ② Can lock in ON or OFF position.
- ③ Suitable for ground fault breakers.

FAZ-NA UL 489 Circuit Breakers

Features

- UL 489 listed DIN rail mounted miniature circuit breakers up to 40A current rating
- Current limiting design provides fast short-circuit interruption that reduces let-through energy
- Thermal-magnetic overcurrent protection
  - Three levels of short-circuit protection, categorized by B, C and D curves
- Ring-tongue terminals available
- Complete line of accessories

Catalog Number Selection

FAZ-NA UL 489 Circuit Breakers

FAZ-NA UL 489

Notes

- ① I<sub>n</sub> = Rated current for instantaneous trip characteristics.
- ② B curve starts at 1 ampere.

# 1.1

## Circuit Protection

### Circuit Breakers

1

#### FAZ UL 1077 Circuit Breakers

#### Features

- UL 1077 recognized DIN rail mounted supplemental protectors up to 63A
- Current limiting design provides fast short-circuit interruption that reduces let-through energy
- Thermal-magnetic overcurrent protection
  - Three levels of short-circuit protection, categorized by B, C and D curves
- Ideal replacement for fuses that are applied as supplemental protection
- Complete line of accessories

#### Catalog Number Selection

##### FAZ UL 1077 Circuit Breakers

##### FAZ UL 1077

**Note**

①  $I_n$  = Rated current for instantaneous trip characteristics.

#### Notes

- <sup>①</sup> In North America, these switches are UL recognized and CSA Certified as supplementary protection devices. Per the intent of NEC (National Electrical Code), Article 240, and CEC (Canadian Electrical Code), Part 1 C22.1, supplementary breakers cannot be used as a substitute for the branch circuit protective device. They can be used to provide overcurrent protection within an appliance or other electrical equipment where branch circuit overcurrent protection is already provided, or is not required.
- <sup>②</sup> Option for single packaging on single-pole B, C and D curves only; add suffix SP when ordering.

**Notes**

- <sup>①</sup> In North America, these switches are UL recognized and CSA Certified as supplementary protection devices. Per the intent of NEC (National Electrical Code), Article 240, and CEC (Canadian Electrical Code), Part 1 C22.1, supplementary breakers cannot be used as a substitute for the branch circuit protective device. They can be used to provide overcurrent protection within an appliance or other electrical equipment where branch circuit overcurrent protection is already provided, or is not required.
- <sup>②</sup> Option for single packaging on single-pole B, C and D curves only; add suffix SP when ordering.
- <sup>③</sup> IEC 60947-2 only.

## Pin Type Incoming Supply Terminals

Description	Catalog Number
Accommodates conductors from 6–35 mm <sup>2</sup> /#10–2 AWG 4–5.5 Nm/35–50 lb-in / Two- and three-pole	BB-UL-TEP/35

## Pin Type Incoming Supply Terminals—Single-Phase Only

Description	Catalog Number
Accommodates conductors from 6–35 mm <sup>2</sup> /#10–2 AWG 4–5.5 Nm/35–50 lb-in	BB-UL-TEPA/35

## Protective Accessories

Description	Catalog Number
For covering unused terminals	BB-IP/5
Prevents reactivation of the device during maintenance Holds one padlock	IS/SPE-1TE

## Bus Incoming Supply Terminals

Description	Catalog Number
50 mm <sup>2</sup> #14–1 AWG 75 Deg wire 115 A/Y, 480V UL 160 A/Y 690V IEC	BB-UL-TE/50

## Busbar End Cap

Description	Poles	Catalog Number
Install after cutting busbar	2 and 3	BB-UL-EC/3
Protects end of busbar	1	BB-UL-EC/1

## Notes

- ① Voltage of FAZ-NA circuit breaker is limited to 300V with this auxiliary contact installed.
- ② Do not cut commoning link.
- ③ A maximum of three commoning links may be used in conjunction. Each breaker connected to the commoning link must have the same number of poles for proper use.
- ④ Not for use with ring-tongue circuit breakers.
- ⑤ Bus may be center fed for high current capacity.

**Series NRX Low Voltage Power Breakers****Series NRX™ Low Voltage Power Breakers****Features**

- Rogowski coil does not saturate like iron core sensors, and one sensor accommodates 200–1600A range. Never change a sensor, and NO CTs are required
- Tension clamp secondary terminals—10A continuous rating at 600V meets UL/CSA/RoHS and UL-94 V0. Mounted directly to fixed breaker or drawout cassette they reduce wiring and provide clean, organized wiring schemes
- Breaker mounted communication modules for INCOM™, Modbus® and PROFIBUS® mount directly to the cassette, reducing the space and room required for communication capability
- With the patent pending simple design of the fold-up cassette, all items in a cassette are replaceable without removing the cassette from the cell
- Plug-and-play accessories—no special tools needed. Accessories come with plug and wires ready to install

Notes

- ① See Page V9-T1-34 for cassette selection for drawout breakers.
- ② See selection above for accessories in positions 12–20.

**Magnum Low Voltage Power Breakers****Features**

- Rated up to 6300A with interrupting ratings up to 200 kAIC and withstand ratings up to 100 kAIC
- Magnum® DS is UL 1066 listed for one-half second short-time withstand rating, and rated for 30 cycles. It is a switchgear class product to meet UL 1558 switchgear standards
- Magnum SB is a UL 1066 listed product with one-half second short-time withstand rating at three cycles to meet switchboard class product specifications, such as UL 891
- Magnum DS MDDX is the highest interrupting performance in a non-current limiting breaker construction rated up to 200 kAIC with 100 kAIC short-time withstand
- The Magnum DS, Magnum SB and Magnum IEC lines all offer the smallest double narrow 4000A frame available

#### Notes

- ① Interrupting ratings shown based on breaker equipped with integral Digitrip RMS trip unit. Interruption ratings for non-automatic breakers are equal to the published short time current rating. These interruption ratings are based on the standard duty cycle consisting of an open operation, a 15-second interval and a close-open operation, in succession, with delayed tripping in case of short-delay devices. The standard duty cycle for short time ratings consists of maintaining the rated current for two periods of 1/2 seconds each, with a 15-second interval of zero current between the two periods.
- ② See **Page V9-T1-40** for selection of trip unit and accessories. See **Page V9-T1-40** for cassette selection for drawout breakers.
- ③ Magnum MDSL current limiting power circuit breaker with integral current limiters. Current limiter selected determines short time and maximum instantaneous trip rating. Maximum voltage rating is 600 Vac.
- ④ Product to be tested. Contact Eaton for product rating.
- ⑤ Magnum MDSX current limiting power circuit breaker with fast opening contacts.
- ⑥ Contact Eaton for availability.
- ⑦ Breaker applied in a tested fan-cooled enclosure.

**Product Overview****Fuse Blocks and Fuse Holders**

<b>Description</b>	<b>C350 Series</b>
	<b>Page V9-T1-45</b>
<b>Technical Data</b>	
Number of poles	Up to 3
Mounting	35 mm flat or 32 mm asymmetrical DIN rail (with optional adapter)
Terminal ratings	600V, 30A
Housing construction	Thermoplastic UL 94V0 flammability rating
Clip/terminal construction	Tin-plated copper alloy
Screw/pressure plate construction	Zinc-plated steel
Dielectric strength	1200V
<b>Approvals</b>	
	UL, CSA

For our complete product offering, see Volume 4—Circuit Protection, CA08100005E.

**C350 Series Fuse Blocks and Fuse Holders**

**Features**

- Space-saving design
- Rated 600V, 30A
- UL approved for motor loads

**Page V9-T1-50**

**Page V9-T1-52**

#### Product Description

R5 Series (UL 508 listed) products are manually operated modular switches. Load break switching and isolation provide safety solutions for any low voltage circuit, particularly for machine and control circuits. The R5 Series products are manual motor controllers suitable as motor disconnect.

The R9 Series (UL 98 listed) non-fusible 30–100A compact range ensures making or breaking on load and safety isolation for low voltage electrical circuits, particularly for machine control circuits up to 600V.

The R9 Series (UL 98 listed) non-fusible 100–1200A are manually operated multipole load-break switches. Quick-make, quick-break design provides safety isolation for any low voltage circuit.

**Page V9-T1-59**

**Page V9-T1-60**

#### Product Description

R9 Series (UL 98 listed) Fusible 30–800A manual operated multi-pole fusible disconnect switches use double break contacts per pole that ensure complete isolation of the fuse when the switch is in the OFF position.

When installed with fuses, they provide protection for low voltage electrical installations against short circuit and overload.

UL listed disconnect switches 600 Vdc for photovoltaic applications 100 to 400A

R9 Series (UL 98 listed) DC rated disconnects are manually operated multi-pole load break switches. They provide safety isolation for any low voltage circuit in a photovoltaic application.

R9 Series (UL 98 listed) non-fusible disconnects are heavy-duty manual transfer switches, they transfer load manually between two low voltage circuits and provide safety disconnection.

These switches are extremely durable and are tested and approved for use in the most demanding applications as resistive load or total system applications.

Notes

- ① Defeatable handle.
- ② Top (line side).
- ③ Bottom (load side).
- ④ Top or bottom (line or load side).

**Manual Transfer Switches****Features**

- Three load break positions (I, 0, II)
- On load switching
- Direct or external handle
- 480 Vac total system
- 600 Vac resistive load

**Manual Transfer Switches****Product Identification**

- ① External front handle
- ② Direct handle
- ③ Shaft extension for external handle
- ④ Pre-break ACs (standard on 600–1200A)
- ⑤ Terminal Screen

**Notes**

- ① All ratings, 100–1200A, are UL 98 listed. Switches are to be UL 1008 listed in 2011.
- ② Line or load (top or bottom); for both line and load, order two kits.
- ③ Low level auxiliary contact—gold plated for minimal resistance—for PLC applications.

**Enclosed Rotary Disconnects****Features**

- Padlockable in the OFF position (up to three padlocks) to meet OSHA lockout requirements
- Available in 16–80A ratings
- 600 Vac, three- and four-pole non-fusible device
- Rated for making and breaking loads
- Accepts auxiliary contacts; capability to signal PLC controllers
- Ground lug connection provided
- Possibility of adding one power pole and one auxiliary contact
- NEMA Type 1, 3R, 12, 4, 4X
- 65kAIC rating when applied downstream from appropriate fusing

**Enclosed Rotary Disconnects**

Provide users with the ability to lock directly wired motor loads in the OFF position to comply with OSHA lockout/tagout regulations. Also for machine applications that require compact, economical disconnect switches.

Enclosed rotary disconnect switches allow safe control and safe disconnect of any motor application.

Open rotary disconnects can be found on **Pages V9-T1-46 to V9-T1-61** and full information in Volume 5, Motor Control and Protection, CA08100006E, Tab 8.

## Notes

- ① For CSA listed switches, add prefix letter "C" to the front of the catalog number.
- ② NEMA Type 12 enclosures (16–80A) can be field modified to meet NEMA Type 3R rainproof requirements when a factory-provided drain hole is opened.
- ③ YR suffix indicates **Y**ellow cover with **R**ed handle. For **G**ray cover with **B**lack handle, replace "YR" with "GB." For **G**ray cover with **R**ed handle, replace "YR" with "GR."
- ④ cULus only.
- ⑤ Ordered and shipped as separate components—not integral to enclosed device.
- ⑥ Enclosed disconnects can accept one power pole, neutral or up to two auxiliary contacts (one mounted on either side of switch).
- ⑦ Available 2011.

Contact the Safety Switch Flex Center (1-888-329-9272) for factory-installed accessories or other special modifications.
